GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. After the formation of the California Water Commission back on December 19, 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

Dear Ms. Galleron:

REQUEST TO ASSIGN CLAIM OF WATER RIGHT TO NEW OWNERS

On March 8, 2005, you contacted the Division of Water Rights (Division) concerning your claimed water right filed with the Division as Statement of Water Diversion and Use S001810. You indicated that you had sold the property for which the water right is claimed in 1997.

Enclosed is a Notice of Assignment form which you should complete and return to the Division at the address shown on the top of the form. I have already inserted the Statement number. The Division will then notify the current owners of the property that the claim of water right has been assigned to them. If the Division does not hear anything to the contrary, the names of the new owners will replace yours in our records. You will receive a copy of the letter to confirm that the assignment process has been completed.

Please contact me at (916) 341-5388 if you need further assistance.

Sincerely,
