Dear MR. Muller:

The S.F. bay is getting dirtier & Dirtier as we fill it with more & more trash. Now hope fully you have gotten to enjoy the luxury's & fun the S.F. bay has to offer us. So many people have. But the trash is doing alot of damage. It destroys recreation, impacts water quality, & kills marine ~~water~~ wild life. The board's Proposal is not good enouph. It would require citie's & countries to meet a clean up levil of 100 pieces of trash per 100 feet of trash in a garbage "hot spot". We apriciate the clean-up so much but There is more trash then that. The S.F. bay deserves better. There should be No Trash at all! Please try to make some change. My Name

is Anya & I am 11. I may be young but I care, so do so many people. It is a beutiful place & home to so many animals. It's there home & not a place to dump ale trash. I understand that this change would ~~cause~~ cost alot of money & effort. In the long run though it is so impoltant. I go to King Middle School & was working in the garden today. The program is called the edible schoolyard. founded by Allice waters & visited by Plince Williums. Today we learned about water conservation. I think if someone like Prince Williums suports a program that suports water conservation then so should you. Please respond to me at 548 ~~Santa~~ Santa Barbera rd, Berkeley CA. And Please make change. Scincerely, Anya Wallis
