Source Name: SCOTT RIVER
Tributary To: KLAMATH RIVER
County: Siskiyou
Diversion Within: SE¼ of SW¼ Section 23 T42N, R09W, MB&M

Year of First Use: 1958
Parcel Number: 23-09-400

A. **Water is Used Under:** Riparian claim____ Pre-1914 right ____ Other (explain): ____

B. **Year of First Use:** (Please provide if missing above) ____

C. **Amount of Use:** Enter the amount (or the approximate amount) of water used each month, using the table below.

Amounts below are in: Gallons per minute 24 hrs per day Million Gallons (MG) ____ Acre-feet (AF) ____ Other ____

Year	Jan	Feb	Mar	Apr	May	June	July	Aug	Sept	Oct	Nov	Dec	Total Annual
2004	100	100	1150	1500	2500	2500	2500	2500	2000	1500	100	100	
2005	100	100	1150	1500	2500	2500	2500	2500	2000	1500	100	100	
2006	100	100	1150	1500	2500	2500	2500	2500	2000	1500	100	100	

D. **Purpose of Use** – Specify number of acres irrigated, stock watered, persons served, etc.

Irrigation 650 acres; Stockwatering yes; Domestic 6;
Other (specify) We supply water for Frampro Nursery

E. **Changes in Method of Diversion** – Describe any changes in your project since your previous statement was filed. (New pump, enlarged diversion dam, location of diversion, etc.)

F. Please answer only those questions below which are applicable to your project.

1. Conservation of water
   a. Are you now employing water conservation efforts? YES X NO ___
   Describe any water conservation efforts you have initiated: New Pivot

   b. If you are claiming credit for water conservation under section 1011 of the Water Code for your claimed pre-1914 appropriative right, please show the amount of water conserved:

   Reduction in Diversions:

   Year ____ ____ (AF/MG) Year ____ ____ (AF/MG) Year ____ ____ (AF/MG)

   Reduction in consumptive use:

   Year ____ ____ (AF/MG) Year ____ ____ (AF/MG) Year ____ ____ (AF/MG)

   I have data to support the above surface water use reductions due to conservation efforts. YES ____ NO ____

LATE

2. Water quality and wastewater reclamation

a. Are you now or have you been using reclaimed water from a wastewater treatment facility, desalination facility or water polluted by waste to a degree, which unreasonably affects such water for other beneficial uses? YES ____ NO X.

b. If you are claiming credit due to the substitution of reclaimed water, desalinated water or polluted water in lieu of a claimed pre-1914 appropriative right under section 1010 of the Water Code, please show amounts of reduced diversions and amounts of substitute water supply used:

Amount of reduced diversion:
Year ____ _____ (AF/MG) Year ____ _____ (AF/MG) Year ____ _____ (AF/MG)

State the type of substitute water supply: _____

Amount of substitute water supply used:
Year ____ _____ (AF/MG) Year ____ _____ (AF/MG) Year ____ _____ (AF/MG)

I have data to support the above surface water use reductions due to the use of a substitute water supply. YES ____ NO ____.

3. Conjunctive use of surface water and groundwater

a. Are you now using groundwater in lieu of surface water? YES X NO ____.

b. If you are claiming credit due to the substitution of groundwater for a claimed pre-1914 appropriative right under section 1011.5 of the Water Code, please show the amounts of groundwater used:

Year _____ (AF/MG) Year ____ _____ (AF/MG) Year ____ _____ (AF/MG)

I have data to support the above surface water use reductions due to the use of groundwater. YES ____ NO ____.

I understand that it may be necessary to document the water savings claimed in "F" above if credit under Water Code sections 1010 and 1011 is sought in the future.

I declare that the information in this report is true to the best of my knowledge and belief.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

"Statements of Water Diversion and Use"
"Information Pertaining to Water Rights in California"
"Water Rights for Stockponds Constructed Prior to 1969"
"Appropriation of Water in California"

Statement of Water Diversion and Use

A. Name of person diverting water Keith Whipple
Address Star Rt Etna

B. Name of body of water at point of diversion Scott Rivers
Tributary to Klamath River

C. Place of diversion ____ ¼ ____ ¼ Section 23, Township 42 N, Range 9 W MT DM B&M,
Siskiyou County, or locate it on sketch of section grid on reverse side with regard to section lines or prominent local landmarks.

D. Capacity of diversion works is 1500 gals per minute (cubic feet per second / gallons per minute)
Capacity of storage reservoir ____ (gallons / acre-feet)
State quantity of water used each month in gallons or acre-feet

Year	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total Annual
1966					✓	✓	✓	✓	✓	✓			

If monthly and annual use are not known, check months in which water was used. State extent of use in units, such as acres of each crop irrigated, average number of persons served, number of stock watered, etc.
approximately 250 acres sprinkled irr
Maximum annual water use in recent years has been 1500 gallons per minute 750 (gallons / acre-feet)
Minimum annual water use in recent years has been ____ (gallons / acre-feet)
Type of diversion facility: gravity ____, pump ✓
Method of measurement: weir ____, flume ____, electric power meter ____, water meter ____, estimate ✓

E. Purpose of use (what water is being used for) Hay, grain, pasture irr.

F. General description or location of place of use (use sketch of section grid on reverse side if you desire) T 42 N, Range 9 W
on the east side of Scott River

G. Year of first use as nearly as known 1958

H. Name of person filing statement Keith Whipple
Position Owner Operator Organization ____
Address Star Rt Etna

I certify that the foregoing statements are true and correct to the best of my knowledge and belief.

Date signed June 29, 1966 Signature Keith Whipple
