| 2008 | ~~1500~~ | | | | | | | | | | | | |

D. **Quantity of Water Used:** The quantity of water used each month and entered in the table below is shown in units of:
Gallons X Million Gallons (MG) _____ Acre-feet (AF) _____

| Year | Jan | Feb | Mar | Apr | May | June | July | Aug | Sept | Oct | Nov | Dec | Total Annual |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| 2006 | 1500 | 1500 | 2500 | 3600 | 2500 | 9000 | 6000 | 6000 | 6000 | 2200 | 1900 | 1800 | 52 000 |
| 2007 | 1500 | 1500 | 2500 | 3600 | 2500 | 9000 | 6000 | 6000 | 6000 | 2200 | 1900 | 1800 | 52000 |
| 2008 | 1500 | 1500 | 2500 | 3600 | 2500 | 9000 | 6000 | 6000 | 6000 | 2200 | 1900 | 1800 | 52000 |

E. **Purpose of Use** – Specify number of acres irrigated, stock watered, persons served, etc.

Irrigation ~~[illegible]~~ 15 acres; Stockwatering _____; Domestic ~~[illegible]~~ 2 People
Other (specify) _____

Parcel Number(s) of Place of Use: _____

F. **Changes in Method of Diversion** – Describe any changes in your project since your previous statement was filed. (New pump, enlarged diversion dam, location of diversion, etc.)

G. Please answer only those questions below which are applicable to your project.

1. Conservation of water

a. Are you now employing water conservation efforts? YES X NO ___
Describe any water conservation efforts you have initiated: Manual control

b. If you are claiming credit for water conservation under section 1011 of the Water Code for your claimed pre-1914 appropriative right, please show the amount of water conserved:

Reduction in Diversions:
Year ____ _____ (AF/MG) Year ____ _____ (AF/MG) Year ____ _____ (AF/MG)

Reduction in consumptive use:
Year _____ _____ (AF/MG) Year _____ _____ (AF/MG) Year _____ _____ (AF/MG)

I have data to support the above surface water use reductions due to conservation efforts. YES _____ NO X

2. Water quality and wastewater reclamation

   a. Are you now or have you been using reclaimed water from a wastewater treatment facility, desalination facility or water polluted by waste to a degree which unreasonably affects such water for other beneficial uses? YES _____ NO X.

   b. If you are claiming credit due to the substitution of reclaimed water, desalinated water or polluted water in lieu of a claimed pre-1914 appropriative right under section 1010 of the Water Code, please show amounts of reduced diversions and amounts of substitute water supply used:

   Amount of reduced diversion:
   Year _____ _____ (AF/MG) Year _____ _____ (AF/MG) Year _____ _____ (AF/MG)

   State the type of substitute water supply: _____

   Amount of substitute water supply used:
   Year _____ _____ (AF/MG) Year _____ _____ (AF/MG) Year _____ _____ (AF/MG)
   I have data to support the above surface water use reductions due to the use of a substitute water supply. YES _____ NO _____.

3. Conjunctive use of surface water and groundwater

   a. Are you now using groundwater in lieu of surface water? YES _____ NO X.

   b. If you are claiming credit due to the substitution of groundwater for a claimed pre-1914 appropriative right under section 1011.5 of the Water Code, please show the amounts of groundwater used:
   Year _____ _____ (AF/MG) Year _____ _____ (AF/MG) Year _____ _____ (AF/MG)
   I have data to support the above surface water use reductions due to the use of groundwater. YES _____ NO _____.

I understand that it may be necessary to document the water savings claimed in "F" above if credit under Water Code sections 1010 and 1011 is sought in the future.

I declare that the information in this report is true to the best of my knowledge and belief.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. After the formation of the California Water Commission back on December 19, 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriate rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre 1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

**GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA**

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed or return flows from use of groundwater.

An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

"Statements of Water Diversion and Use"
"Information Pertaining to Water Rights in California"
"Water Rights for Stockponds Constructed Prior to 1969"
"Appropriation of Water in California"

# STATEMENT OF WATER DIVERSION AND USE

S 8050

*This statement should be typewritten or legibly written in ink.*

A. Name of person diverting water Peter Narvaez & Jeannette Narvaez
Address 4300 Wakerobin Dr. Glen Ellen 95442

B. Name of body of water at point of diversion Graham Canyon Creek
Tributary to Sonoma Creek

C. Place of diversion ..... ¼ ..... ¼ Section 17, Township 6-N, Range 6, Mt. Diablo B&M,
Sonoma County, or locate it on sketch of section grid on reverse side with regard to section lines or prominent local landmarks.

D. Name of works Graham Canyon Creek - Bordre Sonoma Mt. Rd.

E. Capacity of diversion works ..... cubic feet per second / gallons per minute
Capacity of storage reservoir 6,000 gal. gallons / acre-feet

State quantity of water used each month in gallons or acre-feet

| Year | Jan. | Feb. | Mar. | Apr. | May | June | July | Aug. | Sept. | Oct. | Nov. | Dec. | Total Annual |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | : | : | : | : | : | : | : | : | : | : | : | : | : |

If monthly and annual use are not known, check months in which water was used. State extent of use in units, such as acres of each crop irrigated, average number of persons served, number of stock watered, etc. All year residence
14.6 acres bounded by Graham Canyon Creek (West)

Maximum annual water use in recent years ..... gallons / acre-feet
Minimum annual water use in recent years ..... gallons / acre-feet

Type of diversion facility: gravity ..... (pump)

Method of measurement: weir ....., flume ....., electric power meter ....., water meter ..... (estimate)

F. Purpose of use (what water is being used for) Household, gardens & trees etc.

G. General description or location of place of use (use sketch of section grid on reverse side if you desire)
14.6 ac. fronting on Graham Canyon Crk.

H. Year of first use as nearly as known 1941

I. Name of person filing statement Peter Narvaez & Jeannette Narvaez
Position ..... Organization .....
Address 4300 Wakerobin Dr. Glen Ellen

*I certify that the foregoing statements are true and correct to the best of my knowledge and belief.*

Date signed 2-9-1973 Signature Jeannette Narvaez
