Hi Jeff,

Thanks for your patience; I've had a chance to look at the oversize materials in the file. The newspapers are fragile, but we could scan them in a Mylar sleeve. They are a few issues of the *Plumas Independent* from June 8th until July 20th, 1933. It looks to have been a weekly paper.

As for the maps, they total about 10-12 square feet and the first is "Walker Mining—Claim Map"; the second is "Walker Mining—Camp and Mill Site."

If that sounds like it would be useful, let me know and we'll add them to your order.

Best,
Rachael

Rachael,

Thank you for your reply. Regarding the maps and newspapers, if you could give us a better idea of what they pertain to it would help us decide if they relevant to our project.

Regarding operating agreements, management agreements, or contracts. Please do keep your eyes open to anything that discusses this and then bring it to our attention.

Thank you.

Jeff H.

Hi Jeff,

I apologize for the delay in my reply; I've been in and out of the office at various conferences. At any rate, I've had my student assistant working to scan the documents and she's nearly completed the scanning of all of the textual material. We do have one question for you: in folder 16303, there are 279 pages of reports/correspondence, as well as 4 large maps, and 42 newspaper pages. We've

scanned all but the maps and newspapers, but since they are oversize, and in the case of the newspapers, quite fragile, we held off on scanning these. Would you like us to scan these additional material as well? We may not be able to scan the newspapers due to their fragile condition, but we can see what might be possible.

We're somewhat limited with the database, I'm afraid; locating agreements between Anaconda and US Smelting—unless the company is listed as an author—would require looking at all of the documents related to a particular project. We can keep our eyes open for any agreements in the files we're scanning, though.

I haven't yet had a chance to review file 2218, but will do that very soon and get back to you.

Again, my apologies for the delay. Just let me know how you would like to proceed with the rest of your scan order and we'll wrap it up.

Best,
Rachael

Good morning Rachael,

I would like to confirm that you received my two emails on September 19th, requesting additional information from the Anaconda Geological Documents Collection on the Walker Mine? Could you also provide a rough time frame as to when you might be able to have the files requested available for us?

Thank you,

Jeff S. Huggins
