SALMON FOREVER
FINALIZED 15-MINUTE DATA

Stage, Discharge, Turbidity,
and Estimated Suspended Sediment Concentration

Hydrologic Year 2000
Period of Record: 8/1/99 00:15 to 5/26/00 15:00

Compiled by
Benjamin S. Bray
For Salmon Forever
May 10, 2001

Data Description By Column		
Column ID	Data Description	Abbreviation
Col_1	Date, mm/dd/yy.	date
Col_2	Time, hh:mm.	time
Col_3	Data dump ID number.	dump
Col_4	Suspended sediment sample bottle ID number.	bottle
Col_5	Stage (water depth) in units of feet.	stg
Col_6	Stage data quality code.	stgcode
Col_7	Discharge in cubic feet per second.	discharge
Col_8	Turbidity in nephelometric turbidity units or NTU.	turb
Col_9	Turbidity data quality code.	turbcode
Col_10	Estimated suspended sediment concentration in milligrams per liter. HY 2000 Estimated Sediment concentration was computed from a **linear regression** of Turbidity versus laboratory sediment concentration, based on all lab samples from hydrologic year 2000.	estssc
Col_11	Water temperature in °C.	wtemp
Col_12	Rainfall in inches.	rain

Stage and Turbidity Data Quality Codes	
ID	Description
0	Good (unadjusted)
1	Adjusted (in the case of stage data, raw data is often adjusted to agree with observer staff plate readings)
2	Interpolated; good
3	Interpolated; fair
4	Interpolated; poor

Note: Interpolations are defined as "good" if interpolation interval is small and the degree of uncertainty associated with stage or turbidity behavior over the interval is low. Interpolations are graded as "fair" or "poor" as time interval over which the interpolation is applied increases and the degree of uncertainty associated with stage or turbidity over the interpolation interval increases.

Additional note to reader: The following data set was compiled and printed using the spreadsheet software MS EXCEL. During the importing of the space-delimited 15-minute data files in MS EXCEL, hour formats were automatically converted from reading "1/23/00 24:00" to "1/23/00 0:00", for example. The result is that the midnight data record appears out of order, when in reality the data is in correct sequential order.
