Bruce Wolfe, Executive Officer
Regional Water Quality Control Board, San Francisco Bay Region
1515 Clay Street, Suite 1400
Oakland, CA 94612

Re: NPDES Permit No. CAS612008; Order R2-2009-0074
Annual Report of Stormwater Program Implementation Fiscal Year 2013-14

Dear Mr. Wolfe:

Enclosed for your review is the City of Berkeley's Annual Report of Stormwater Program Implementation for Fiscal Year 2013-14, as required by the Municipal Regional Stormwater NPDES Permit for the Alameda Countywide Clean Water Program.

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel gather and properly evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those people directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and as complete as possible. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for known violations.

If you have any questions, please contact Danny Akagi, Associate Civil Engineer, at 981-6394, or Sean Rose, Manager of Engineering, at 981-6435.

Sincerely,

Andrew Clough
Director of Public Works

Enclosure: Annual Report of Stormwater Program Implementation Fiscal Year 2013-14

1947 Center Street, 4TH Floor, Berkeley, CA 94704-1155 Tel: 510.981-6400 TDD: 510.981-6903 Fax: 510.981.6390

Section 1 – Permittee Information

Background Information					
Permittee Name:	City of Berkeley				
Population:	106,000				
NPDES Permit No.:	CAS612008				
Order Number:	R2-2009-0074R				
Reporting Time Period (month/year):	July 2013 through June 2014				
Name of the Responsible Authority:	Andrew Clough			**Title:**	Director of Public Works
Mailing Address:	2180 Milvia Street, 3rd Floor				
City: Berkeley	**Zip Code:**	94704		**County:**	Alameda
Telephone Number:	510-981-4302		**Fax Number:**		510-981-6320
E-mail Address:	aclough@cityofberkeley.info				
Name of the Designated Stormwater Management Program Contact (if different from above):	Daniel Akagi			**Title:**	Associate Civil Engineer
Department:	Public Works, Engineering Division				
Mailing Address:	1947 Center Street, 4th Floor				
City: Berkeley	**Zip Code:**	94704		**County:**	Alameda
Telephone Number:	510-981-6394		**Fax Number:**		510-981-6390
E-mail Address:	dakagi@cityofberkeley.info				

Section 2 - Provision C.2 Reporting Municipal Operations

Program Highlights and Evaluation

Highlight/summarize activities for reporting year:

Summary: See Section C.2 - Municipal Operations - of the Alameda Countywide Clean Water Program's (ACCWP) FY 13-14 Annual Report for a summary of Program activities.

Staff attended the April 2, 2014 Municipal Maintenance Subcommittee Meeting.

C.2.a. ▶ Street and Road Repair and Maintenance

Place a **Y** in the boxes next to activities where applicable BMPs were implemented. If not applicable, type **NA** in the box and provide an explanation in the comments section below. Place an **N** in the boxes next to activities where applicable BMPs were not implemented for one or more of these activities during the reporting fiscal year, then in the comments section below provide an explanation of when BMPs were not implemented and the corrective actions taken.

Y	Control of debris and waste materials during road and parking lot installation, repaving or repair maintenance activities from polluting stormwater
Y	Control of concrete slurry and wastewater, asphalt, pavement cutting, and other street and road maintenance materials and wastewater from discharging to storm drains from work sites.
Y	Sweeping and/or vacuuming and other dry methods to remove debris, concrete, or sediment residues from work sites upon completion of work.

Comments:

C.2.b. ▶Sidewalk/Plaza Maintenance and Pavement Washing

Place a **Y** in the boxes next to activities where applicable BMPs were implemented. If not applicable, type **NA** in the box and provide an explanation in the comments section below. Place an **N** in the boxes next to activities where applicable BMPs were not implemented for one or more of these activities during the reporting fiscal year, then in the comments section below provide an explanation of when BMPs were not implemented and the corrective actions taken.

Y	Control of wash water from pavement washing, mobile cleaning, pressure wash operations at parking lots, garages, trash areas, gas station fueling areas, and sidewalk and plaza cleaning activities from polluting stormwater
Y	Implementation of the BASMAA Mobile Surface Cleaner Program BMPs

Comments:

C.2.c. ▶Bridge and Structure Maintenance and Graffiti Removal

Place a **Y** in the boxes next to activities where applicable BMPs were implemented. If not applicable, type **NA** in the box and provide an explanation in the comments section below. Place an **N** in the boxes next to activities where applicable BMPs were not implemented for one or more of these activities during the reporting fiscal year, then in the comments section below provide an explanation of when BMPs were not implemented and the corrective actions taken.

Y	Control of discharges from bridge and structural maintenance activities directly over water or into storm drains
Y	Control of discharges from graffiti removal activities
Y	Proper disposal for wastes generated from bridge and structure maintenance and graffiti removal activities
Y	Implementation of the BASMAA Mobile Surface Cleaner Program BMPs for graffiti removal
Y	Employee training on proper capture and disposal methods for wastes generated from bridge and structural maintenance and graffiti removal activities.
NA	Contract specifications requiring proper capture and disposal methods for wastes generated from bridge and structural maintenance and graffiti removal activities.

Comments: City does not have contracts for bridge and structural maintenance of for graffiti removal activities.

C.2.d. ▶ Stormwater Pump Stations

Does your municipality own stormwater pump stations:		**Yes**	X	**No**

If your answer is **No** then skip to **C.2.e.**

Complete the following table for dry weather DO monitoring and inspection data for pump stations[1] (add more rows for additional pump stations). If a pump station is exempt from DO monitoring, explain why it is exempt.

Pump Station Name and Location	**First inspection Dry Weather DO Data**		**Second inspection Dry Weather DO Data**	
	Date	**mg/L**	**Date**	**mg/L**

Summarize corrective actions as needed for DO monitoring at or below 3 mg/L. Attach inspection records of additional DO monitoring for corrective actions:

Summary:

Attachments:

Complete the following table for wet weather inspection data for pump stations (add more rows for additional pump stations):

Pump Station Name and Location	**Date** (2x/year required)	**Presence of Trash** (Cubic Yards)	**Presence of Odor** (Yes or No)	**Presence of Color** (Yes or No)	**Presence of Turbidity** (Yes or No)	**Presence of Floating Hydrocarbons** (Yes or No)

[1] DO monitoring is exempted where all discharge from a pump station remains in a stormwater collection system or infiltrates into a dry creek immediately downstream.

C.2.e. ▶ Rural Public Works Construction and Maintenance

Does your municipality own/maintain rural[2] roads:		**Yes**	X	**No**
If your answer is **No** then skip to **C.2.f.**				
Place a **Y** in the boxes next to activities where applicable BMPs were implemented. If not applicable, type **NA** in the box and provide an explanation in the comments section below. Place an **N** in the boxes next to activities where applicable BMPs were not implemented for one or more of these activities during the reporting fiscal year, then in the comments section below provide an explanation of when BMPs were not implemented and the corrective actions taken.				
	Control of road-related erosion and sediment transport from road design, construction, maintenance, and repairs in rural areas			
	Identification and prioritization of rural road maintenance based on soil erosion potential, slope steepness, and stream habitat resources			
	No impact to creek functions including migratory fish passage during construction of roads and culverts			
	Inspection of rural roads for structural integrity and prevention of impact on water quality			
	Maintenance of rural roads adjacent to streams and riparian habitat to reduce erosion, replace damaging shotgun culverts and excessive erosion			
	Re-grading of unpaved rural roads to slope outward where consistent with road engineering safety standards, and installation of water bars as appropriate			
	Inclusion of measures to reduce erosion, provide fish passage, and maintain natural stream geomorphology when replacing culverts or design of new culverts or bridge crossings			
Comments including listing increased maintenance in priority areas:				

[2] Rural means any watershed or portion thereof that is developed with large lot home-sites, such as one acre or larger, or with primarily agricultural, grazing or open space uses.

C.2.f. ▶ Corporation Yard BMP Implementation

Place an **X** in the boxes below that apply to your corporations yard(s):

	We do not have a corporation yard
	Our corporation yard is a filed NOI facility and regulated by the California State Industrial Stormwater NPDES General Permit
X	We have a **Stormwater Pollution Prevention Plan (SWPPP)** for the Corporation Yard(s)

Place an **X** in the boxes below next to implemented SWPPP BMPs to indicate that these BMPs were implemented in applicable instances. If not applicable, type **NA** in the box. If one or more of the BMPs were not adequately implemented during the reporting fiscal year then indicate so and explain in the comments section below:

X	Control of pollutant discharges to storm drains such as wash waters from cleaning vehicles and equipment
X	Routine inspection prior to the rainy seasons of corporation yard(s) to ensure non-stormwater discharges have not entered the storm drain system
X	Containment of all vehicle and equipment wash areas through plumbing to sanitary or another collection method
X	Use of dry cleanup methods when cleaning debris and spills from corporation yard(s) or collection of all wash water and disposing of wash water to sanitary or other location where it does not impact surface or groundwater when wet cleanup methods are used
X	Cover and/or berm outdoor storage areas containing waste pollutants

Comments:

If you have a corporation yard(s) that is not an NOI facility, complete the following table for inspection results for your corporation yard(s) or attach a summary including the following information:

Corporation Yard Name	**Inspection Date** (1x/year required)	**Inspection Findings/Results**	**Follow-up Actions**
Corporation Yard	Nov 7, 2013	Routine inspection, no violations but advised additional sweeping would improve appearance.	Performed additional sweeping
Corporation Yard	Mar 8, 2014	Routine inspection, no violations but advised additional sweeping would improve appearance.	Performed additional sweeping near materials storage area.
Corporation Yard	May 20, 2014	Catch basin (CB) needed cleaning, found some open paint containers	Serviced CB, paint containers covered.
Corporation Yard	May 30, 2014	Follow up inspection, no violations observed.	None required.

Section 3 - Provision C.3 Reporting New Development and Redevelopment

C.3.b.v.(2)(a) ▶ Green Streets Status Report
(All projects to be completed by December 1, 2014)

On an annual basis (if applicable), report on the status of any pilot green street projects within your jurisdiction. For each completed project, report the capital costs, operation and maintenance costs, legal and procedural arrangements in place to address operation and maintenance and its associated costs, and the sustainable landscape measures incorporated in the project including, if relevant, the score from the Bay-Friendly Landscape Scorecard.

Summary:
The C.3 New Development and Redevelopment section of the Countywide program's FY 13-14 Annual Report includes a description of activities conducted at the countywide or regional level.

C.3.b.v.(1) ▶ Regulated Projects Reporting

Fill in attached table **C.3.b.v.(1)** or attach your own table including the same information.

C.3.e.v. ▶ Alternative or In-Lieu Compliance with Provision C.3.c.

(For FY 11-12 Annual Report and each Annual Report thereafter) Is your agency choosing to require 100% LID treatment onsite for all Regulated Projects and not allow alternative compliance under Provision C.3.e.?		**Yes**	X	**No**

Comments (optional):

C.3.e.vi ▶ Special Projects Reporting

1. Has your agency received, but not yet granted final discretionary approval of, a development permit application for a project that has been identified as a potential Special Project based on criteria listed in MRP Provision C.3.e.ii(2) for any of the three categories of Special Projects (Categories A, B or C)?	X	**Yes**		**No**
2. Has your agency granted final discretionary approval of a project identified as a Special Project in the March 15, 2014 report? If yes, include the project in both the C.3.b.v.(1) Table, and the C.3.e.vi. Table.		**Yes**	X	**No**

If you answered "Yes" to either question,

1) Complete Table C.3.e.vi . below.
2) Attach narrative discussion of 100% LID Feasibility or Infeasibility for each project.

C.3.h.iv ▶ Installed Stormwater Treatment Systems Operation and Maintenance Verification Inspection Program Reporting

(1) Fill in attached table **C.3.h.iv.(1)** or attach your own table including the same information.

(2) On an annual basis, provide a discussion of the inspection findings for the year and any common problems encountered with various types of treatment systems and/or HM controls. This discussion should include a general comparison to the inspection findings from the previous year.

Summary:

The City conducted inspections of 3 newly installed facilities (C.3.h.ii.6.a), 3 treatment facilities (C.3.h.ii.6.b), and 2 vault-based systems (C.3.h.ii.6.c). Follow up inspections for two treatment facilities were performed in FY 13-14.

(3) On an annual basis, provide a discussion of the effectiveness of the O&M Program and any proposed changes to improve the O&M Program (e.g., changes in prioritization plan or frequency of O&M inspections, other changes to improve effectiveness program).

Summary:

(4) During the reporting year, did your agency:

• Inspect all newly installed stormwater treatment systems and HM controls within 45 days of installation?	X	**Yes**		**No**		**Not applicable. No new facilities were installed.**
• Inspect at least 20 percent of the total number of installed stormwater treatment systems or HM controls?[3]	X	**Yes**		**No**		**Not applicable. No treatment measures**
• Inspect at least 20 percent of the total number of installed vault-based systems?	X	**Yes**		**No**		**Not applicable. No vault systems.**
If you answered "No" to any of the questions above, please explain:						

C.3.i. ▶ Required Site Design Measures for Small Projects and Detached Single Family Home Projects

On an annual basis, discuss the implementation of the requirements of Provision C.3.i, including ordinance revisions, permit conditions, development of standard specifications and/or guidance materials, and staff training.

Summary:

BASMAA prepared standard specifications in four fact sheets regarding the site design measures listed in Provision C.3.i, as a resource for Permittees. We have modified local ordinances/policies/procedures and forms/checklists to require all applicable projects approved after December 1, 2012 to implement at least one of the site design measures listed in Provision C.3.i. We are using the following products for C.3.i implementation:

- **BASMAA's site design fact sheets**
- **Stormwater checklist –C.3.i Stormwater Requirement Checklist**

[3] If there is only 1 treatment measure in the jurisdiction, the agency must inspect it every year.

C.3.b.v.(1) ► Regulated Projects Reporting Table (part 1) – Projects Approved During the Fiscal Year Reporting Period

Project Name Project No.	Project Location[10], Street Address	Name of Developer	Project Phase No.[11]	Project Type & Description[12]	Project Watershed[13]	Total Site Area (Acres)	Total Area of Land Disturbed (Acres)	Total New Impervious Surface Area (ft²)[14]	Total Replaced Impervious Surface Area (ft²)[15]	Total Pre-Project Impervious Surface Area[16] (ft²)	Total Post-Project Impervious Surface Area[17] (ft²)
Private Projects											
Iceland	East side of Milvia Street between Derby and Ward Streets. 2727 Milvia Street, Berkeley	Sports Basement	NA	Redevelopment of open, pervious space to parking lot and interior remodel of retail space.	Potter	1.86	0.77	13,040	7,390	66,860	79,900
Gilman North	North side of Gilman Street between 9th and 10th Streets. 1011 Gilman Street, Berkeley	Gilman Partners LLC	NA	Redevelopment of retail space. Conversion of 6,150 square feet of building to parking lot, addition of 6,486 square feet second story.	Gilman	1.79	0.27	0	11,800	77,140	77,140
1200 Ashby Avenue	On the Southeast corner of the intersection of San Pablo Avenue and Ashby Avenue. 1200 Ashby Avenue/3015 San Pablo Avenue, Berkeley.	Gerding Edlen	NA	New development of a previously empty lot. Project consists of a zero lot line design four-story structure over one story podium housing a total of 98 apartments.	Potter	0.77	0.77	31,025	0	0	31,025
1935 Addison Street	North side of Addison Street, between Martin Luther King Jr. Way and Milvia Street. 1935 Addison Street,	1935 Addison Street, LLC	NA	Mixed use redevelopment project with 69 units and 7,200 square feet of retail	Strawberry	0.33	0.33	1,192	11,516	11,516	12,708

[10] Include cross streets
[11] If a project is being constructed in phases, indicate the phase number and use a separate row entry for each phase. If not, enter "NA".
[12] Project Type is the type of development (i.e., new and/or redevelopment). Example descriptions of development are: 5-story office building, residential with 160 single-family homes with five 4-story buildings to contain 200 condominiums, 100 unit 2-story shopping mall, mixed use retail and residential development (apartments), industrial warehouse.
[13] State the watershed(s) in which the Regulated Project is located. Downstream watershed(s) may be included, but this is optional.
[14] All impervious surfaces added to any area of the site that was previously existing pervious surface.
[15] All impervious surfaces added to any area of the site that was previously existing impervious surface.
[16] For redevelopment projects, state the pre-project impervious surface area.
[17] For redevelopment projects, state the post-project impervious surface area.

C.3.b.v.(1) ►Regulated Projects Reporting Table (part 1) – Projects Approved During the Fiscal Year Reporting Period

Project Name Project No.	Project Location[10], Street Address	Name of Developer	Project Phase No.[11]	Project Type & Description[12]	Project Watershed[13]	Total Site Area (Acres)	Total Area of Land Disturbed (Acres)	Total New Impervious Surface Area (ft^2)[14]	Total Replaced Impervious Surface Area (ft^2)[15]	Total Pre-Project Impervious Surface Area[16] (ft^2)	Total Post-Project Impervious Surface Area[17] (ft^2)
	Berkeley.			space.							
The New Sequoia	Northwest corner of Telegraph Avenue and Haste Street. 2441 Haste Street, Berkeley.	Roem Development Corporation	NA	Redevelopment to 4-story mixed use residential consisting of 42 units with ground floor restaurant.	Potter	0.36	0.36	12,009	2,911	4,268	14,920

C.3.b.v.(1) ►Regulated Projects Reporting Table (part 2) – Projects Approved During the Fiscal Year Reporting Period (public projects)

Project Name Project No.	Approval Date[30]	Date Construction Scheduled to Begin	Source Control Measures[31]	Site Design Measures[32]	Treatment Systems Approved[33]	Operation & Maintenance Responsibility Mechanism[34]	Hydraulic Sizing Criteria[35]	Alternative Compliance Measures[36/37]	Alternative Certification[38]	HM Controls[39/40]
Public Projects										

Comments:
No public projects approved during the fiscal year reporting period.

[30] For public projects, enter the plans and specifications approval date.
[31] List source control measures approved for the project. Examples include: properly designed trash storage areas; storm drain stenciling or signage; efficient landscape irrigation systems; etc.
[32] List site design measures approved for the project. Examples include: minimize impervious surfaces; conserve natural areas, including existing trees or other vegetation, and soils; construct sidewalks, walkways, and/or patios with permeable surfaces, etc.
[33] List all approved stormwater treatment system(s) to be installed onsite or at a joint stormwater treatment facility (e.g., flow through planter, bioretention facility, infiltration basin, etc.).
[34] List the legal mechanism(s) (e.g., maintenance plan for O&M by public entity, etc...) that have been or will be used to assign responsibility for the maintenance of the post-construction stormwater treatment systems.
[35] See Provision C.3.d.i. "Numeric Sizing Criteria for Stormwater Treatment Systems" for list of hydraulic sizing design criteria. Enter the corresponding provision number of the appropriate criterion (i.e., 1.a., 1.b., 2.a., 2.b., 2.c., or 3).
[36] For Alternative Compliance at an offsite location in accordance with Provision C.3.e.i.(1), on a separate page, give a discussion of the alternative compliance site including the information specified in Provision C.3.b.v.(1)(m)(i) for the offsite project.
[37] For Alternative Compliance by paying in-lieu fees in accordance with Provision C.3.e.i.(2), on a separate page, provide the information specified in Provision C.3.b.v.(1)(m)(ii) for the Regional Project.
[38] Note whether a third party was used to certify the project design complies with Provision C.3.d.
[39] If HM control is not required, state why not.
[40] If HM control is required, state control method used (e.g., method to design and size device(s) or method(s) used to meet the HM Standard, and description of device(s) or method(s) used, such as detention basin(s), biodetention unit(s), regional detention basin, or in-stream control).

C.3.h.iv. ►Table of Installed Stormwater Treatment Systems Operation and Maintenance Verification Inspection Program Reporting

Fill in table below or attach your own table including the same information.

Name of Facility/Site Inspected	Address of Facility/Site Inspected	Newly Installed? (YES/NO)[41]	Party Responsible[42] For Maintenance	Date of Inspection	Type of Inspection[43]	Type of Treatment/HM Control(s) Inspected[44]	Inspection Findings or Results[45]	Enforcement Action Taken[46]	Comments/Follow-up
Gilman North	1011 Gilman Street	Yes	Gilman Partners, LLC	March 18, 2014	45-Day	Bio-swale	Proper Installation	NA	NA
Gilman South	1000 Gilman Street	Yes	Gilman Partners, LLC	April 25, 2014	45-Day	Bio-swale	Proper Installation	NA	NA
The Addison	651 Addison Street	Yes	AVB Southwest Berkeley GP, LLC	June 24, 2014	45-Day	Bio-swale	Proper Installation	NA	NA
Takara Sake	706 Addison Street	No	Takara Sake	June 30, 2014	20% Vault and treatment	Subgrade vault and vegetated swale	Barespots in vegetated swale, vault OK	Verbal warning	Reinspected Jul 21, 2014, barespots corrected
Freight and Salvage	202 Addison Street	No	Freight and Salvage	June 30, 2014	20% Treatment	Living roof and screens	No problems	NA	NA
McDonald's	1198 San Pablo Ave.	No	McDonald's	June 30, 2014	20% Treatment	Screens and vegetated swale	Barespots and rodent holes in vegetated swale, screens OK	Verbal warning	Reinspected on July 21, 2014, barespots and rodent holes corrected.
Berkeley Bowl	920 Heinz Ave.	No	Berkeley Bowl	June 30, 2014	20% Vault Based	Subgrade vault	No problems	NA	NA

[41] Indicate "YES" if the facility was installed within the reporting period, or "NO" if installed during a previous fiscal year.
[42] State the responsible operator for installed stormwater treatment systems and HM controls.
[43] State the type of inspection (e.g., 45-day, routine or scheduled, follow-up, etc.).
[44] State the type(s) of treatment systems inspected (e.g., bioretention facility, flow-through planter, infiltration basin, etc...) and the type(s) of HM controls inspected, and indicate whether the treatment system is an onsite, joint, or offsite system.
[45] State the inspection findings or results (e.g., proper installation, improper installation, proper O&M, immediate maintenance needed, etc.).
[46] State the enforcement action(s) taken, if any.

C.3.e.vi Special Projects Reporting Table

Reporting Period – January 1 – June 30, 2013

Project Name & No.	Permittee	Address	Application Submittal Date[47]	Status[48]	Description[49]	Site Total Acreage	Density DU/Acre	Density FAR	Special Project Category[50]	LID Treatment Reduction Credit Available[51]	List of LID Stormwater Treatment Systems[52]	List of Non-LID Stormwater Treatment Systems[53]
									Category A: Category B: Category C: Location: Density: Parking:	Category A: Category B: Category C: Location: Density: Parking:	Indicate each type of LID treatment system and the percentage of total runoff treated	Indicate each type of non-LID treatment system and the percentage of total runoff treated. Indicate whether minimum design criteria met or certification received
The Aquatic	City of Berkeley	800 University	September 1, 2013	Final discretionary approval granted on September 1, 2013. Reporting from approved Building	The Aquatic is a redevelopment project located on the Southeast corner of University Avenue and 5th Street. Narrative Discussion of LID Feasibility or Infeasibility

The Aquatic

1. Feasibility/Infeasibility of Onsite Infiltration, Evapotranspiration, and Harvesting/Use

The Countywide Program's infiltration/harvesting and use feasibility screening worksheet and rainwater harvesting and use worksheet were completed for the project. The results of this analysis showed that it was infeasible to treat the C.3.d amount of runoff with infiltration and/or harvesting and use.

2. Feasibility/Infeasibility of Onsite LID Treatment

The project site was reviewed with regard to the feasibility and infeasibility of LID onsite treatment. The results of this review showed that it was infeasible to treat 31 percent of the C.3.d amount of runoff with LID treatment. The findings of this review are presented below.

a. **On-site Drainage Conditions.** The Aquatic is a five story mixed use residential building with 22 surface parking spots. The site previously consisted of a one story commercial building covering approximately 100% of the site and is relatively flat. The project's stormwater runoff is split between five drainage management areas with individual treatment facilities. Drainage Management Area A includes the fourth level roof, the fifth level roof, and a portion of the upper roof. Drainage Management Area B consists of a portion of the upper roof. Drainage Management Area C consists of a large portion of the upper level roof, all overhanging bay windows, and a deck at the fifth level. Drainage Management Area D consists of the remaining deck square footage at the fifth level. Drainage Management E consists of the new parking lot and existing driveway and will be treated with non-LID treatment.

b. **Self-treating and Self-Retaining Areas and LID Treatment Measures.** Treatment Facility A is bioretention planter and located on the second floor podium deck and provides treatment for Drainage Management Area A. Treatment Facility B is bioretention planter, also located on the second floor podium deck, and provides treatment for Drainage Management Area B. Treatment Facility C is bioretention planter and is located on the ground floor and provides treatment for Drainage Management Area C. Treatment Facility D is bioretention planter, also located on the ground floor, and provides treatment for Drainage Management Area D. A self-retaining landscaped area is proposed at the rear of the building and will be treating an adjacent walkway.

c. **Maximizing Flow to LID Features and Facilities.** All roof areas have been direct to LID treatment facilities. The only portion of the site being treated by non-LID facilities is Drainage Management Area E, the new parking lot and existing driveway. The constraints in treating these areas are described below.

d. **Constraints to Providing On-site LID.** The drainage management areas that are proposed to drain to vault-based high flow rate media filters include areas that are not covered by buildings. Primarily, the new parking lot and existing driveway are being treated by a Contech Model MHSF48 media filter unit. In these areas, conditions and technical constraints are present that preclude the use of LID features and facilities, as described below.

   i. Impervious paved areas: Based on the number of required guest parking and grading requirements it is not possible to place an at grade bio-retention area capable of treating the required C.3 amount of runoff. Pervious paving was considered for use in these areas. However, a review or the soils report by Rockridge Geotechnical, indicates that in test borings groundwater was encountered at a depth of 3.8 feet below grade.

   ii. Landscaped areas: There is a landscape area at the southwest corner of the guest parking area; however, based on the required number of guest parking spaces it is not of sufficient size to treat the parking area. Additionally, site grading constraints would prevent the parking area to be graded to collect runoff at this location. Based on the required width of paved area required for access in the rear alleyway and provisions for accessing existing buildings on the neighboring properties, it is also infeasible to provide a bio-retention area to treat runoff from the access roadway.

3. **Feasibility/Infeasibility of Off-Site LID Treatment.** The possibility of providing off-site LID treatment was found to be infeasible for the following reasons.

   i. The developer of The Aquatic at 800 University does not own or control land within the same watershed of the project.

   ii. There is no regional LID stormwater mitigation program available to the project for in-lieu C.3 compliance.

Narrative Discussion of LID Feasibility or Infeasibility

Acheson Commons (West)

1. **Feasibility/Infeasibility of Onsite Infiltration, Evapotranspiration, and Harvesting/Use**

   The Countywide Program's infiltration/harvesting and use feasibility screening worksheet and rainwater harvesting and use worksheet were completed for the project. The results of this analysis showed that it was infeasible to treat the entire C.3.d amount of runoff with infiltration and/or harvesting and use.

2. **Feasibility/Infeasibility of Onsite LID Treatment**

   The project site was reviewed with regard to the feasibility and infeasibility of LID onsite treatment. The results of this review showed that it was infeasible to treat 85 percent of the C.3.d amount of runoff with LID treatment. The findings of this review are presented below.

   a. **On-site Drainage Conditions.** The historic McFarlane Building is located at this site. The Berkeley Historical Commission requires that The MacFarlane Building façade be preserved. The MacFarlane Building will have its historic façade along University Avenue and Shattuck Avenue retained and rehabilitated and vertically expanded to be a six-story, mixed-use building. The building's roof and podium area is split between three drainage management areas with individual treatment facilities.

   b. **Self-treating and Self-Retaining Areas and LID Treatment Measures.** Approximately 694 square feet of roof/podium runoff will be directed to 824-square feet of self-retaining area. 544-square feet of planter pots on the podium will act as self-treating areas.

   c. **Maximizing Flow to LID Features and Facilities.** Due to the constraints of maintaining the historical façade of the existing building, self treating and self retaining areas were provided where area was available.

   d. **Constraints to Providing On-site LID.** Due to the required preservation of the façade, the existing zero lot line condition of the building must remain. Because this is a zero lot line building and in order to minimize impact to the usable area of the podium, the exclusive use of LID treatment for the MacFarlane Building is not feasible. Therefore a high rate media filter is necessary to treat the remaining 9,364 square feet of storm water runoff.

      Additionally, the parcel is located in an area with a low saturated hydraulic conductivity rate (0.5-0.7 inches/hour, per Appendix I of the Alameda County Clean Water Program C.3 Technical Guidance) and existing site conditions experience high groundwater (8'-19' below ground surface, bgs, per the Geotechnical Report, dated April 14, 2014) making treatment by infiltration infeasible.

3. **Feasibility/Infeasibility of Off-Site LID Treatment.** The possibility of providing off-site LID treatment was found to be infeasible for the following reasons.

   i. There is a nearby parcel in the same watershed being developed in conjunction with Acheson Commons (West); however, this parcel is separated from this project by a University of California owned property and is located upstream of Acheson Commons (West).

   ii. There is no regional LID stormwater mitigation program available to the project for in-lieu C.3 compliance.

Narrative Discussion of LID Feasibility or Infeasibility

Acheson Commons (East)

1. **Feasibility/Infeasibility of Onsite Infiltration, Evapotranspiration, and Harvesting/Use**

   The Countywide Program's infiltration/harvesting and use feasibility screening worksheet and rainwater harvesting and use worksheet were completed for the project. The results of this analysis showed that it was infeasible to treat the C.3.d amount of runoff with infiltration and/or harvesting and use.

2. **Feasibility/Infeasibility of Onsite LID Treatment**

   The project site was reviewed with regard to the feasibility and infeasibility of LID onsite treatment. The results of this review showed that it was infeasible to treat 85 percent of the C.3.d amount of runoff with LID treatment. The findings of this review are presented below.

   a. **On-site Drainage Conditions.** The East Parcel of the Acheson Commons project consists of one new building, one repurposed building, and one existing building. The Walnut Building is a new six-story, residential building with at-grade and below grade parking. The building consists of three drainage management areas, two of which are routed to separate treatment measures and one routed to the non-LID feature also shared with the other buildings.

      The Ace Building is an existing building that will have its historic façade along University Avenue and Walnut Street retained and rehabilitated and will be repurposed to be a six-story, mixed-use building. The building has been split into four drainage management areas, three of which are routed to separate treatment measures, and one routed to the non-LID feature also shared with the other buildings.

      The Acheson Building is an existing four-story, zero lot line, historic building that will be retained in its entirety and only the interior will be remodeled. The building consists of one drainage management area and will be routed to the shared non-LID treatment measure.

   b. **Self-treating and Self-Retaining Areas and LID Treatment Measures.** Approximately 1,071 square feet of roof/podium of the Walnut Building runoff will be directed to the 550-square feet of self-retaining area and 68-square feet of at-grade planters will act as self-treating areas.

      Approximately 1,192 square feet of roof/podium of the Ace Building runoff will be directed to a 596-square feet of self-retaining area. 266-square feet of planter pots on the podium and 1,363-square feet of courtyard landscaping will act as self-treating areas.

   c. **Maximizing Flow to LID Features and Facilities.** Due to the constraints stated below and accounting for the structural weight limitations of the existing building, self-treating and self-retaining areas were provided where feasible and where area was available. Per the 2:1 treatment ratio stated in the Alameda County Clean Water Program C.3 Stromwater Technical Guidance (dated May 14, 2013), roof/podium areas draining to the self-retaining areas were maximized to the extent possible.

   d. **Constraints to Providing On-site LID.** The drainage management areas that are proposed to drain to vault-based high flow rate media filters include some areas that are not covered by buildings. The areas include the courtyard area and the Walnut Building entryway. Located in the courtyard are self-treating features such as landscaped terraced planters and a flush at-grade landscape area with a fountain located in the courtyard. Additionally, along the entryway of the Walnut Building are planters. In these areas, conditions and technical constraints are present that preclude the use of LID features and facilities, as described below.

      i. The site provides a courtyard area for resident accessibility, which limits the type of hardscape surface we can specify, and also limits the amount of area that can be dedicated to landscape. The impervious paved areas within the courtyard are primarily for ADA accessibility and trash container routing from the Acheson Building through the Walnut Building Garage. The runoff from the courtyard area drains to landscaped areas and/or through the vault-based media filter system located in the courtyard below grade. The Walnut Building entryway area is graded to drain into trench drain that is also routed for treatment through the same media filter system.

ii. Landscaped areas:

- Because the majority of the East Parcel consists of multi-story, zero lot line buildings, which limit the type of LID treatment facilities that can be specified to reduce the storm water runoff, and also limits the amount of area that can be dedicated to landscape, the exclusive use of LID treatment for the East Parcel is not feasible. The historic buildings and facades along University Avenue, and extending around Walnut Street will be retained and rehabilitated, creating challenges in retrofitting existing structures and limiting any treatment from occurring along the project frontage.
- Additionally, the parcel is located in an area with a low saturated hydraulic conductivity rate (0.5-0.7 inches/hour, per Appendix I of the Alameda County Clean Water Program C.3 Technical Guidance) and existing site conditions experience high groundwater (8'-19' below ground surface, bgs, per the Geotechnical Report, dated April 14, 2014) making treatment by infiltration infeasible.

3. **Feasibility/Infeasibility of Off-Site LID Treatment.** The possibility of providing off-site LID treatment was found to be infeasible for the following reasons.

   i. There is a nearby parcel in the same watershed being developed in conjunction with Acheson Commons (East); however, this parcel is separated from this project by a University of California. This neighboring site is proposing 85% non-LID treatment and does not have sufficient size to accommodate bioretention facilities to treat runoff from an additional site.

   ii. There is no regional LID stormwater mitigation program available to the project for in-lieu C.3 compliance.

Narrative Discussion of LID Feasibility or Infeasibility

Parker Place (North)

1. **Feasibility/Infeasibility of Onsite Infiltration, Evapotranspiration, and Harvesting/Use**

   The Countywide Program's infiltration/harvesting and use feasibility screening worksheet and rainwater harvesting and use worksheet were completed for the project. The results of this analysis showed that it was infeasible to treat the C.3.d amount of runoff with infiltration and/or harvesting and use.

2. **Feasibility/Infeasibility of Onsite LID Treatment**

   The project site was reviewed with regard to the feasibility and infeasibility of LID onsite treatment. The results of this review showed that it was infeasible to treat 43 percent of the C.3.d amount of runoff with LID treatment. The findings of this review are presented below.

   a. **On-site Drainage Conditions.** The project is divided into eight drainage management areas. Drainage management areas one though three consist mainly of roof areas of the townhomes, a portion of the mixed use development rood, and some sidewalk areas. Drainage management area four consists of the majority of the mixed use development roof and some sidewalk areas. Drainage management areas five through eight consist of sidewalk areas. The site is relatively flat and slopes from north to south.

   b. **Self-treating and Self-Retaining Areas and LID Treatment Measures.** Drainage management areas one though three will be treated by three separate bioretention facilities. Drainage management areas five through eight will all be treated by pervious pavement and landscaped self retaining areas. The common courtyard within the mixed use development area will be fitted with pervious pavers.

   c. **Maximizing Flow to LID Features and Facilities.** Where area was available, LID treatment was provided. The less dense townhouse development area provides 100% LID treatment; however, a media filter was required for majority of the runoff from the mixed-use development due to below site constraints.

   d. **Constraints to Providing On-site LID.** The drainage management areas that are proposed to drain to a vault-based high flow rate media filter include some areas that are not covered by buildings. These areas include an interior courtyard and walkways as well as landscaped areas on the north and south side of the mixed use building. In these areas, conditions and technical constraints are present that preclude the use of LID features and facilities, as described below.

      i. Impervious paved areas: There are no impervious paved areas draining to the non-LID treatment measure proposed. The common courtyard is fitted with pervious pavers and will act as a self treating area.

      ii. Landscaped areas: The landscaped areas on the north and south side of the mixed use building are too small to accommodate biotreatment facilities that meet sizing requirements for the runoff from the building.

3. **Feasibility/Infeasibility of Off-Site LID Treatment.** The possibility of providing off-site LID treatment was found to be infeasible for the following reasons.

   i. The project proponent owns additional property at 2600 Shattuck Avenue, across Parker Street from this project. This neighboring site is proposing 100% non-LID treatment and does not have sufficient size to accommodate bioretention facilities to treat runoff from an additional site.

   ii. There is no municipal or regional storm water treatment facility that discharges into the same watershed as this project.

Narrative Discussion of LID Feasibility or Infeasibility

Parker Place (South)

1. **Feasibility/Infeasibility of Onsite Infiltration, Evapotranspiration, and Harvesting/Use**

   The Countywide Program's infiltration/harvesting and use feasibility screening worksheet and rainwater harvesting and use worksheet were completed for the project. The results of this analysis showed that it was infeasible to treat the C.3.d amount of runoff with infiltration and/or harvesting and use.

2. **Feasibility/Infeasibility of Onsite LID Treatment**

   The project site was reviewed with regard to the feasibility and infeasibility of LID onsite treatment. The results of this review showed that it was infeasible to treat 100 percent of the C.3.d amount of runoff with LID treatment. The findings of this review are presented below.

   a. **On-site Drainage Conditions.** The entire project, including all podium and hardscape/landscape areas are treated via one mechanical treatment device and discharged via one point of connection on Shattuck Avenue.

   b. **Self-treating and Self-Retaining Areas and LID Treatment Measures.** Two courtyards and walkways will be fitted with pervious pavers and act as a self-treating area.

   c. **Constraints to Providing On-site LID.** Due to a City of Berkeley requirement to keep existing building façade, which sits along the back of walk/property line along Shattuck Avenue, Carleton Street and Parker Street, the total building coverage is 88% of the site. The drainage management areas that are proposed to drain to the vault-based high flow rate media filters include some areas that are not covered by buildings. These areas include two 797 square foot courtyards in the center of the site fitted with pervious pavers, walkways for residents also fitted with pervious pavers, and a 13-15 foot strip of area on the west side of the property consisting of planters and walkways. In these areas, conditions and technical constraints are present that preclude the use of LID features and facilities, as described below.

      i. Impervious paved areas: The only impervious paved areas receiving treatment are located on the western edge of the property which serves as the fire access point for the building. This area would not be large enough to provide adequate treatment as well as access for the Fire Department in the event of an emergency.

      ii. Landscaped areas: The only area available for landscaping also exists on the western edge of the property. This area has been kept small due to the fire access requirements. In addition, the Planning Department has required trees within this planter to shield the project from the adjacent R-2A zoning district. The landscape required for shielding is not compatible with a bioretention area.

3. **Feasibility/Infeasibility of Off-Site LID Treatment.** The possibility of providing off-site LID treatment was found to be infeasible for the following reasons.

   i. The project proponent owns additional property at 2598 Shattuck Avenue. This parcel is located across Parker Street and upslope of this site. In addition, this parcel is not large enough to accommodate bioretention facilities for itself, as well as a neighboring site.

   ii. There is no municipal or regional storm water treatment facility that discharges into the same watershed as this project.

Narrative Discussion of LID Feasibility or Infeasibility

2107 Dwight Way

1. **Feasibility/Infeasibility of Onsite Infiltration, Evapotranspiration, and Harvesting/Use**

   The Countywide Program's Rainwater Harvesting and Use Feasibility Worksheet was completed for the project. The results of this analysis showed that it was infeasible to treat the C.3.d amount of runoff with infiltration and rainwater harvesting.

2. **Feasibility/Infeasibility of Onsite LID Treatment**

   The project site was reviewed with regard to the feasibility and infeasibility of LID onsite treatment. The results of this review showed that it was feasible to treat 25% of the C.3.d amount of runoff with LID treatment. The findings of this review are presented below.

   a. **On-site Drainage Conditions.** The proposed building covers over 85% of the project site with a small open space on the east side of the site. The northeastern corner of the site is at an elevation of 180.5 and the southwestern corner of the site is 169.2. The length of the site is approximately 245, which puts the overall site slope at 4.6%. Approximately 3,225 square feet of roof area will drain to bioretention area and the majority of the roof area is treated by a vault-based high flow rate media filter. The open space on the eastern side of the property is approximately half landscaped area. Any hardscape in the open space that can be drained to a bioretention area is treated through the bioretention areas and all other walkway areas are treated through the vault-based media filter.

   b. **Self-treating and Self-Retaining Areas and LID Treatment Measures.** The project currently includes 2,922 square feet of landscape area considered to be self-treating. In addition, there is 129 square feet of bioretention area, which treats 3,225 square feet of roof area.

   c. **Maximizing Flow to LID Features and Facilities.** The bioretention areas were placed directly adjacent to the proposed building in order to maximize treatment of the roof area. The proposed building covers over 85% of the side with a small open space area. The open space area includes 945 square feet of planting and any impervious areas will be treated by a stormwater filtration system at the garage level within the building.

   d. **Constraints to Providing On-site LID.** The drainage management areas that are proposed to drain to tree-box type high flow rate biofilters and/or vault-based high flow rate media filters include some areas that are not covered by buildings. The open space at ground level will be treated by means of a vault-based high flow rate media filter. In these areas, conditions and technical constraints are present that preclude the use of LID features and facilities, as described below.

      i. Impervious paved areas: All impervious areas within the ground level open space can be credited to walkways. Part of these walkways will be directed towards the at grade bioretention area. All other walkway areas that cannot be graded to drain to the bioretention area will be treated by a vault-based high flow rate media filter.

      ii. Landscaped areas:

         - Lack of head or routing path to move collected runoff to the landscaped area or from the landscaped area to a disposal point;

            - Impervious areas (walkways) at ground level will be directed to bioretention areas where possible. The open space on-site is a long and narrow area, which makes it difficult to grade all walkways towards the bioretention areas and maintain accessibility.

3. **Feasibility/Infeasibility of Off-Site LID Treatment.** The possibility of providing off-site LID treatment was found to be infeasible for the following reasons.

   i. The project proponent does not own or otherwise control land within the same watershed of the project that can accommodate in perpetuity off-site bioretention facilities adequately sized to treat runoff from this primary project. This project is located in an urban environment with little to no open space available for treatment.

   ii. There is no regional LID stormwater mitigation program available for in-lieu C.3 compliance.

Section 4 – Provision C.4 Industrial and Commercial Site Controls

Program Highlights

Provide background information, highlights, trends, etc.

See Section C.4 – Industrial and Commercial Site Control – of the ACCWP FY 13-14 Annual Report for a summary of Program activities.

In FY13/14 Industrial and Commercial facility inspections were performed by the Planning Department, Toxics Management Division (TMD) and by the Department of Health and Human Services, Environmental Health Division (EH) inspectors. EH inspected food service and restaurant businesses, including mobile food services. TMD inspected commercial/industrial businesses associated with regulated industrial activity and hazardous materials use.

TMD conducted 148 inspections at 134 regulated Industrial/commercial businesses in FY13/14. TMD maintained an inventory of 391 Industrial businesses in the I/IDC inspection program. Fifteen potential new businesses were inspected, resulting in an increased inventory of 14 new businesses compared to FY12-13. Eight businesses were closed. EH conducted 174 facility inspections at food service and restaurant businesses.

All businesses prioritized for inspection in FY 13/14 were inspected. Two businesses were added to the priority inspection list as a result of their lack of BMPs or violations noted during routine or complaint inspections. TMD will begin FY 14/15 with an inventory of 391 regulated businesses.

The commercial/industrial facility inspections identified one actual discharge violation and 18 potential discharge violations. All violations were reported as corrected within 10 business days or in an otherwise timely manner. Enforcement actions resulted in 19 enforcement actions.

C.4.b.i. ► Business Inspection Plan

Do you have a Business Inspection Plan?	X	Yes		No

If No, explain:

C.4.b.iii.(1) ► Potential Facilities List

List below or attach your list of industrial and commercial facilities in your Inspection Plan to inspect that could reasonably be considered to cause or contribute to pollution of stormwater runoff.

Attachment A-1, Facilities List - TMD (Commercial and Industrial)
Attachment A-2, Facilities List - EH (Restaurant and Food Service)

C.4.b.iii.(2) ► Facilities Scheduled for Inspection

List below or attach your list of facilities scheduled for inspection during the current fiscal year.

Attachment B-1, Scheduled for Inspection, TMD (Commercial and Industrial)
Attachment B-2, Scheduled for Inspection, EH (Restaurant and Food Service)

C.4.c.iii.(1) ► Facility Inspections

Fill out the following table or attach a summary of the following information. Indicate your violation reporting methodology below.

X	Permittee reports multiple discrete violations on a site as one violation.
	Permittee reports the total number of discrete violations on each site.

	Number	Percent
Number of businesses inspected	308	
Total number of inspections conducted	324	
Number of violations (excluding verbal warnings)	27	
Sites inspected in violation	19	6%
Violations resolved within 10 working days or otherwise deemed resolved in a longer but still timely manner	19	100%

Comments:

TMD

Multiple discrete violations on a site are recorded as one violation. TMD issued 17 written warnings for BMP violations observed during scheduled routine inspections. TMD observed no non-stormwater discharges during any of the scheduled inspections. All other violations were corrected in a timely manner.

TMD also conducted five unscheduled complaint investigations at existing facilities. Two facilities were issued a Notice to Comply and were required to implement new and/or maintain existing BMPs. These facilities were subsequently inspected to confirm compliance and found all violations responded to in a timely manner. These businesses were included in TMD's High Priority inspection list for FY14/15 in accordance with provisions of the Business Inspection Plan. All businesses issued a Notice to Comply corrected violations in a timely manner.

EH

EH observed no non-stormwater discharges during any of the scheduled inspections; however, 15 verbal warnings were given and corrected on site.

C.4.c.iii.(2) ▶ Frequency and Types/Categories of Violations Observed

Fill out the following table or attach a summary of the following information.

Type/Category of Violations Observed	Number of Violations
Actual discharge (e.g. active non-stormwater discharge or clear evidence of a recent discharge)	1
Potential discharge and other	34

Comments:
Number of violations at a facility is reported as one violation. 39 violations were issued for lack of BMPs to prevent discharges. One discharge was observed at facilities observed with BMP violations. The discharge consisted of gravel and organic landscaping materials as a result of inadequate BMPs at the point of egress. The facility implemented sweeping and improved egress control to prevent recurrence and was completed in a timely manner. This dry-season violation did not enter a waterway and was contained within the street and gutter.

C.4.c.iii.(2) ▶ Frequency and Type of Enforcement Conducted

Fill out the following table or attach a summary of the following information.

	Enforcement Action (as listed in ERP)[48]	Number of Enforcement Actions Taken	% of Enforcement Actions Taken[49]
Level 1	Verbal Notice	20	51%
Level 2	Written Warning/Notice of Violation	17	44%
Level 3	Notice to Comply	2	5%
Level 4	Legal Action	0	0%
Total		39	100%

[48] Agencies to list specific enforcement actions as defined in their ERPs.
[49] Percentage calculated as number of each type of enforcement action divided by the total number of enforcement actions.

C.4.c.iii.(3) ▶ Types of Violations Noted by Business Category

Fill out the following table or attach a summary of the following information.

Business Category[50]	Number of Actual Discharge Violations	Number of Potential/Other Discharge Violations
Auto Repair/Service & Auto Miscellaneous	0	7
Industrial	0	2
Laboratory	0	1
Machine Shop	0	1
Manufacturing	0	4
Miscellaneous	0	1
NOI Facilities	0	1
Printing	0	1
Retail Food Services	0	1
Retail/Wholesale	0	4
Waste Related	0	1
Restaurant and Food Services (verbal only)	0	15
Other Categories	0	0

C.4.c.iii.(4) ▶ Non-Filers

List below or attach a list of the facilities required to have coverage under the Industrial General Permit but have not filed for coverage:

One metal recycling business, RAS Metals, as subject to NOI filing under the Industrial General General Permit. No other businesses were identified as requiring coverage.

C.4.d.iii ▶ Staff Training Summary

Training Name	Training Dates	Topics Covered	No. of Inspectors in Attendance	Percent of Inspectors in Attendance
ACCWP Stormwater Business Inspectors Workshop: Enforcement	November 14, 2013	• Using the Enforcement Response Plan • Enforcement Case Scenarios • BMPs for Businesses	8	100% TMD and EH Inspectors

[50] List your Program's standard business categories.

Tools		• Controlling Pre-production Plastics		
Industrial General Permit Provisions(TMD)	February 14, 2014	New Industrial General Permit issues Qualified Stormwater Practitioner, QSP	1	25% TMD Inspectors
Enforcement Response Plan (TMD)	September 5, 2013	Enforcement Response Plan revisions/applications Enforcement Actions and Escalation to TMD	4 TMD	100% TMD Inspectors

Section 5 – Provision C.5 Illicit Discharge Detection and Elimination

Program Highlights

Provide background information, highlights, trends, etc.

See Section C.5 – Illicit Discharge Detection and Elimination – of the ACCWP FY 13-14 Annual Report for a summary of Program activities.
Ten screening points for Runoff Screening were surveyed in December 2013.

The City responded to 40 reports or complaints of non-stormwater discharges. Approximately half of the referrals were generated from other City of Berkeley personnel. Two were referred from outside agencies. 13 discharges were reported as entering the stormdrain. 14 reported discharges were reported as not entering the stormdrain. 13 reported no potential non-stormwater discharge during investigation. All reported discharges were resolved in a timely manner.

City staff attended all I&IDC subcommittee meetings during FY 13/14.

C.5.c.iii ►Complaint and Spill Response Phone Number and Spill Contact List

List below or attach your complaint and spill response phone number and spill contact list.

Contact	Description	Phone Number
(Response Matrix Attached, Attachment C)		

C.5.d.iii ►Evaluation of Mobile Business Program

Describe implementation of minimum standards and BMPs for mobile businesses and your enforcement strategy. This may include participation in the BASMAA Mobile Surface Cleaners regional program or local activities.

Description:
See Section C.5 – Illicit Discharge Detection and Elimination – of the ACCWP FY 13-14 Annual Report for a summary of related Program and BASMAA activities.
The City responds to all complaints and follows-up when observations of illicit discharges from mobile businesses are reported. Violators are prioritized for inspection in accordance with the Enforcement Response Plan and Business Inspection Plan. Mobile food service businesses are required to have business licenses to conduct business in Berkeley. 32 mobile food service businesses were inspected in FY 13/14.

Washwaters from services provided by a business improvement program were again identified as lacking appropriate BMPs. The business voluntarily curtailed operations due to equipment problems and recent emergency water conservation regulations issued by the State. The Business is currently revising their mobile cleaning operations to a recirculating system to reduce water use and potential pollutant discharge. This

business remains in the High Priority for reinspection due to compliance issues.

City employees engaged in surface cleaning are instructed in the use of appropriate BMPs.

C.5.e.iii ▶ Evaluation of Collection System Screening Program

Provide a summary or attach a summary of your collection screening program, a summary of problems found during collection system screening and any changes to the screening program this FY.

Description:

City staff screen for evidence of illicit discharges or dumping during regular maintenance activities and routine business inspections. Incidents identified during these operations are referred to the appropriate agency in accordance with the Illicit Discharge Response Matrix, Attachment C. 10 Collection System Screening locations were surveyed in FY13/14. The screening points were surveyed in December 2013 and the results of the screening were unremarkable with no observed potential discharge concerns.

C.5.f.iii.(1), (2), (3) ▶ Spill and Discharge Complaint Tracking

Spill and Discharge Complaint Tracking (fill out the following table or include an attachment of the following information)

	Number	Percentage
Discharges reported (C.5.f.iii.(1))	40	
Discharges reaching storm drains and/or receiving waters (C.5.f.iii.(2))	13	32%
Discharges resolved in a timely manner (C.5.f.iii.(3))	40	100%

Comments:

Complaint Response Data for FY 13-14 is included at Attachment D.

C.5.f.iii.(4) ▶ Summary of major types of discharges and complaints

Provide a narrative or attach a table and/or graph.

The City of Berkeley responded to 40 complaints of illicit discharges. Attachment E provides summary details of the complaint, Investigation, and enforcement actions taken for each response. The City investigated 19 reports made by City staff. 19 Complaints were received from the public. Two reports were made from other agencies.

Discharges to the street, gutter, underground, or surface waters are reported as entering the storm drain system. When potential discharges are observed, but not entering the stormdrain system, these are reported as nothing found to abate. Thirteen complaint investigations found nothing entering the stormdrain system. Fourteen were reported as nothing found to abate. The remaining 13 were incidents where there was no

pollutant threat or actual discharge observed during the investigation.

Ten verbal and 16 written notices of violation were issued with no penalty. Two Notices to Comply were issued to two Berkeley Businesses. Legal Action was taken against one Berkeley Business resulting in administrative penalties.

All responses to complaints of illicit discharge were resolved in a timely manner, typically within 24 hours or during the inspection.

SHEET 1 OF 2

City of Berkeley
Spill Response Matrix for Internal City Use

HAZMAT AGENCIES FOR NOTIFICATION & RESPONSE:

All chemical releases or threatened releases are reported to Berkeley Fire HazMat as First Responder.

State Codes require the responsible party to report to the following agencies (Cal Health & Safety Code §25510):

a. California Office of Emergency Services (CalOES) – 916 845 8911 or 800 852 7550
CalOES will inform all other agencies

b. Toxics Management Division 510 981 7460 or Direct Line after 5pm

In addition to BFD HazMat, CalOES and TMD and other City responders, you may need assistance from some of these agencies:

CalOES: Fuel spills >40 gallons or other chemicals spilled and impact environment (ex. creek, or stormwater) - 916 262 1621
CalOES & Toxics Management need following information:
Responder Contact Info, Spill Location & Time, Waters Impacts, Responsible Party ID and Contact, Chemical ID Quantity Released,
Medical waste: needles, body parts etc - California Department of Health Services (CalDPH) 916 449 5671
Pesticides: Alameda County Agricultural Commissioner 8:30am - 4:30pm. 510 670 5232.
Radioactive spills: CalDPH – 800 752 7550
Coastline & Bay: Coast Guard National Response Center 800 424 8802, East Bay Regional Parks District (EBRPD) 510 881 1121
Nuisance Odors: If not a chemical spill – Bay Area Air Quality Management District (BAAQMD) 800 334 6367
Radioactive: CalDPH - 800 752 7550

Call City 911 Dispatch if you need to mobilize BPD, BFD etc
Call Direct Line DL (510) 649 5600 if you need to mobilize PW, PRW, EH, TMD.
DL will ask for your department ID: PW = 5892. PRW = 5893. EH = 6280. TMD = 5758

Matrix based on HazMat Response matrix 1996. Adopted 2009: amended 05/11, 09/12, 8/13, 6/14.

Summary Discharge Information

Number of discharges reported	40
Number of discharges reaching storm drains and/or receiving waters	13
Number of discharges resolved in a timely manner	40
Percentage of discharges resolved in a timely manner	100%

Summary of Types of Pollutants Discharged

	Washwater	Sewage	Const. Mat.	Vehicle Fluids	Food Wastes	Paint	Sed./Silt	Ind. Wastes	Litter/Debris	Other	Total
Number	10	1	10	6	2	2	4	0	2	2	39
Percentage	26%	3%	26%	15%	5%	5%	10%	0%	5%	5%	100%

Summary of Sources of Complaints

	Public	Another Public Agency	Own Public Agency	Total
Number	19	2	19	40
Percentage	48%	5%	48%	100%

Section 6 – Provision C.6 Construction Site Controls

C.6.e.iii.1.a, b, c ►Site/Inspection Totals

Number of High Priority Sites (sites disturbing < 1 acre of soil requiring storm water runoff quality inspection) (C.6.e.iii.1.a)	Number of sites disturbing ≥ 1 acre of soil (C.6.e.iii.1.b)	Total number of storm water runoff quality inspections conducted (include only High Priority Site and sites disturbing 1 acre or more) (C.6.e.iii.1.c)
8	1	41

Comments:
The City performed an additional 44 inspections at 31 sites that are not within the above categories. These inspections were conducted to ensure all Public Works inspectors are participating in the inspections.

C.6.e.iii.1.d ►Construction Activities Storm Water Violations

BMP Category	Number of Violations[51] excluding Verbal Warnings	% of Total Violations[52]
Erosion Control		
Run-on and Run-off Control		
Sediment Control	2	100%
Active Treatment Systems		
Good Site Management		
Non Stormwater Management		
Total[53]	**2**	**100%**

[51] Count one violation in a category for each site and inspection regardless of how many violations/problems occurred in the BMP category. For example, if during one inspection at a site, there are 2 erosion control violations, only 1 violation would be counted for this table.

[52] Percentage calculated as number of violations in each category divided by total number of violations in all six categories.

[53] The total number of violations may count more than one violation per inspection, since some inspections may result in violations in more than one category. For example, during one inspection of a site, there may have been both an erosion control violation and a sediment control violation. For this reason, the total number of violations in this table may not match the total number of enforcement actions reported in Table C6.e.iii.1.e.

C.6.e.iii.1.e ▶ Construction Related Storm Water Enforcement Actions

	Enforcement Action (as listed in ERP)[54]	Number Enforcement Actions Issued	% Enforcement Actionsissued[55]
Level 1[56]		1	33%
Level 2		2	67%
Level 3			
Level 4			
Total		**3**	**100%**

C.6.e.iii.1.f, g ▶ Illicit Discharges

	Number
Number of illicit discharges, actual and those inferred through evidence at high priority sites and sites that disturb 1 acre or more of land (C.6.e.iii.1.f)	0
Number of sites with discharges, actual and those inferred through evidence at high priority sites and sites that disturb 1 acre or more of land (C.6.e.iii.1.g)	0

[54] Agencies should list the specific enforcement actions as defined in their ERPs.
[55] Percentage calculated as number of each type of enforcement action divided by the total number of enforcement actions.
[56] For example, Enforcement Level 1 may be Verbal Warning.

C.6.e.iii.1.h, i ▶ Violation Correction Times

	Number	Percent
Violations (excluding verbal warnings) fully corrected within 10 business days after violations are discovered or otherwise considered corrected in a timely period (C.6.e.iii.1.h)	2	100%[57]
Violations (excluding verbal warnings) not fully corrected within 30 days after violations are discovered (C.6.e.iii.1.i)	0	0%[58]
Total number of violations (excluding verbal warnings) for the reporting year[59]	2	100%
Comments: All violations were corrected within 10 business days or otherwise considered corrected in a timely manner.		

C.6.e.iii.(2) ▶ Evaluation of Inspection Data

Describe your evaluation of the tracking data and data summaries and provide information on the evaluation results (e.g., data trends, typical BMP performance issues, comparisons to previous years, etc.).

Description:

The FY 13-14 inspections identified 2 violations the 41 inspections of High Priority Sites and Sites >1 Acre, or 5% of the High Priority/>1acre inspections performed. In FY 11-12 11% and FY 12-13 2% of the inspections revealed violations. The majority of the violations in FY 11-12, FY 12-13 and FY 13-14 were related to sediment control at 75%, 67%, and 100% respectively.

C.6.e.iii.(2) ▶ Evaluation of Inspection Program Effectiveness

Describe what appear to be your program's strengths and weaknesses, and identify needed improvements, including education and outreach.

Description:

Program is fully implemented. Training on issuing administrative citations was performed as refresher for long-time staff and for new staff.

[57] Calculated as number of violations fully corrected in a timely period after the violations are discovered divided by the total number of violations for the reporting year.

[58] Calculated as number of violations not fully corrected within 30 days after the violations are discovered divided by the total number of violations for the reporting year.

[59] The total number of violations reported in the table of Violation Correction Times equals the number of initial enforcement actions. I.e., This assumes one violation is issued for several problems during an inspection at a site. The total number of violations in the table of Violation Correction Times may not equal the total number of enforcement actions because one violation issued at a site may have a second enforcement action for the same violation at the next inspection if it is not corrected.

C.6 f ▶ Staff Training Summary

Training Name	Training Dates	Topics Covered	No. of Inspectors in Attendance	Percent of Inspectors in Attendance
Training is required to be conducted every other year. ACCWP C.6 Training Workshop conducted in June 2013. Additional ACCWP C.6 Training planned for FY 14-15.				
Berkeley ERP Training (Public Works)	July 9, 2013	ERP	6	57%
Berkeley ERP Training (Public Works)	September 24, 2013	ERP	1	14%
Berkeley Administrative Citation Training, refresher	November 15, 2013	How to issue administrative citations	2	29%
Berkeley ERP Training (Permit Service Center)	June 10, 2014	ERP	18	100%

Section 7 – Provision C.7. Public Information and Outreach

C.7.b.ii.1 ▶ Advertising Campaign

Summarize advertising efforts. Include details such as messages, creative developed, and outreach media used. The detailed advertising report may be included as an attachment. If advertising is being done by participation in a countywide or regional program, refer to the separate countywide or regional Annual Report.

Summary: See Section C.7 – Public Information and Outreach – of the ACCWP FY 13-14 Annual Report and the BASMAA FY 2013-2014 Regional Supplement for Training and Outreach for a summary of related Program and BASMAA activities.

C.7.b.iii.1 ▶ Pre-Campaign Survey

(For the Annual Report following the pre-campaign survey) Summarize survey information such as sample size, type of survey (telephone survey, interviews etc.). Attach a survey report that includes the following information. If survey was done regionally, refer to a regional submittal that contains the following information:

Information on the pre-campaign surveys was included in previous annual reports.

Place an **X** in the appropriate box below: N/A

	Survey report attached
	Reference to regional submittal:

C.7.b.iii.2 ▶ Post-Campaign Survey

(For the Annual Report following the post-campaign survey) Discuss the campaigns and the measureable changes in awareness and behavior achieved. Provide an update of outreach strategies based on the survey results. If survey was done regionally, refer to a regional submittal that contains the following information:

Information on the post-campaign survey for the BASMAA Regional Youth Litter Campaign was provided in the BASMAA FY 13-14 Annual Report.

Place an **X** in the appropriate box below:

	Survey report attached
X	Reference to regional submittal: Regional Youth Litter Campaign report in the BASMAA FY 2013-2014 Regional Supplement for Training and Outreach

C.7.c ► Media Relations

Summarize the media relations effort. Include the following details for each media pitch in the space below, AND/OR refer to a regional report that includes these details:

- Topic and content of pitch
- Medium (TV, radio, print, online)
- Date of publication/broadcast

Summary:

The following separate report developed by BASMAA summarizes media relations efforts conducted during FY 13-14: BASMAA FY 2013-2014 Regional Supplement for Training and Outreach

Other media relations efforts conducted countywide are included within the C.7 Public Information and Outreach section of the ACCWP FY 13-14 Annual Report.

C.7.d ► Stormwater Point of Contact

Summary of any changes made during FY 13-14:

No Change

C.7 e ▶ Public Outreach Events

Describe general approach to event selection. Provide a list of outreach materials and giveaways distributed.
Use the following table for reporting and evaluating public outreach events .

Outreach Materials

Throughout the fiscal year, the City distributed the full array of informational materials provided through the Alameda Countywide Clean Water Program (ACCWP) (951 pieces in total), such as: Protect Water and Wildlife Activity Book (28), Slappy and Quackers Activity Book (37), Pencils (280), Re-usable nylon Chico bags (10), Seed Packs (35).

These distributed materials promote stormwater pollution prevention messages in many forms. Encouragement of the use of least toxic approaches to pest & weed control and cleaning came from the various "Our Water Our World" campaign materials; from the Control It Guides; and from Healthy Home/Garden Handbook, and Less-Toxic Home & Garden Mini-booklets. Items with the Clean Water logo, such as activity books, reusable bags, and pencils all served to reinforce environmental stewardship messages to recipients young and old.

Event Details	**Description** (messages, audience)	**Evaluation of Effectiveness**
Provide event name, date, and location. Indicate if event is local, countywide or regional.	Identify type of event (e.g., school fair, farmers market etc.), type of audience (school children, gardeners, homeowners etc.) and outreach messages (e.g., Enviroscape presentation, pesticides, stormwater awareness)	Provide general staff feedback on the event (e.g., success at reaching a broad spectrum of the community, well attended, good opportunity to talk to gardeners etc.). Provide other details such as: • Estimated overall attendance at the event. • Number of people that visited the booth, comparison with previous years • Number of brochures and giveaways distributed • Results of any spot surveys conducted
Stormwater Exhibit at the Alameda County Fair: July 1 through July 7, 2013 and June 18 through June 30, 2014. Setting up the exhibit and producing the outreach materials are Countywide Program efforts. Staffing the exhibit is an effort conducted by individual Permittees.	The County Fair is attended by a wide range of residents from throughout the County. The primary message of the exhibit and outreach materials is to encourage residents to reduce their use of pesticides or when necessary use less-toxic pesticides. The exhibit also illustrates the basic watershed awareness/stormwater pollution message.	Several hundred thousand residents attend the fair each year. A more detailed description of the exhibit is included in Section C.7 Public Information and Outreach of the ACCWP FY 13/14 Annual Report.

National Night Out, August 6,2013 (Local event)	More than 50 Berkeley community organizations and neighborhood groups participated to increase awareness about public safety and disaster preparedness. All age groups audience.	• Distributed 600 outreach pieces.
Solano Stroll, September 8, 2013, Solano Avenue (Local Event)	The street fair brought out a diverse crowd along this 26 block commercial area. All age groups audience.	• Highly attended event (estimate 300,000 throughout the day) with large parade. • Booth consistently visited throughout the day. • Distributed 201 outreach pieces.
City Council Work Session October 1,2013 (Local Event)	Public Council Meeting where staff presented Measure M five years paving and LID plan	• 7 of the 9 councilmembers attended • Opportunity for staff to provide in depth presentation on how LID fits in with the city's paving plans.
Watershed Poetry Festival, September 28, 2013, Civic Center Park (Local Event)	Free public event organized by nonprofit group, Poetry Flash with support from the Ecology Center/Berkeley Farmers Market to raise environmental awareness through poetry, activism, and hand on learning.	• Estimate attendance 200 • Distributed 49 outreach pieces
LID Site, Eunice/Milvia , Private residence, February 6, 2014 (Local Event)	Public neighborhood meeting to inform residents of upcoming LID projects funded by Berkeley Measure M.	Received no complaints during construction of LID facilities. 6 neighborhood Residents attended
LID Site, Spruce/Vine , Private residence, February 14, 2014 (Local Event)	Public neighborhood meeting to inform residents of upcoming LID projects funded by Berkeley Measure M.	Received no complaints during construction of LID facilities. 5 neighborhood Residents attended
City council meeting, Authorizing San Pablo Ave. storm spine project contract with ABAG, February 25, 2014	Public City Council Meeting where council authorized participation in the San Pablo Ave. storm spine project.	Council demonstrated commitment to supporting and participating in water quality improvement projects.
LID Site, Milvia/Hopkins, N Branch Berkeley Library, February 26, 2014 (Local Event)	Public neighborhood meeting to inform residents of upcoming LID projects funded by Berkeley Measure M.	Received no complaints during construction of LID facilities. 2 neighborhood Residents attended
LID Site, Spruce/Vine, N Branch Berkeley Library, March 5, 2014 (Local Event)	Public neighborhood meeting to inform residents of upcoming LID projects funded by Berkeley Measure M.	Received no complaints during construction of LID facilities. 6 neighborhood Residents attended
LID Site, Allston/California, Univ Terrace Community Room , March 6, 2014 (Local Event)	Public neighborhood meeting to inform residents of upcoming LID projects funded by Berkeley Measure M.	Received no complaints during construction of LID facilities. 5 neighborhood Residents attended

Berkeley Bay Festival, April 12, 2014, Shorebird Nature Center at Berkeley Marina (Local Event)	Free City sponsored all age groups event celebrating Berkeley's connection to the Bay.	• Estimate attendance 2,000 • Distributed 249 outreach pieces (up from 177 last year)
Public Works Appreciation Day, May 22,2014 (Local Event)	Educational Open House at City's Corporation Yard	Distributed 101 outreach pieces.

C.7.f. ►Watershed Stewardship Collaborative Efforts

Summarize watershed stewardship collaborative efforts and/or refer to a regional report that provides details. Describe the level of effort and support given (e.g., funding only, active participation etc.). State efforts undertaken and the results of these efforts. If this activity is done regionally refer to a regional report.

Evaluate effectiveness by describing the following:

- Efforts undertaken
- Major accomplishments

Summary: See Section C.7 (Public Outreach and Involvement) of the ACCWP FY 13-14 Annual Report for a summary of the *Bringing Back the Natives Garden* Tours that is sponsored by the Program.

The City's Public Works Commission conducted a series of public hearings during the fiscal year to gather input from the public including creek groups about how to execute the Measure M funded paving and LID projects. Meetings for specific Measure M funded LID sites were conducted within the Codornices Watershed and the Strawberry Creek Watershed. The City considers these outreach and involvement efforts successful based on receiving no complaints about construction activities in the 4 FY14 Measure M LID Project Sites.

C.7.g. ►Citizen Involvement Events

List the types of events conducted (e.g., creek clean up, storm drain inlet marking, native gardening etc.). Use the following table for reporting and evaluating citizen involvement events.

Event Details	Description	Evaluation of effectiveness
Provide event name, date, and location. Indicate if event is local, countywide or regional	Describe activity (e.g., creek clean-up, storm drain marking etc.)	Provide general staff feedback on the event. Provide other evaluation details such as: • Number of participants. Any change in participation from previous years. • Distance of creek or water body cleaned

		• Quantity of trash/recyclables collected (weight or volume). • Number of inlets marked. • Data trends
Community Stewardship Grants Program	The Countywide Program sponsors the Community Stewardship Grants (CSG) Program. The CSG Program provides approximately $20,000 annually in $1,000 to $5,000 increments to individuals and community groups to support stormwater improvement/outreach projects throughout the County.	See Section C.7 of the ACCWP FY13/14 Annual Report for a summary. Berkeley participated in the workgroup tasked to evaluate and award the Community Stewardship Grants.
International Coastal Clean Up Day, September 21, 2013, Aquatic Park and SF Bay Shoreline	Three-hour annual event of volunteer shoreline clean up and trash inventory activities along Berkeley's Aquatic Park and SF Bay Shoreline area.	• Cleaned entire Berkeley Bay-shoreline and shoreline of main lagoon at Aquatic Park. • Collected thousands of cigarette filters; bottle caps and lids; plastic food wrappers or containers; plastic bags; straws or stirrers; plastic eating utensils; and other items. • Collected data is sent to the Ocean Conservancy in Washington D.C. to inform potential marine and waterway pollution prevention legislation.
All Storm Day, November 2, 2013, primarily in Codornices Watershed. (Local Event)	City sponsored event in which City staff and volunteers remove debris early in rainy season. The work includes cleaning gutters, drain inlets, and street sweeping.	• 7volunteers. • Cleaned gutters of trash and debris in the Codornices Watershed. • Collected 3.5 tons of debris
Berkeley Project Day, October 26, 2013, Willard Park/Southside site (Local Event)	Annual volunteer event coordinated between City of Berkeley and the University of California.	• 20 student volunteers • Picked up litter and debris from Berkeley streets south of the UC Campus. • Collected 680 lb of debris
Berkeley Project Day, October 26, 2013, Northside site (Local Event)	Annual volunteer event coordinated between City of Berkeley and the University of California.	• 17 volunteers • Picked up litter and debris from curb and gutter.

		• Collected 1.2 ton of debris
Berkeley Project Day, March 8, 2014, No Dumping medallions (Local Event)	Annual volunteer event coordinated between City of Berkeley and the University of California.	• 23 student volunteers • Picked up litter and debris from curb and gutter. • Installed 104 "No Dumping Drains to Bay" Medallions
All Souls Episcopal Church , Inlet medallions (Local Event)	A Volunteer event coordinated between City of Berkeley and All Souls Episcopal.	• 29 Student volunteers • Picked up litter and debris from curb and gutter. • Installed 110 "No Dumping Drains to Bay" Medallions

C.7.h. ▶School-Age Children Outreach

Summarize school-age children outreach programs implemented. A detailed report may be included as an attachment.
Use the following table for reporting school-age children outreach efforts.

Program Details	Focus & Short Description	Number of Students/Teachers reached	Evaluation of Effectiveness
Provide the following information: Name Grade or level (elementary/ middle/ high)	Brief description, messages, methods of outreach used	Provide number or participants	Provide agency staff feedback. Report any other evaluation methods used (quiz, teacher feedback etc.). Attach evaluation summary if applicable.
See the Section C.7 of the ACCWP FY 13/14 Annual Report for a summary of the Program's School-Age Outreach Program			
Rosa Parks Elementary School, August 27, 2013	Annual "Welcoming" event for incoming elementary school students, with backpacks filled with school supplies and other educational materials. City Councilmember Darryl Moore participated.	120 students	Parents and children were very happy to receive free backpacks, school supplies, and educational materials. 360 pollution prevention and Clean Water Program outreach pieces distributed.
Saint Mary's College High	City representative talked to Mr. John Forte's Honors Science Classes about	2 classes, approx 25 Junior/Seniors in	City representative talked about stormwater pollution and the City's NPDES permit.

School, September 13, 2013	stormwater issues.	each class	Provided background for upcoming Hot Spot Clean-up for Codornices Creek (site is designated BER_COD_1)
Saint Mary's College High School, October 3, 2013, RR to 5th	Hot Spot Cleanup at Codornices Creek site (site is designated BER_COD_1)	13 students from Mr. John Forte's Honors Science Classes	Picked up 120 pounds of material
Saint Mary's College High School, October 4, 2013, RR to 2nd	Hot Spot Cleanup at Codornices Creek site (site is designated BER_COD_1)	11 students from Mr. John Forte's Honors Science Classes	Picked up 420 pounds of material

Section 8 - Provision C.8 Water Quality Monitoring

C.8 ▶ Water Quality Monitoring

State below if information is reported in a separate regional report. Municipalities can also describe below any Water Quality Monitoring activities in which they participate directly, e.g. participation in RMP workgroups, fieldwork within their jurisdictions, etc.

Summary

During FY 13-14, we contributed through ACCWP to the BASMAA Regional Monitoring Coalition (RMC). In addition, we contributed financially to the Regional Monitoring Program for Water Quality in the San Francisco Estuary (RMP) and were represented at RMP committees and work groups. Monitoring efforts and results are documented in a separate report submitted March 15 of each year, as required in Provision C.8. For additional information on monitoring activities conducted by the Program, BASMAA RMC and the RMP, see the C.8 Water Quality Monitoring section of the Program's FY 13-14 Annual Report and the Integrated Monitoring Report.

Section 9 – Provision C.9 Pesticides Toxicity Controls

C.9.b ▶ Implement IPM Policy or Ordinance

Report implementation of IPM BMPs by showing trends in quantities and types of pesticides used, and suggest reasons for increases in use of pesticides that threaten water quality, specifically organophosphates, pyrethroids, carbaryl, and fipronil. A separate report can be attached as evidence of your implementation.

Trends in Quantities and Types of Pesticides Used[60]

Pesticide Category and Specific Pesticide Used	Amount[61]				
	FY 09-10	FY 10-11	FY 11-12	FY 12-13	FY 13-14
Organophosphates					
Product or Pesticide Type A	0	0	0	0	0
Product or Pesticide Type B	0	0	0	0	0
Pyrethroids					
Product or Pesticide Type X	0	0	0	0	0
Product or Pesticide Type Y	0	0	0	0	0
Carbaryl	0	0	0	0	0
Fipronil	0	0	0	0	0

C.9.c ▶ Train Municipal Employees

Enter the number of employees that applied or used pesticides (including herbicides) within the scope of their duties this reporting year.	2
Enter the number of these employees who received training on your IPM policy and IPM standard operating procedures within the last 3 years.	2
Enter the percentage of municipal employees who apply pesticides who have received training in the IPM policy and IPM standard operating procedures within the last three years.	100%

[60] Includes all municipal structural and landscape pesticide usage by employees and contractors.
[61] Weight or volume of the product or preferably its active ingredient, using same units for the product each year. The active ingredients in any pesticide are listed on the label. The list of active ingredients that need to be reported in the pyrethroids class includes: allethrin, bifenthrin, beta-cyfluthrin, bioallethrin, cyfluthrin, cypermethrin, cyphenothrin, deltamethrin, esfenvalerate, etofenprox, fenpropathrin, gamma-cyhalothrin, imiprothrin, lambda-cyhalothrin, metofluthrin, permethrin, phenothrin, prallethrin, resmethrin, sumithrin (d-phenothrin), tau-fluvalinate, tefluthrin, tetramethrin, tralomethrin, cis-permethrin, and zeta-cypermethrin.

C.9.d ▶ Require Contractors to Implement IPM

Did your municipality contract with any pesticide service provider in the reporting year?		Yes	X	No

If yes, attach one of the following:

- [ ] Contract specifications that require adherence to your IPM policy and standard operating procedures, OR
- [ ] Copy(ies) of the contractors' IPM certification(s) or equivalent, OR
- [ ] Equivalent documentation.

If **Not attached**, explain:

C.9.e ▶ Track and Participate in Relevant Regulatory Processes

Summarize participation efforts, information submitted, and how regulatory actions were affected **OR** reference a regional report that summarizes regional participation efforts, information submitted, and how regulatory actions were affected.

Summary:
During FY 13-14, we participated in regulatory processes related to pesticides through contributions to the countywide Program, BASMAA and CASQA. See the CASQA Pesticides Subcommittee Annual Report 2013-14: Preventing Urban Pesticide Pollution in Stormwater for a summary of CASQA activities.

C.9.f ▶ Interface with County Agricultural Commissioners

Did your municipal staff observe any improper pesticide usage or evidence of improper usage (e.g., pesticides in storm drain systems, along street curbs, or in receiving waters) during this fiscal year?		Yes	X	No

If yes, provide a summary of improper pesticide usage reported to the County Agricultural Commissioner and follow-up actions taken to correct any violations. A separate report can be attached as your summary.

C.9.h.ii ▶ Public Outreach: Point of Purchase

Provide a summary of public outreach at point of purchase, and any measurable awareness and behavior changes resulting from outreach (here or in a separate report); **OR** reference a report of a regional effort for public outreach in which your agency participates.

Summary:
See the C.9 Pesticides Toxicity Control section of the ACCWP FY 13-14 Annual Report and the BASMAA FY 2013-2014 Regional Supplement for

Training and Outreach for information on point of purchase public outreach conducted countywide and regionally.

C.9.h.vi ▶ Public Outreach: Pest Control Operators

Provide a summary of public outreach to pest control operators and landscapers and reduced pesticide use (here or in a separate report); **OR** reference a report of a regional effort for outreach to pest control operators and landscapers in which your agency participates.
Summary: See the C.9 Pesticides Toxicity Control section of Program's FY 13-14 Annual Report for a summary of outreach to pest control operators and landscapers to reduce pesticide use.

Section 10 - Provision C.10 Trash Load Reduction

C.10.a.iii ▶ Minimum Full Trash Capture

Provide the following:

1) Descriptions of actions/tasks completed towards achieving the Minimum Full Trash Capture requirement in provision C.10.a.iii. Include the:
   - Total number and types of full capture devices (publicly and privately-owned) installed to-date;
   - Total land area (acres) and land areas within each trash generation category (i.e., very high, high, moderate and low) treated by full capture devices (or other types of devices for non-population based Permittees), in comparison to the MRP-required full capture requirements in Attachment J to the MRP; and,
   - Percentage of jurisdictional land areas with very high, high, moderate and low trash generation rates treated by full capture devices.
2) A narrative summary of maintenance activities implemented for each device, group of devices, or device type, including descriptions of typical maintenance frequencies and issues associated with maintaining these devices.

Descriptions of Actions/Tasks (Conducted or Planned):

For Provision C10 Berkeley is a population based permittee listed in Table 10.1 in Attachment J of NPDES Permit Number CAS612008. Table 10.1 states that minimum trash capture catchment area for Berkeley is 55 acres. The City installed 193 full trash capture devices prior to July 1, 2014 covering a total watershed area of 765 acres, thus the city is meeting C.10.a.iii-Minimum Full Trash Capture. This area includes 117 acres in the low, 396 acres in the moderate, 190 acres in the high, and 63 acres in the very high trash generating categories. All devices are connector pipe screens (CPS).

Descriptions of Maintenance Activities:

The trash capture devices are serviced twice per year. We have not observed flooding at any of the sites.

C.10.b.iii ▶ Trash Hot Spot Assessment

Provide the volume of material removed during each MRP-required Trash Hot Spot cleanup during each fiscal year, and the dominant types of trash (e.g., glass, plastics, paper) removed and their sources in FY 2013-14 to the extent possible.

Trash Hot Spot	FY 13-14 Cleanup Date	Volume of Trash Removed (cubic yards)				Dominant Type(s) of Trash in FY 2013-14	Trash Sources in FY 2013-14 (where possible)
		FY 2010-11	FY 2011-12	FY 2012-13	FY 2013-14		
BER_AQP (Aquatic Park)	Sep 21, 2014	Est 30 pounds	140 pounds	20 pounds	Material combined with Coastal Clean-up material	Food Wrappers/containers, Cigarette filters, Plastic Bags	Likely sources are Recreation activities, Freeway, Homeless
BER_Bay (Brickyard Cove)	Sep 21, 2014	Est 100 pounds	Material combined with Coastal Clean-up material	20 pounds	Material combined with Coastal Clean-up material	Food Wrappers/Containers, Cap/Lids, Plastic Bags	Likely source is trash from the Bay
BER_COD (Codornices Creek)	Oct 3 and 4, 2014	Est 400 pounds	460 pounds	420 pounds	540 pounds	Food Wrappers/Containers, Bags, Clothing	Urbanized development in upstream watershed, Recreation/Sports, Homeless

C.10.c ▶ Long-Term Trash Load Reduction Plan

Provide descriptions of significant revisions made to your Long-term Trash Load Reduction Plan submitted to the Water Board in February 2014. Describe significant changes made to primary or secondary trash management areas (TMA), trash generation maps, control measures, or time schedules identified in your plan.

Description of Significant Revision	Associated TMA

C.10.d ► PART A - Trash Control Measure Implementation and Assessment (Jurisdictional-wide Actions)

Provide a description of each jurisdictional-wide trash control measure implemented to-date. Identify the dominant trash source(s) and dominant type(s) of trash addressed by each control measure. For each jurisdictional-wide measure, identify the trash assessment method(s) used to demonstrate on-going reductions, summarize the results of the assessment(s), and estimate the associated reduction of trash within your jurisdictional area.

We will provide a complete reporting in two weeks.

Control Measure	Summary Description of Control Measure & Dominant Trash Sources and Types	Assessment Method(s)	Summary of Assessment Results To-date	Estimated % Trash Reduced
Single-use Plastic Bag Ordinance or Policy	The Alameda County Waste Management Authority adopted the Single-Use Bag Ban. As of January 1, 2013, all grocery stores, supermarkets, mini-marts, convenience stores, liquor stores, pharmacies, drug stores or other entities that sell milk, bread, soda and snack foods (all four items) and/or alcohol (Type 20 or21 license) in Alameda County must comply with the Single-Use Bag Ban Ordinance. Affected stores may no longer provide customers with single-use bags at check-out. A copy of the Ordinance is available on the Alameda County Waste Management Authority's website: http://reusablebagsac.org/ordinancetext.html	See Section C.10 of the ACCWP FY 13-14 Annual Report.	See Section C.10 of the ACCWP FY 13-14 Annual Report.	4%
Expanded Polystyrene Food Service Ware Ordinance or Policy	Berkeley was one of the first agencies in the country to regulate polystyrene foam food service containers, being in place since the 1980s and is now considered normal practice.	See Section C.10 of the ACCWP FY 13-14 Annual Report.	See Section C.10 of the ACCWP FY 13-14 Annual Report.	4%
Unsecured Load Fee at City's Transfer Station	Implemented $15 per customer when entering the Transfer Station with an unsecured load. Unsecured loads are sources of a variety of materials found in trash, generally items that can blow out of the transporting vehicles. The program went into effect on July 1, 2014.	Visual assessments will be conducted along the routes to the Transfer Station.	These will be reported in the future. We believe this will have an effective reduction in trash in West Berkeley but not yet developed a value for the estimated trash reduction	0%

C.10.d ▶ PART B - Trash Control Measure Implementation and Assessment (TMA Specific Actions)

Complete the following trash control measure implementation and assessment summary for <u>each</u> primary trash management area (TMA) identified in your Long-term Plan. Include the following information:

- Identify the total jurisdictional area and the % of that area that generates very high (VH), high (H), moderate (M), or low (L) levels of trash;
- Identify the dominant trash source(s) and dominant type(s) of trash addressed or to-be addressed in the TMA;
- Include the area currently treated by full capture devices, the quantity and type of devices installed to-date, and the % of jurisdictional area that generates very high (VH), high (H), moderate (M), and low (L) levels of trash after accounting for reductions via full capture devices;
- Summarize control measures other than full capture devices implemented to-date, distinguishing between implementation that began pre- and post-MRP effective date. If not implemented in the entire TMA, describe generation category targeted and % of TMA addressed;
- Provide the % of the jurisdictional area that generates very VH, H, M or L levels of trash after accounting for all control measures implemented to-date;
- Describe the methods used to evaluate the effectiveness of control measures other than full capture devices, and any assessment results to-date. If the method was not implemented in the entire TMA, describe generation category targeted and %of TMA addressed; and
- Provide an estimate of the % of trash reduced in the TMA and jurisdiction-wide.

C.10.d ► PART B - Trash Control Measure Implementation and Assessment (TMA Specific Actions)

TMA ID	TMA Area (Acres)	Dominant Sources	Dominant Types		% TMA in Each Trash Generation Category			
					VH	H	M	L
1 Full Trash Capture Devices	765	Pedestrian, vehicles, illegal dumping	All trash types	Baseline Generation (Pre-MRP)	8%	25%	52%	15%
Trash Full Capture Devices		Summary Descriptions of Full Trash Capture Devices (Quantity and Type)		After taking into account Full Capture Devices	0%	0%	0%	100%
Total Area (Acres)	765	196 Connector pipe screens						
% of TMA	100%							
% of VH/H/M	85%							
Summary Descriptions of Control Measures Implemented Since MRP Adoption, Other than Full Capture Devices				After taking into account all New or Enhanced (post-MRP) Control Measures	0%	0%	0%	100%
Assessment Methods for Control Measures Other than Full Capture Devices								
Summary of Assessment Results To-date								
Cleaning for full trash capture devices is planned for two times per year and as needed.								

Estimated % Trash Reduction in TMA due to New or Enhanced Post-MRP actions	100%
Estimated % Trash Reduction Jurisdiction-wide due to New or Enhanced Post-MRP actions	24%

C.10.d ► PART B - Trash Control Measure Implementation and Assessment (TMA Specific Actions)

TMA ID	TMA Area (Acres)	Dominant Sources	Dominant Types		% TMA in Each Trash Generation Category			
					VH	H	M	L
2 LID Facilities		Pedestrian, vehicles, illegal dumping	All trash types	Baseline Generation (Pre-MRP)	0%	0%	21%	79%
Trash Full Capture Devices		Summary Descriptions of Full Trash Capture Devices (Quantity and Type)		After taking into account Full Capture Devices	0%	0%	21%	79%
Total Area (Acres)								
% of TMA	0%							
% of VH/H/M	0%							
Summary Descriptions of Control Measures Implemented Since MRP Adoption, Other than Full Capture Devices				After taking into account all New or Enhanced (post-MRP) Control Measures	0%	0%	0%	100%
City will be installing LID facilities designed to reduce stormwater pollution in conjunction with the City's paving program. Many of these facilities will be funded by Measure M, passed by Berkeley voters in November 2012. The City has designed and started construction on 5 projects, 1. Allston Permeable Paving Pilot Project (full width permeable pavers), 2. Spruce-Vine Traffic Circle Bio-Swale, 3. Eunice-Milvia Cistern above Codornices Creek, 4. Milvia-Hopkins Permeable Pavement, and 5. California-Allston Bio-Swale in Presentation Park. Construction for these projects will take place in the Summer 2014 and include full trash capture attributes.								
Assessment Methods for Control Measures Other than Full Capture Devices								
These facilities will be monitored for their trash capture ability and some will have monitored for removing other contaminants contained in urban runoff.								
Summary of Assessment Results To-date								
Assessment results are not available for this reporting period.								

Estimated % Trash Reduction in TMA due to New or Enhanced Post-MRP actions	100%
Estimated % Trash Reduction Jurisdiction-wide due to New or Enhanced Post-MRP actions	<1%

C.10.d ▶ PART C – Estimated Overall Trash Load Reduction

For Population-based Permittees, provide an estimate of the overall trash reduction percentage achieved to-date within the jurisdictional area of your municipality that generates problematic trash levels (i.e., Very High, High or Moderate trash generation). Base the estimate on the information presented in C.10.d – Parts A and B and creek/shoreline cleanups not reported in C.10.b.iii. Provide a statement regarding the confidence in the estimate and challenges and/or successes in measuring progress towards the 40% trash reduction target described in provision C.10.

Discussion of Trash Reduction Estimate:

Our reduction estimate includes implementing the unsecured load fee at our transfer station, and reductions from areas served by business improvement districts or hand litter removal efforts. We believe these measures have a significant effect on reducing trash and have assigned 8% reduction to the Other Control Measures line below for these measures. We are evaluating the effectiveness of these measures.

Estimated % Trash Reduction due to Jurisdictional-wide Actions	8%
Estimated % Trash Reduction due to Trash Full Capture Devices (All TMAs)	24%
Estimated % Trash Reduction due to Other Control Measures (All TMAs)	8%
SubTotal for Above Actions	**40%**
Estimated % Trash Reduction due to Creek/Shoreline Cleanups (All TMAs)	0%
Total Estimated % Trash Reduction in FY 13-14	**40%**

Section 11 - Provision C.11 Mercury Controls

C.11.a.i ▶ Mercury Recycling Efforts

List below or attach lists of efforts to promote, facilitate, and/or participate in collection and recycling of mercury containing devices and equipment at the consumer level (e.g., thermometers, thermostats, switches, bulbs).

See Section C.11 of the ACCWP FY 13-14 Annual Report for a summary of countywide recycling efforts. The City promotes local fluorescent bulb collection at the Community Conservation Center (Gilman and 2nd).

C.11.a.ii ▶ Mercury Collection

Provide an estimate of the mass of mercury collected through these efforts, or provide a reference to a report containing this estimate.

Please refer to the ACCWP FY 13-14 Annual Report for an estimate of the mass of mercury collected through collection and recycling efforts in the Countywide Program area.

C.11.b ▶Monitor Methylmercury
C.11.c ▶Pilot Projects to Investigate and Abate Mercury Sources in Drainages
C.11.d ▶Pilot Projects to Evaluate and Enhance Municipal Sediment Removal and Management Practices
C.11.e ▶Conduct Pilot Projects to Evaluate On-Site Stormwater Treatment via Retrofit
C.11.f ▶Diversion of Dry Weather and First Flush Flows to POTWs
C.11.g ▶Monitor Stormwater Mercury Pollutant Loads and Loads Reduced
C.11.h ▶Fate and Transport Study of Mercury in Urban Runoff
C.11.i ▶Development of a Risk Reduction Program Implemented Throughout the Region
C.11.j ▶Develop Allocation Sharing Scheme with Caltrans

State below if information is reported in a separate regional report. Municipalities that participate directly in regional activities to can provide descriptions below.

Summary

A summary of ACCWP and regional accomplishments for these sub-provisions are included within the C.11 Mercury Controls section of Program's FY 13-14 Annual Report, and the March 2014 Integrated Monitoring Report.

Section 12 - Provision C.12 PCBs Controls

C.12.a.ii,iii ►Ongoing Training

(For FY 10-11 Annual Report and Each Annual Report Thereafter) List below or attach description of ongoing training development and inspections for PCB identification, including documentation and referral to appropriate regulatory agencies (e.g. county health departments, Department of Toxic Substances Control, California Department of Public Health, and the Water Board) as necessary.

Description:

See the FY 13-14 ACCWP Annual Report for a description of PCB related training. The city is participating in the ACCWP's PCB Workgroup.

C.12.b ►Conduct Pilot Projects to Evaluate Managing PCB-Containing Materials and Wastes during Building Demolition and Renovation Activities
C.12.c ►Pilot Projects to Investigate and Abate On-land Locations with Elevated PCB Concentrations
C.12.d ►Conduct Pilot Projects to Evaluate and Enhance Municipal Sediment Removal and Management Practices
C.12.e ►Conduct Pilot Projects to Evaluate On-Site Stormwater Treatment via Retrofit
C.12.f ►Diversion of Dry Weather and First Flush Flows to POTWs
C.12.g ►Monitor Stormwater PCB Pollutant Loads and Loads Reduced
C.12.h ►Fate and Transport Study of PCBs in Urban Runoff
C.12.i ►Development of a Risk Reduction Program Implemented Throughout the Region

State below if information is reported in a separate regional report. Municipalities that participate directly in regional activities to can provide descriptions below.

Summary

A summary of countywide Program and regional accomplishments for these sub-provisions are included within the C.12 PCB Controls section of Program's FY 13-14 Annual Report, and the March 2014 Integrated Monitoring Report.

Section 13 - Provision C.13 Copper Controls

C.13.a.iii.(2) ►Training, Permitting and Enforcement Activities

(FY 11-12 Annual Report and each Annual Report thereafter) Provide summaries of activities implemented to manage waste generated from cleaning and treating of copper architectural features, including copper roofs, during construction and post-construction including. :

- Development of BMPs on how to manage the water during and post construction
- Requiring the use of appropriate BMPs when issuing building permits
- Educating installers and operators on appropriate BMPs
- Enforcement actions taken again noncompliance

Contractors and installers are required to implement appropriate BMPs during their projects. During building permit issuance, contractors and installers are given fact sheets detailing the required BMP activities. Proper BMPs are inspected and enforced by City inspection staff. Copper BMP fact sheets are available in the Permit Service Center.

C.13.c ►Vehicle Brake Pads

Based upon inspection activities conducted under Provision C.4, highlight copper reduction results achieved among the facilities identified as potential users or sources of copper, facilities inspected, and BMPs addressed.

Summary

During FY 13-14, we participated in implementation of the California Brake Friction Material Law through contributions to the countywide Program, BASMAA and CASQA. For additional information, see the C.13 Copper Controls section of Program's FY 13-14 Annual Report.

C.13.d.iii ►Industrial Sources Copper Reduction Results

Based upon inspection activities conducted under Provision C.4, highlight copper reduction results achieved among the facilities identified as potential users or sources of copper, facilities inspected, and BMPs addressed.

Summary

79 inspections were conducted at 74 Berkeley Businesses identified as potential sources of industrial copper in FY13/14. Five new businesses were recognized as potential sources of copper during first inspections. Four businesses identified as potential industrial sources of copper were inspected in response to complaints. Five follow-up inspections were conducted at facilities identified as potential sources of copper. The inspections found no threatened illicit discharges related to potential sources of copper.

These standard industry types identified as potential sources of copper inspected in FY13/14 included: 53 Automotive Repair/Service/miscellaneous; 1 construction; 1 industrial; 3 machine shops; 5 manufacturing; 4 miscellaneous; 8 NOI; 1 retail/wholesale; 2 transportation/corporation yards; and 1 waste related.

Section 14 - Provision C.14 PBDE, Legacy Pesticides and Selenium Controls

Note: There are no reporting requirements in the FY 13-14 Annual Report for Section C.14.

Section 15 - Provision C.15 Exempted and Conditionally Exempted Discharges

C.15.b.iii.(1), C.15.b.iii.(2) ► Planned and Unplanned Discharges of Potable Water

Is your agency a water purveyor?		Yes	X	No
If **No**, skip to C.15.b.vi.(2):				
If **Yes**, Complete the attached reporting tables or attach your own table with the same information. Provide any clarifying comments below.				
Comments:				

C.15.b.vi.(2) ► Irrigation Water, Landscape Irrigation, and Lawn or Garden Watering

Provide implementation summaries of the required BMPs to promote measures that minimize runoff and pollutant loading from excess irrigation. Generally the categories are:

- Promote conservation programs
- Promote outreach for less toxic pest control and landscape management
- Promote use of drought tolerant and native vegetation
- Promote outreach messages to encourage appropriate watering/irrigation practices
- Implement Illicit Discharge Enforcement Response Plan for ongoing, large volume landscape irrigation runoff.

Summary:

The City attends public events to distribute and provide face to face discussion on IPM, Bay Friendly Landscaping, and other practices related to achieving a sustainable society.

C.15.b.III.(1) ►Planned Discharges of the Potable Water System

Site/ Location	Discharge Type	Receiving Waterbody(ies)	Date of Discharge	Duration of Discharge (military time)	Estimated Volume (gallons)	Estimated Flow Rate (gallons/day)	Chlorine Residual (mg/L)	pH (standard units)	Discharge Turbidity[62] (NTU)	Implemented BMPs & Corrective Actions

[62] Monitor the receiving water for turbidity if necessary and feasible. Include data in this column if available.

C.15.b.iii.(2) ▶ Unplanned Discharges of the Potable Water System[63]

Site/ Location	Discharge Type	Receiving Waterbody(ies)	Date of Discharge	Discharge Duration (military time)	Estimated Volume (gallons)	Estimated Flow Rate (gallons/day)	Chlorine Residual (mg/L)[64]	pH (standard units)[52]	Discharge Turbidity (Visual)[52]	Implemented BMPs & Corrective Actions	Time of discharge discovery	Regulatory Agency Notification Time[65]	Inspector arrival time	Responding crew arrival time

[63] This table contains all of the unplanned discharges that occurred in this FY.
[64] Monitoring data is only required for 10% of the unplanned discharges. If you monitored more than 10% of your unplanned discharges, report all of the data collected.
[65]. Notification to Water Board staff is required for unplanned discharges where the chlorine residual is >0.05 mg/L and total volume is ≥ 50,000 gallons. Notification to State Office of Emergency Services is required after becoming aware of aquatic impacts as a result of unplanned discharge or when the discharge might endanger or compromise public health and safety.
