CDO # R3-2006-1024

To The Central Coast Regional Water Quality Control Board;

Please do not issue Cease & Desist Orders (CDO) to the residents, property owners and businesses of Los Osos. The people of Los Osos want a sewer that effectively and efficiently cleans the water within the Los Osos Groundwater Basin. The property owners and residents of Los Osos are compliant. Defendants in this case, both current and future, have already complied with the pump and inspect portions of the proposed CDO. We have voted in favor of assessments for a wastewater treatment. The Los Osos Community Services District (LOCSD) has completed their updated project report and would be putting it before the property owners of Los Osos if not for AB 2701. The delay created by AB 2701 was created by the state of California and was beyond the control of any homeowner or the LOCSD.

This is the first notification homeowners and residents have received regarding the discharge prohibition. While it is true that we all signed paperwork informing us of the need for a sewer when we purchased our homes, it was explained in a manner that led us to believe it was a prohibition on building, not discharges. The County of San Luis Obispo Department of Planning & Building official policy regarding the Los Osos Moratorium states that on January 8, 1988 the RWQCB made NEW sources of discharge and INCREASES IN VOLUME of existing sources, illegal. Documents obtained from the County of San Luis Obispo Department of Planning and Building show that this policy was developed and approved through their conversations with the RWQCB Staff and specifically Roger Briggs, who is unable to attend these hearings. The policy was developed consistent with the Memorandum of Understanding (MOU) on on-site systems enacted in 1977. Due to the notification issues above, CDOs issued to individuals at this time would be improper.

In addition to being improper, the proposed CDOs would not survive a legal challenge. The MOU enacted between the RWQCB and the County clearly states that the County Planning director, not property owners nor the RWQCB, is responsible for assuring that all approved systems comply fully with all ordinances and regulations.

Government Code, Section 4477 limits the ability of anyone with a CDO in entering into contracts with any state agency. There are a large number of businesses in my field within Los Osos and specifically the Prohibition Zone. Placing a CDO on my home, my family and my business will place our company at a competitive disadvantage against other similarly situated businesses for up to seven years according Roger Briggs' April 28, 2006 testimony.

The proposed CDOs will further divide the community, creating more "no sewer" residents in the community as property owners can implement on-site measures then work to delay a sewer project past the 2010 deadline.

The Water Quality Enforcement Procedures manual has numerous measures that can help Los Osos come into compliance with 83-13. I have studied these procedures in depth. This manual, as well as the Water Code itself, provides more effective measures to notify residents and property owners and move Los Osos quickly into compliance with RWQCB mandates. For these reasons and more, I look forward to working with the Central Coast RWQCB, staff, the LOCSD, the County of San Luis Obispo as well as the residents and property owners in Los Osos to more effectively move Los Osos into full compliance.

Sincerely,

Rob & Elise Shipe

Updated history from what I have gathered.

I have lived in Los Osos since 1993 and I became a homeowner in 2000. Over the past several months, I have talked with many county and state officials outside of Los Osos and many homeowners and residents within our community. Those outside the community held the belief that most of Los Osos does not want a sewer and most inside the community believe that the RWQCB forced the LOCSD into a bad project. Both of these views are inaccurate.

The majority of the supposed "anti-sewer" Los Osans stated in one form or another "Why don't they understand we want a sewer, we just didn't want THAT sewer". RWQCB Staff have stated that they did not choose the site for the previously proposed Wastewater Treatment Facility. I have spent the past several months researching the history of this issue in preparation for our hearing. Here is the perspective I have gathered from the citizens of Los Osos and others involved.

Since 1983, the Regional Water Quality Control Board (RWQCB) of the Central Coast has required that Los Osos institute a Wastewater Treatment Facility (Measure 83-13); an OnSite System Management Program (OSMP Measure 83-12) and a Water Management Plan (Basin Plan). The county and several CSD Boards have failed these requirements, yet repeatedly, the only issue that is talked about in our community is the sewer.

In the late 1990's the County of San Luis Obispo was prepared to build a sewer in Los Osos. An organization of residents called the "Solutions Group" campaigned to form the Los Osos Community Services District (LOCSD) on the promise of "Better, Cheaper, Faster". Their plan was to only service a portion of the town, instead of the entire Prohibition Zone. Because of this, a small and vocal portion of the local community, adamantly against any sewer project, supported them.

The RWQCB rejected their plan because it did not meet with the requirements of 83-13, and publicly stated so prior to the formation of the CSD. Once elected, the LOCSD Board began adapting their plan. Instead of looking for a new solution, or even the old solution, they stayed with their idea of a centrally located park and sewer project to treat the entire community. At this time, the anti-sewer residents broke away from supporting the CSD.

The anti-sewer crowd fought the CSD at every turn, with lawsuits and hateful comments. They created an atmosphere that divided the town. The venom caused many, including myself, to wrongly stay out of the issues. As the Tri-W sewer project morphed, more and more residents grew uneasy with the new project. Moderates came forward concerned with the $150,000,000 price and the location. The previous board mistakenly believed they were a part of the anti-sewer movement. When two LOCSD Board Members were overwhelmingly replaced, they did not change their path. The price increased to $200,000,000 to $300,000,000 and despite a re-call movement to remove the remaining three LOCSD Board Members, they continued to push forward. A majority of voters removed and replaced those remaining three members last fall.

The previous CSD Board claimed that everyone who was against the Tri-W project was anti-sewer. The previous CSD Board blamed the RWQCB for their own failings. They lied to both those in and outside of the community, pitting us against each other. The residents, property owners, current CSD Board Members of Los Osos, as well as the County of San Luis Obispo all want to address these issue quickly and effectively. I look forward to seeing you all in person at the hearing to work on effective long-term and short-term solutions to the Los Osos problems.

Sorrel Marks wrote:

>Mr. Shipe, The waiver of waste discharge requirements (for on-site systems among other discharges) expired a few years ago, which I mentioned during the hearing. The MOU between the Water Board and County (indicating the County will implement Basin Plan requirements) remains in place, although it is being updated to make it more effective and to address expiration of the waiver of waste discharge requirements. The update process is ongoing (as needs arise), was begun more than a decade ago, and I don't expect it to ever really conclude. I do expect that a new MOU will be established reflecting the County's on-site management plan (currently being developed by County) and requirements of AB885 (currently being developed by State Water Board), but don't have any specific date for completion.
>

Can I get a copy of whatever MOU is currently in effect, as well as the copy that was in effect in 2000.

Thanks ;^)

Rob

APPROVED

MEMORANDUM OF UNDERSTANDING
REGIONAL WATER QUALITY CONTROL BOARD
CENTRAL COAST REGION
AND
COUNTY OF SAN LUIS OBISPO

I. BACKGROUND

Section 13260 of the California Water Code authorizes the Regional Water Quality Control Board, Central Coast Region, (Regional Board), to regulate all discharges which could affect the quality of waters in the State, including discharges from individual sewage disposal systems. However, Section 13269 of the California Water Code permits the Regional Board to waive regulatory provisions as to a specific type of discharge where such a waiver is in the public interest.

Pursuant to the delegation of authority in Regional Board Resolution No. 70-1, the Executive Officer has waived reporting of waste discharges under specific conditions, including single family dwellings having individual on-site waste disposal systems.

The Regional Board encourages direct regulation by individual counties where such a policy is mutually beneficial. For dwellings involving five-family units or less, the Regional Board will waive consideration of discharge permits to County authorities. Waiver is conditional upon County administrative authorities enforcing the Regional Water Quality Control Plan, Central Coastal Basin (Basin Plan), prohibitions governing installation of individual sewage disposal systems and otherwise assuring favorable conditions whereever Basin Plan individual sewage disposal systems installation recommendations are not met.

The County of San Luis Obispo has adopted and implemented individual sewage disposal system regulations (County Code Title 19 and Title 22.85) in conformity with the Basin Plan and said regulations are at least equal to waste discharge requirements that the Regional Board would establish.

In the County of San Luis Obispo, the Planning Director is the administrator of the individual sewage disposal system regulations.

II. PURPOSE

This Memorandum of Understanding defines cooperative roles for the County of San Luis Obispo and the Regional Board with respect to regulation of on-site sewage disposal systems and compliance with the purpose and intent of the Basin Plan and applicable County ordinances and regulations.

III. MANAGEMENT AND ADMINISTRATION

1. The County representative responsible for the administration of the applicable individual sewage disposal system ordinances and regulations shall assure that all approved systems comply fully with such ordinances and regulations.

2. When permits issued for individual sewage disposal systems comply fully with applicable County ordinances and regulations, the Regional Board need not be notified nor consulted.

3. When exception is being sought from Title 19 San Luis Obispo County Code from County individual sewage disposal system regulation or where compliance with such regulation may be questionable or subject of dispute, the Regional Board's staff shall be consulted.

4. At any time that the County representative responsible for the administration of the individual sewage disposal system regulations feels the need to consult with or refer matters contained in this Memorandum of Understanding to the Regional Board, the Regional Board staff agrees to provide assistance.

5. No individual sewage disposal system approvals shall be issued which are not consistent with Basin Plan prohibitions unless prior approval of the Regional Board's Executive Officer is obtained.

6. The Regional Board and the County agree to keep each other informed of proposed changes in regulations or guidelines relative to individual sewage disposal systems and to allow adequate time for review, commend and consultation.

7. Regional Board shall assume jurisdiction for all community sewage collection, treatment and disposal systems. Such community sewage and disposal systems are defined as any system having more than five dwellings being served by a common treatment and disposal system or any combination of commercial, industrial, or dwelling units having a total discharge in excess of 2500 gallon per day regardless of the mode of treatment and disposal.

8. Individual sewage treatment and/or disposal systems alternatives to conventional septic tanks, leach fields, seepage pits and adsorption beds will be evaluated according to guidelines to be promulgated by the State Water Resources Control Board following a study of all such systems. In the interim, approval of alternative treatment and/or disposal systems shall be given only if the proponent will install such systems at a few selected locations and shall provide adequate research and monitoring to demonstrate the efficiency of such alternative system. In addition, proponents shall provide bonds or other forms of indemnity satisfactory to the County sufficient to replace, repair or otherwise provide waste treatment and/or disposal for the properties involved. Final acceptance of such alternate systems shall rest with the County after consultation with the Regional Board staff.

9. This agreement shall be renegotiable upon the request of either party.

APPROVED;

Subject listing of businesses in Los
Osos

Dear Mr. Shipe:

Attached to this email is a listing of all businesses in Los Osos. A specific inquiry is not available for Maintenance, Janitorial and Cleaning
Companies. The Tax Collector's Office does not have a specific category for
those types of businesses. Please utilize the Business Nature Column in
the query to determine what type of businesses they are.

If you have any questions, please contact me at (805) 781-5889.

Sincerely,

Gina Flores
Public Service Supervisor
San Luis Obispo County Tax Collector

Los Osos Moratorium Requirements

SAN LUIS OBISPO COUNTY DEPARTMENT OF PLANNING AND BUILDING
County Government Center San Luis Obispo, California 93408 Telephone (805-781-5600)

Statement of Compliance

1. I have read and received a copy of the "Los Osos Building Moratorium" information bulletin.

2. I agree to maintain this project in conformance with the "Los Osos Moratorium Bulletin" and the approved plans.

3. I acknowledge that a conversion of non-sleeping rooms without a permit is a misdemeanor.

4. I am aware that in the event that the property is sold in violation of the "Los Osos Moratorium Bulletin", this agreement can be used as evidence that the seller or current property owner had prior knowledge that an illegal modification was made to an approved project. This is a violation of county and state regulations and could be subject to the current owner and seller to real estate disclosure laws and subsequent liability.

5. I am aware that a copy of the signed "Statement of Compliance" will be entered into the permanent records for this property.

I have read and understand the above information and agree to comply with the applicable regulations.

Legal Notice: Under the California Mechanics Lien Law any contractor, subcontractor, laborer, supplier, or other person who helps to improve your property, but is not paid for his/her work or supplies, has a right to enforce a claim against your property. This means that after a court hearing, your property could be sold by a court officer and the proceeds used to satisfy the indebtedness. This can happen even if you have paid your contractor in full if the subcontractors, laborers or suppliers remain unpaid. Acceptance of work performed. I find the service and materials rendered and installed in connection with the above work mentioned, to have been completed in a satisfactory manner. I agree that the amount set forth on this contract in the space labeled "Total" to be the total and complete price, unless otherwise noted. I agree to pay reasonable attorney's fees and court costs in the event of legal action. A monthly service charge of 1.5% will be added after 30 days. I acknowledge that I have read and received a legible copy of this contract.

Septic Verification Form

San Luis Obispo County Department of Planning and Building
County Government Center, San Luis Obispo, California 93408 (805) 781-5600

1. **Certification of Existing Subsurface Sewage Disposal System.**

Date of Inspection 10-13-06

507 Highland Drive
(Property Address)

Elise Shipe
(Owner's Name)

(APN number)

(Permit number)

2. Show design and location on a scale of 1" =10' to 1" =40' of the sewage disposal system and 100% expansion area in relation to attached dwellings, structures, wells, rocks, watercourses, etc. on required plot plan.

3. a. I examined the existing subsurface sewage disposal system at the above location on (Date) 10-13-06 date.

And determined that the septic tank capacity is _____ gallons. There are _____ bedrooms in the dwelling.

b. There are 1 leachline(s), each is 100 feet long.

c. There are _____ seepage pit(s), each _____ feet in diameter and each is _____ feet deep.

d. The leach bed is _____ feet, by _____ feet, total _____ square feet of leach bed area.

4. a. Construction of septic tank (please check one of the following):

X concrete _____ fiberglass other _____

b. The tank is in good condition. The inlet and outlet Tees are present, and the baffle is not cracked, broken or displaced

Yes X No _____ Comments: _____

5. a. While pumping the tank, did effluent flow back into tank from the absorption system? _____ yes X no

b. Prior to pumping, was the liquid level in the tank above the outlet tee? _____ yes X no

c. Is design of system gravity feed? X yes _____ no

d. Were well(s) observed on this or adjacent property?* _____ yes X no

* If yes, indicate distance of well from: Septic tank, _____ Ft. Leachlines, _____ Ft. Seepage Pit, _____ Ft.

e. Distance from springs, lakes and natural drainage courses: Septic Tank, _____ Ft. Leachlines, _____ Ft. Seepage Pits _____ Ft.

ADDITIONAL COMMENTS _____

6a. X It is my opinion that the system appears to be in good working order and can be expected to function properly with proper maintenance. No repairs are necessary at this time.

6b. _____ It is my opinion that the system is not in good working order and will not function properly without the following repairs:

☒ It is the opinion of Clay's Septic & Jetting, Inc. that this individual sewage-disposal system with proper maintenance, can be expected to function satisfactorily, and is not likely to create unsanitary conditions. This is not a guarantee, this is an inspection.

Date 10-13-86 Inspected By Mike Williams

CITY OF SANTA MARIA
WASTEWATER TREATMENT PLANT
601 BLACK ROAD, SANTA MARIA, CA 93458
(805) 925-0951, EXT. 7270 • FAX (805) 928-7240

DOMESTIC WASTEWATER GENERATOR RESPONSIBILITY ACKNOWLEDGEMENT

The City of Santa Maria issues permits to approved septage hauling companies wishing to discharge at the City wastewater treatment plant at 601 Black Road. In order to comply with their permit instructions, any septage hauling company using the City facility is restricted from discharging controlled or prohibited wastewater that may include hazardous, toxic, or other harmful substances such as motor oil, paint, herbicides, or other household hazardous wastes. Nor does the City permit septage hauling companies to discharge any wastewater that has been combined with any other type of wastewater.

Harmful substances in untreated wastewater can cause serious damage to the functioning of our wastewater treatment plant and degrade treated wastewater that is subsequently released to groundwater. All wastewater generators, industrial and domestic, must comply with some important restrictions.

No septage containing harmful substances shall be acceptable for discharge at the City wastewater treatment plant. If you would like information on how to properly dispose of household hazardous waste, please call 805-925-0951, ext. 130.

City staff appreciates your cooperation in our endeavor to keep the groundwater clean and our wastewater treatment plant functioning properly. You can further help by providing the following information.

Please print or type all information except signature.

Mr. Rob Shipe
(address n/a – request received via hand delivered request on 10/10/06)

Re: Request for Documents

Dear Mr. Shipe:

Enclosed are the items you personally requested on Tuesday, October 10, 2006, in our Permit Center. Your request resulted in 14 copies at a cost of $ .10/per copy which comes to a grand total of $1.40.

Upon remittance of the above amount, you may obtain the documents requested.

Please note, as of this date, there is no correspondence available between Matt Janssen of the County of San Luis Planning Department and the California Regional Water Quality Control Board regarding the Los Osos Moratorium.

Thank you.

Mary Velarde
Planning Department Secretary

S.L.O. COUNTY
PLANNING DEPT.

Mr. Chuck Stevenson
San Luis Obispo County
Planning Department
County Government Center
San Luis Obispo, CA 93408

Dear Mr. Stevenson:

SUBJECT: IMPLEMENTATION OF RESOLUTION 83-12

As per your request, enclosed are copies of the State Water Resources Control Board Guidelines for Mound Systems and Evapotranspiration Systems. All such systems permitted by San Luis Obispo County must be built to these standards. The Regional Board need not be consulted for approval of these systems unless a Basin Plan prohibition exemption is requested. For your information, the evapotranspiration system design calculations may be modified as described on page 8 of Resolution 83-12.

The general process for on-site system approval is as follows:

1. On-site disposal systems serving up to five dwelling units or designed for less than 2500 gallons per day are under the regulatory authority of San Luis Obispo County. The Regional Board, which has conditionally waived regulation of this size system, need not be informed of approval or denial of these systems.

2. Alternative on-site disposal systems (mound or evapotranspiration systems) must be built to meet state guidelines. The Regional Board need not be informed of system approval or denial.

3. All requests for variances from the Basin Plan prohibitions first are to be submitted to the County for review. If the County is willing to accept the request, the proposal is then submitted to the Regional Board by the County for approval, conditional approval, or denial. Submittals for Basin Plan prohibition exemptions must come from the County. The Regional Board will not consider a request that has been denied by the County.

4. The Regional Board may determine specific on-site systems serving more than five units or 2500 GPD are best subject to local control. In such cases, Regulatory control will be delegated to the County in writing. All such systems will be subject to County and Basin Plan criteria.

Any revisions to County ordinances or procedures should be discussed with this Board's staff to ensure that Basin Plan criteria are interpreted the same by all parties.

If you have any questions concerning interpretation of the Basin Plan criteria or approval of on-site systems, please contact John Goni of this Board's staff.

Very truly yours,

KENNETH R. JONES
Executive Officer

MEMORANDUM OF UNDERSTANDING
REGIONAL WATER QUALITY CONTROL BOARD
CENTRAL COAST REGION
AND
COUNTY OF SAN LUIS OBISPO

I. BACKGROUND

Section 13260 of the California Water Code authorizes the Regional Water Quality Control Board, Central Coast Region, (Regional Board), to regulate all discharges which could affect the quality of waters in the State, including discharges from individual sewage disposal systems. However, Section 13269 of the California Water Code permits the Regional Board to waive regulatory provisions as to a specific type of discharge where such a waiver is in the public interest.

Pursuant to the delegation of authority in Regional Board Resolution No. 70-1, the Executive Officer has waived reporting of waste discharges under specific conditions, including single family dwellings having individual on-site waste disposal systems.

The Regional Board encourages direct regulation by individual counties where such a policy is mutually beneficial. For dwellings involving five-family units or less, the Regional Board will waive consideration of discharge permits to County authorities. Waiver is conditional upon County administrative authorities enforcing the Regional Water Quality Control Plan, Central Coastal Basin (Basin Plan), prohibitions governing installation of individual sewage disposal systems and otherwise assuring favorable conditions wherever Basin Plan individual sewage disposal systems installation recommendations are not met.

The County of San Luis Obispo has adopted and implemented individual sewage disposal system regulations (Ordinance No._____) in conformity with the Basin Plan and said regulations are at least equal to waste discharge requirements that the Regional Board would establish.

In the County of San Luis Obispo, the Planning Director is the administrator of the individual sewage disposal system regulations.

II. PURPOSE

This Memorandum of Understanding defines cooperative roles for the County of San Luis Obispo and the Regional Board with respect to regulation of on-site sewage disposal systems and compliance with the purpose and intent of the Basin Plan and applicable County ordinances and regulations.

III. MANAGEMENT AND ADMINISTRATION

1. The County representative responsible for the administration of the applicable individual sewage disposal system ordinances and regulations shall assure that all approved systems comply fully with such ordinances and regulations.

2. When permits issued for individual sewage disposal systems comply fully with applicable County ordinances and regulations, the Regional Board need not be notified nor consulted.

3. When variance is being sought from County individual sewage disposal system regulation or where compliance with such regulation may be questionable or subject of dispute, the Regional Board's staff shall be consulted.

4. At any time that the County representative responsible for the administration of the individual sewage disposal system regulations feels the need to consult with or refer matters contained in this Memorandum of Understanding to the Regional Board, the Regional Board staff agrees to provide assistance.

5. No individual sewage disposal system approvals shall be issued which are not consistent with Basin Plan prohibitions unless prior approval of the Regional Board's Executive Officer is obtained.

6. The Regional Board will send the County new and amended Basin Plan sections relative to individual sewage disposal systems prohibitions and/or regulations.

7. Regional Board shall assume jurisdiction for all community sewage collection, treatment and disposal systems. Such community sewage and disposal systems are defined as any system having more than five dwellings being served by a common treatment and disposal system or any combination of commercial, industrial, or dwelling units having a total discharge in excess of 2,500 gallons per day regardless of the mode of treatment and disposal.

8. Individual sewage treatment and/or disposal systems alternatives to conventional septic tanks, leach fields, seepage pits and adsorption beds will be evaluated according to guidelines to be promulgated by the State Water Resources Control Board following a study of all such systems. In the interim, approval of alternative treatment and/or disposal systems shall be given only if the proponent will install such systems at one or two selected locations and shall provide adequate research and monitoring to demonstrate the efficiency of such alternative system. In addition, proponents shall provide bonds to the County sufficient to replace, repair or otherwise provide waste treatment and/or disposal for the properties involved. Final acceptance of such alternate systems shall rest with the County after consultation with the Regional Board staff.

9. This agreement shall be renegotiable upon the request of either party.

Dear Mr. Briggs:

SUBJECT: LOS OSOS MORATORIUM

This is intended to summarize the conclusions reached at our meeting on January 21, 1988, which included John Goni and Jay Kano of your staff, Tim Mazzacano, county Director of Environmental Health, Fred Norton and Doug Morris of my staff, you and I. We met to clarify the provisions of your Board's order of January 8, and agreed upon the following points, all of which resulted from the basic understanding that the order of the Regional Water Quality Control Board prohibits this office from issuing any construction permits which would result in new sewage discharge or increases in discharge from existing sewage disposal systems within the prohibition area.

1. Independent structures without toilets or other plumbing fixtures (e.g. detached garages) may be approved.

2. Additions to existing buildings which would normally (in circumstances other than the moratorium) require accompanying expansion of on-site sewage disposal (septic) systems shall not be approved, even where the existing septic system was originally oversized and could accommodate the addition without expansion.

3. Proposed living area (not bedroom) additions to existing dwellings will be processed per normal procedures: if they would not normally require accompanying septic system expansion, we will approve them.

4. Any change in occupancy of commercial structures which would increase the "fixture unit" requirements per the Uniform Plumbing Code shall not be approved.

5. Alterations of existing buildings which propose additional plumbing fixtures, including but not limited to water supply fixtures, drain or disposal fixtures, shall not be approved. No replacement of existing fixtures shall be approved except where replacement is in-kind or involves a reduction in the actual number of fixtures. No "credit" will be allowed for fixtures which use less water.

6. Commercial shell buildings may undergo internal modifications through tenant improvements, limited only by the design capacity of the originally-approved and installed septic system.

7. Swimming pools and hot tubs/spas may be approved.

8. Holding tanks shall not be allowed as a method of sewage disposal.

9. No "exotic" disposal systems shall be allowed as an alternative to the moratorium.

10. Repair and/or replacement of existing septic systems will be approved as usual.

11. An expired building permit shall not be reissued.

12. Exceptions to any of the above "prohibitions" may be granted by the Regional Water Quality Control Board.

Please notify me as soon as possible if your understanding of any of the above points differs from mine.

Sincerely,

Paul C. Crawford

Mr. Paul Crawford
San Luis Obispo County Planning & Building Dept.
County Government Center
San Luis Obispo, CA 93408

Dear Mr. Crawford:

SUBJECT: LOS OSOS MORATORIUM

Thank you for your letter of January 21, 1988, summarizing conclusions of our meeting on that same date. The twelve iems listed in your letter correctly describe allowable and prohibited projects within the Baywood/Los Osos moratorium area. Allowable projects are also those with complete building permit applications submitted on or before January 8, 1988. You are also correct in your basic assumption projects which create new waste discharges or increases in waste discharges will not be allowed.

The County Planning Department may make the initial determination of which projects may proceed within the moratorium area. My staff will be available to assist you in making determinations on projects difficult to define. Any applicants desiring an exemption from the moratorium must make their appeal to the Regional Water Quality Control Board, and should contact my staff. To grant an exemption, the applicant must provide us with the following information:

1. A building permit application was complete as of January 8, 1988; or

2. The project will not generate a new or increased waste discharge; or

3. The project will result in a water quality benefit.

LADIES/GENTLEMEN:

SUBJECT: IMPLEMENTATION OF AMENDMENT TO THE WATER QUALITY CONTROL PLAN, CENTRAL COASTAL BASIN (BASIN PLAN), CONCERNING INDIVIDUAL/COMMUNITY ON-SITE SEWAGE DISPOSAL SYSTEMS

The State Water Resources Control Board has approved an amendment to the Basin Plan concerning individual/community on-site sewage disposal systems (our Resolution 83-12) This amendment is now effective. However, we are providing a grace period of three months to revise ordinances. You must begin enforcing this Resolution on March 15, 1984.

Your regulations must comply with items within the "prohibitions" section of this amendment. I urge you to seriously consider adopting and/or implementing recommendations as well.

While I do not wish to minimize the importance of other recommendations, I would like to stress the significance of conforming with the recommended standard percolation test procedure. Percolation rate test results can vary significantly with minor modifications in water filling depth, hole width, mode of drilling, method of reading measurement, etc. For this reason, it is important test methods be consistent. If you would like additional information that discusses these percolation test variations, please refer to John T. Winneberger and John W. Klocks article Current and Recommended Practices for Subsurface Waste Water Disposal Systems in Arizona: Engineering Research Center, Arizona State University, Tempe, Arizona, 1973.

I believe our existing Memorandum of Understanding with respect to the regulation of on-site sewage disposal systems is still satisfactory and need not be renegotiated. However, a Memorandum of Understanding will have to be established with agencies we currently do not have an agreement with.

ROUTING

September 5, 2006

Victor Holanda, Director
County of San Luis Obispo Building and Planning
County Government Center
San Luis Obispo, CA 93408

Dear Mr. Holanda:

PERMIT APPROVALS WITHIN THE LOS OSOS/BAYWOOD PARK PROHIBITION AREA

As you know, the Water Quality Control Plan (Basin Plan) prohibits wastewater discharges to on-site systems in Los Osos/Baywood Park. It has come to our attention that County Planning staff continues to approve projects within the Los Osos/Baywood Park Prohibition Area, which appear to be in violation of the Basin Plan on-site discharge prohibition.

There have been several projects recently noted by Water Board staff that shows the potential for an increase in wastewater being discharged to their on-site septic systems. For example, the residence at 591 Ramona obtained a minor use permit in May of 2004 for a 2,134 square foot **addition** to a single-family dwelling. This addition more than doubled the size of the existing single-family residence and causes concern that there is additional wastewater from the residence. Another example, the property at 2009 9th Street was an existing ~900 square-foot single family dwelling; permits were obtained in 2001-2002 for construction of a ~900 square-foot office and 900 square-foot residence on top having one bedroom and 1.5 baths. This change in use potentially may have increased wastewater from the property and brings into question the reliability of County Planning to adequately evaluate wastewater issues and permit such projects in the Los Osos/Baywood Park Prohibition area.

Therefore, at this time, we ask that no permits be approved within the Los Osos/Baywood Park Prohibition area without our written approval.

895 Aerovista Place, Suite 101
San Luis Obispo, CA 93401-7906

Re: **Permit Approvals within the Los Osos/Baywood Prohibition Area**

Dear Mr. Briggs:

Thank you for your letter of September 5 regarding the above referenced subject. I understood that the Regional Water Quality Control Board (RWQCB) is concerned about the county's existing review process and subsequent Building Permit issuance of construction remodels, e.g. residential, in the Los Osos/Baywood Park prohibition area. However, I believe the examples you cited are conceivably inaccurate, and choose to discuss the fine points of those applications in a joint staff meeting.

With the objective of maintaining clean water and avoiding potential pollution within Los Osos/Baywood Park prohibition area, the County is prepared, effective immediately, not to issue any permits in this area without expressed written approval from the RWQCB. Because Building Permits are *ministerial* under the law, we will assume that the RWQCB staff understands the liability and consequences associated with delaying the issuance of *Building Permits*. Moreover and in the spirit of professional cooperation and good customer service we will assume the RWQCB staff will review building permit applications in a timely manner.

Finally, I have asked Matt Janssen of my staff to contact your office to arrange a meeting for the purpose of reviewing the moratorium exemption criteria developed in 1988, and to determine whether or not those criteria are still relevant.

Again, thank you for bringing this issue to my attention.

Sincerely,

Victor Holanda

Los Osos Building Moratorium

San Luis Obispo County Department of Planning and Building

On Friday, January 8, 1988, the California Regional Water Quality Control Board (RWQCB) imposed a moratorium on new sources of sewage discharge (and increases in the volume of existing sources) in the community of Baywood-Los Osos. The moratorium was imposed through the provisions of a Memorandum of Understanding executed between the county and the RWQCB in December, 1978, and imposes a variety of responsibilities on the county. The purpose of this memo is to set forth official Department of Planning and Building policy on the implementation of the moratorium by staff.

1. Area where moratorium applies. The area subject to the moratorium is shown on the attached map, and is known as the prohibition area. The provisions of the moratorium do not apply outside of the prohibition area.

2. Effect of moratorium on the permit process:

   a. Construction involving new or expanded septic systems prohibited. The primary effect of the moratorium is that this office is prohibited from issuing any permits for new on-site sewage disposal systems (commonly called "septic" systems) within the prohibition area, We are also prohibited from issuing permits for expansion of the capacities of any existing systems. These mandates (for our purposes) translate into the following specific requirements:

      (1) Independent structures without toilets or other plumbing fixtures (e.g. detached garages) may be approved.

      (2) Additions to existing buildings which would normally (in circumstances other than the moratorium) require accompanying expansion of on-site sewage disposal (septic) systems shall not be approved, even where the existing septic system was originally oversized and could accommodate the addition without expansion.

      (3) Proposed living area (not bedroom) additions to existing dwellings will be processed per normal procedures: if they would not normally require accompanying septic system expansion, they may be approved. However, only living area additions that are open to the "core" of the house (kitchen, living room or dining room), that have large cased openings (no doors), and that do not have closets will be approved. If you have any questions about these requirements, please call Bob Mourenza, Supervising Plans Examiner, at 781-5709 before you complete your design.

      (4) Any change in occupancy of commercial structures which would increase the "fixture unit" requirements per the Uniform Plumbing Code shall not be approved.

Judicial Review and Enforcement

Section

13330. Petition for writ of mandate; Other remedies; Evidence

13331. Attorney General's petition for injunction against violation of cease and desist order; Evidence; Order to appear, and relief granted thereon; Stay

13331.2. Applicable law

§ 13330. Petition for writ of mandate; Other remedies; Evidence

(a) Not later than 30 days from the date of service of a copy of a decision or order issued by the state board under this division, other than a decision or order issued pursuant to Article 7 (commencing with Section 13550) of Chapter 7, any aggrieved party may file with the superior court a petition for writ of mandate for review thereof.

(b) Any party aggrieved by a final decision or order of a regional board for which the state board denies review may obtain review of the decision or order of the regional board in the superior court by filing in the court a petition for writ of mandate not later than 30 days from the date on which the state board denies review.

(c) If no aggrieved party petitions for writ of mandate within the time provided by this section, a decision or order of the state board or a regional board shall not be subject to review by any court.

(d) Except as otherwise provided herein, Section 1094.5 of the Code of Civil Procedure shall govern proceedings for which petitions are filed pursuant to this section. For the purposes of subdivision (c) of Section 1094.5 of the Code of Civil Procedure, the court shall exercise its independent judgment on the evidence in any case involving the judicial review of a decision or order of the state board issued under Section 13320, or a decision or order of a regional board for which the state board denies review under Section 13320, other than a decision or order issued under Section 13323.

(e) Any party aggrieved by a decision or order issued by the state board under Article 7 (commencing with Section 13550) of Chapter 7 may petition for reconsideration or judicial review in accordance with Chapter 4 (commencing with Section 1120) of Part 1 of Division 2.

Added Stats 1969 ch 482 § 18, operative January 1, 1970. Amended Stats 1996 ch 659 § 24 (AB 3036).

Amendments:

1996 Amendments: Substituted the section for the former section which read: "(a) Within 30 days after service of a copy of a decision and order issued by the state board under Section 13320, any aggrieved party may file with the superior court a petition for a writ of mandate for review thereof. Failure to file such an action shall not preclude a party from challenging the reasonableness and validity of a decision or order of a regional board or the state board in any judicial proceedings brought to enforce such decision or order or for other civil remedies.

"(b) The evidence before the court shall consist of the record before the state board, including the regional board's record, and any other relevant evidence which, in the judgment of the court, should be considered to effectuate and implement the policies of this division. In every such case, the court shall exercise its independent judgment on the evidence.

"(c) Except as otherwise provided herein, the provisions of subdivisions (e) and (f) of Section 1094.5 of the Code of Civil Procedure shall govern proceedings pursuant to this section."

Writ of mandate: CCP §§ 1084 et seq.

NOTES OF DECISIONS

1. Limitations

1. Limitations

The California Environmental Quality Act of 1970 (Pub. Resources Code, § 21000 et seq.), has its own statute of limitations (Pub. Resources Code, § 21165 et seq.), which, being specifically applicable, takes precedence over the general provisions of Code of Civ. Proc., § 860 (limitations for actions validating actions of public agency). By a parity of reasoning, the CEQA statute of limitations also takes precedence over the general provisions of Wat. Code, § 13330 (limitations for actions under Porter-Cologne Water Quality Control Act, Wat. Code, § 13000 et seq., to review decisions of regional water quality control board). Committee for a Progressive Gilroy v State Water Resources Control Bd. (1987, 3rd Dist) 192 Cal App 3d 847, 237 Cal Rptr 723.

SUGGESTED FORMS

Petition for Writ of Mandamus—To Challenge Order Issued by State Board Against Corporation—Affecting Proposed Change in Waste Discharge Procedures

[Title of Court and Cause]

_____, petitioner herein, petitions this court for a writ of mandamus pursuant to Section 1094.5 of the Code of Civil Procedure of the State of California, directed to respondent State Water Resources Control Board of the State of California, and by this verified petition represents as follows:

1. Petitioner _____ is a corporation duly organized and existing under the laws of the State of California, and is engaged in the business of ____ ____ [chemical processing or as the case may be], with its principal executive office located at ____ *[address]*, in the City of ____ ____, County of _____, State of California.

2. Respondent is the State Water Resources Control Board of the State of California, hereinafter referred to as respondent Board. Respondent Board, ____ *[if applicable, add:* together with the various regional water quality control boards], is the duly constituted authority for the regulation and control of waste discharge within the waters of the State of California.

3. For _____ years, petitioner has owned and operated a _____ [chemical processing plant] located at ____ *[specify]* _____ *[on or near]* ____ *[stream]*. Petitioner uses the following chemical substances at such plant:____ ____.

4. ____ *[Set forth petitioner's procedure of disposing and treating of waste from chemical processing]*.

5. On _____, *[date]*, in accordance with the provisions of Section 13260 of the Water Code
