CALIFORNIA REGIONAL WATER QUALITY CONTROL BOARD
CENTRAL VALLEY REGION

ORDER NO R5-2009-0064

RESCINDING NPDES PERMIT

The California Regional Water Quality Control Board, Central Valley Region, finds that the Board adopted the following Order that is no longer needed for the reasons below.

Waste Discharge Requirements Order No. R5-2004-0066 (NPDES No. CA0081531) prescribes waste discharge requirements for the Collins & Aikman Products Company, Inc. to discharge treated groundwater from the former Wickes Forest Industries Site Groundwater Remediation System (Facility) to a drainage canal that is tributary to Ulatis Creek, a water of the United States. The Facility ceased all discharges to surface water in July 2005 and the Collins & Aikman Products Company, Inc. has since filed for bankruptcy, abandoning the groundwater remediation system. The California Department of Toxic Substances Control (DTSC) has assumed responsibility of the site. After an evaluation of the Facility, DTSC has determined that the existing treatment system is not adequate and would need to be completely reconstructed in order to consistently meet the requirements of the NPDES permit. DTSC is investigating other discharge alternatives and does not intend to discharge to surface water in the foreseeable future. For this reason, DTSC has requested that the NPDES permit be rescinded. (JDM)

IT IS HEREBY ORDERED that the above NPDES Permit be rescinded.

I, PAMELA C. CREEDON, Executive Officer, do hereby certify the foregoing is a full, true, and correct copy of an Order adopted by the California Regional Water Quality Control Board, Central Valley Region, on 12 June 2009

Pamela C Creedon
