Subject:	RE: Confirmation of Understanding Regarding Continuation of Operation of the Feather River Organics Compost Facility
Date:	Thursday, August 28, 2014 1:51:22 PM

Drew,
Thank you for your email and letter. My understanding of the resolution is similar to yours, with the additional explanations that:

(a) all rainfall, up to and including, a 25-yr, 24-hr storm event must be collected from the compost area,
(b) Board staff agreed to this temporary design storm event based on Recology's stated desire to move the composting area to another location within a few years. However, if the composting area remains onsite, then the updated WDRs will probably require collection of a higher volume of stormwater;
(c) Board staff will prepare a Monitoring and Reporting Program (MRP) which will require Recology to measure and document the amount of stormwater falling on the compost area, the amount collected, and the disposal methods.
(d) The CAO will be revised to require the collection of all all rainfall, up to and including, a 25-yr, 24-hr storm event at the compost area. If Recology fails to do so, the the Prosecution Team will recommend additional enforcement action.

Staff will be inspecting the site within the next few weeks to begin the process of revising the CAO and writing the MRP.

Please feel free to contact me if you have any questions.

Subject: Confirmation of Understanding Regarding Continuation of Operation of the Feather River Organics Compost Facility

August 27, 2014

Hello Wendy:

Based on agreement reached at last week's meeting, we are proceeding expeditiously with constructing the improvements to the stormwater management system at the Feather River Organics (FRO) Compost facility so we can meet the Cleanup and Abatement Order's October 1, 2014 deadline.

The attached letter memorializes our understanding of the agreement reached last week that allows FRO to proceed with the construction of stormwater system improvements and continue in operation on an interim basis.

We very much appreciate your input into the decision-making as well as your staff's time and consideration. Please feel free to call me or Phil Graham with any questions.

Best wishes,

Drew
