E. **Purpose of Use** – Specify number of acres irrigated, stock watered, persons served, etc.

Irrigation _____ acres; Stockwatering _____; Domestic _____;
Other (specify) No use these years. Backup municipal supply for 193,500 persons.

Parcel Number(s) of Place of Use: _____

F. **Changes in Method of Diversion** – Describe any changes in your project since your previous statement was filed.
(New pump, enlarged diversion dam, location of diversion, etc.)
None.

G. Please answer only those questions below which are applicable to your project.

1. Conservation of water

a. Are you now employing water conservation efforts? YES X NO ___
Describe any water conservation efforts you have initiated: The District is a charter member of CUWCC and is in compliance with BMPs.

b. If you are claiming credit for water conservation under section 1011 of the Water Code for your claimed pre-1914 appropriative right, please show the amount of water conserved:

Reduction in Diversions:
Year ____ _____ (AF/MG) Year ____ _____ (AF/MG) Year ____ _____ (AF/MG)

ST-SUPPL (4-09)

Reduction in consumptive use:
Year ____ _____ (AF/MG) Year ____ _____ (AF/MG) Year ____ _____ (AF/MG)

I have data to support the above surface water use reductions due to conservation efforts. YES ____ NO ____

2. Water quality and wastewater reclamation

   a. Are you now or have you been using reclaimed water from a wastewater treatment facility, desalination facility or water polluted by waste to a degree which unreasonably affects such water for other beneficial uses? YES X NO ____.

   b. If you are claiming credit due to the substitution of reclaimed water, desalinated water or polluted water in lieu of a claimed pre-1914 appropriative right under section 1010 of the Water Code, please show amounts of reduced diversions and amounts of substitute water supply used:

   Amount of reduced diversion:
   Year ____ _____ (AF/MG) Year ____ _____ (AF/MG) Year ____ _____ (AF/MG)

   State the type of substitute water supply: _____

   Amount of substitute water supply used:
   Year ____ _____ (AF/MG) Year ____ _____ (AF/MG) Year ____ _____ (AF/MG)
   I have data to support the above surface water use reductions due to the use of a substitute water supply. YES ____ NO ____.

3. Conjunctive use of surface water and groundwater

   a. Are you now using groundwater in lieu of surface water? YES ____ NO X.

   b. If you are claiming credit due to the substitution of groundwater for a claimed pre-1914 appropriative right under section 1011.5 of the Water Code, please show the amounts of groundwater used:
   Year ____ _____ (AF/MG) Year ____ _____ (AF/MG) Year ____ _____ (AF/MG)
   I have data to support the above surface water use reductions due to the use of groundwater. YES ____ NO ____.

I understand that it may be necessary to document the water savings claimed in "F" above if credit under Water Code sections 1010 and 1011 is sought in the future.

I declare that the information in this report is true to the best of my knowledge and belief.

ITEM	CONTINUATION

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. After the formation of the California Water Commission back on December 19, 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same water shed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by a riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

RE: Supplemental Statement of Water Diversion and Use - No.4745

This concerns the Statements of Water Diversion and Use filed by the Marin Municipal Water District (MMWD). MMWD was formed in 1912 and was the first municipal water district formed under the Municipal Water District Act of 1911. Soon after its formation, the District began purchasing the assets, including the water rights, of the various private water companies that had been providing water to Marin County since the 1860s. Since the then existing water development in the county was insufficient to meet water demand, the District also developed a long-term, phased plan to utilize the water resources of Lagunitas Creek to meet the future water needs of the District. This plan, adopted by the District in 1913, was implemented by the District over the following 40 years.

Early MMWD operations depended on water rights acquired from the District's predecessor water agencies. These rights included diversions at: Lake Lagunitas, dating from 1878; Phoenix Lake, from 1906; and, from a series of springs on Mount Tamalpais, dating from 1894. When the District started, in 1914, to develop its supplemental water supply system on Lagunitas Creek it relied on a water right held by a predecessor with a priority date of 1906. However, when, in 1940, the District began the third stage of its Lagunitas Creek water supply system, it elected to obtain appropriative water rights for the same water covered by its 1906 water right. As other phases of the District's project were constructed, the District obtained additional appropriative water rights, even though water use by these additional phases was still within the limits of the original 1906 water right. These appropriative rights filings were intended to clarify and supplement the District's water rights on Lagunitas Creek, not to replace the District's pre-1914 rights.

An Equal Opportunity/Affirmative Action Employer

However, in the 1960s, when Supplemental Statements of Water Diversion and Use for pre-1914 uses were first provided for, the District did not file Statements for its 1906 Lagunitas Creek rights. Since the District held appropriative rights for the same water, it believed that filing the Statements would be confusing and chose, instead, to report its water diversion and use via permittee progress reports. Consequently, the District has, over the years, filed Statements of Water Diversion and Use only for Lake Lagunitas, Phoenix Lake and the Mount Tamalpais spring system, diversions for which the District has not sought appropriative permits.

In retrospect, this decision probably caused more confusion than it resolved. Therefore, the District is now filing Statements of Water Diversion and Use for its three lower Lagunitas Creek reservoirs, Bon Tempe Lake (State Dam No. 33-006), Alpine Lake (State Dam No.33-000) and Kent Lake (State Dam No. 33-007), for the period 1965 through 1992. In the future, the District will file tri-annual Statements for these projects at the same time it files its tri-annual Statements for Lake Lagunitas and Phoenix Lake.

Accordingly, attached are the tri-annual Supplemental Statements of Water Diversion and Use for Lake Lagunitas and Phoenix Lake and the Statements of Water Diversion and Use for the years 1966-92 for Bon Tempe Lake, Alpine Lake and Kent Lake. These Statements include some water use also reported on the annual Progress Reports for Appropriative Water Rights Permits Nos. 5633, 9390 and 18546. The District will, from now on, file both Progress Reports For Permittee and Statements of Water Diversion and Use for these facilities. The District will note on its Progress Reports that the reported usage is duplicative, not additive, of the amounts reported on the District's Statements of Water Diversion and Use for these facilities.

Lastly, when District staff were preparing the attached statements, a Statement of Water Diversion and Use, S-10139, dated October 21, 1980, was discovered in the District files. The Statement appears to be for the District's Kent Lake project but the figures presented do not correspond exactly to District records. The attached Statements of Water Diversion and Use supersede the data contained in S-10139. To avoid confusion, your office may wish to assign Statement numbers other than S-10139 to the attached statements.

If you have any questions or need more information on this subject, please call Mr. Dana Roxon at (415) 924-4600, extension 290.

Sincerely,

Ronald L. Johnson

STATEMENT OF WATER DIVERSION AND USE

S 4745

This statement should be typewritten or legibly written in ink.

A. Name of person diverting water Marin Municipal Water District
Address 220 Nellen Avenue, Corte Madera, California

B. Name of body of water at point of diversion Phoenix Lake 2-703-02-01-0
Tributary to Corte Madera Creek

C. Place of diversion Projected NW ¼ Section 7, Township 1N, Range 6W, M.D. B&M, ... County, or locate it on sketch of section grid on reverse side with regard to section lines or prominent local landmarks.

D. Name of works Phoenix Dam

E. Capacity of diversion works ..... cubic feet per second / gallons per minute
Capacity of storage reservoir 525 Ac. Ft. gallons / acre-feet
State quantity of water used each month in gallons or acre-feet

Year	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total Annual
	X	X	X	X	X	X	X	X	X	X	X	X	

If monthly and annual use are not known, check months in which water was used. State extent of use in units, such as acres of each crop irrigated, average number of persons served, number of stock watered, etc. Water not normally withdrawn from lake since use is for fishing etc. See F below.

Maximum annual water use in recent years ..... gallons / acre-feet
Minimum annual water use in recent years ..... gallons / acre-feet
Type of diversion facility: gravity X, pump .....
Method of measurement: weir ....., flume ....., electric power meter ....., water meter ....., estimate .....

F. Purpose of use (what water is being used for) Recreation use for fishing and scenic enjoyment, and also available as emergency standby storage for water supply.

G. General description or location of place of use (use sketch of section grid on reverse side if you desire)
Serves entire District - see attached map.

H. Year of first use as nearly as known 1905

I. Name of person filing statement William R. Seeger
Position Gen. Mgr. & Chief Eng. Organization Marin Municipal Water District
