NOTICE OF PUBLIC HEARING

concerning

PROPOSED WASTE DISCHARGE REQUIREMENTS (NPDES NO. CA0079049)

FOR CITY OF DAVIS WASTEWATER TREATMENT PLANT YOLO COUNTY

The City of Davis (Discharger) is the owner and operator of the City of Davis Wastewater Treatment Plant (Facility), a publicly owned treatment works located at 45400 County Road 28H, Davis, California. The Facility provides sewerage service for the City of Davis and serves a population of approximately 68,000. The Discharger recently completed a significant upgrade of the Facility to provide nutrient removal and tertiary filtration with a treatment capacity of 7.5 million gallons per day. Tertiary treated disinfected wastewater from the Facility is discharged to Willow Slough Bypass and seasonally to Conaway Ranch Toe Drain, both of which are waters of the United States within the Yolo Bypass and Sacramento River Watershed.

Discharges from the Facility are currently regulated by Waste Discharge Requirements Order R5-2013-0127-01, issued by the Central Valley Regional Water Quality Control Board (Central Valley Water Board) on 4 October 2013. An Order is proposed to renew the NPDES permit. The proposed Order includes updated effluent limitations for ammonia, biochemical oxygen demand, and total suspended solids. Furthermore, due to the higher level of treatment the proposed Order removes effluent limitations for cadmium, cyanide, aluminum, copper, electrical conductivity, and selenium because the discharge no longer demonstrates reasonable potential to cause or contribute to an exceedance in the receiving water.

A public hearing concerning this matter will be held during the Central Valley Water Board meeting scheduled for:
