E. **Purpose of Use** – Specify number of acres irrigated, stock watered, persons served, etc.

Irrigation 15,550 acres; Stockwatering _____; Domestic _____;
Other (specify) _____

Parcel Number(s) of Place of Use: _____

F. **Changes in Method of Diversion** – Describe any changes in your project since your previous statement was filed.
(New pump, enlarged diversion dam, location of diversion, etc.)

_____

G. Please answer only those questions below which are applicable to your project.

1. Conservation of water

a. Are you now employing water conservation efforts? YES ___ NO ___
Describe any water conservation efforts you have initiated: PIPE/LINE CANALS, CONVERSION FROM SURFACE TO LOW VOLUME IRRIGATION METHODS, URBAN/RURAL DEVELOPMENT

b. If you are claiming credit for water conservation under section 1011 of the Water Code for your claimed pre-1914 appropriative right, please show the amount of water conserved:

Reduction in Diversions:
Year 06 3650 (AF/MG) Year 07 3650 (AF/MG) Year 08 6041 (AF/MG)

Reduction in consumptive use:
Year 06 3650 (AF/MG) Year 07 3650 (AF/MG) Year 08 6041 (AF/MG)

I have data to support the above surface water use reductions due to conservation efforts. YES ✓ NO _____

2. Water quality and wastewater reclamation

a. Are you now or have you been using reclaimed water from a wastewater treatment facility, desalination facility or water polluted by waste to a degree which unreasonably affects such water for other beneficial uses? YES ✓ NO ____.

b. If you are claiming credit due to the substitution of reclaimed water, desalinated water or polluted water in lieu of a claimed pre-1914 appropriative right under section 1010 of the Water Code, please show amounts of reduced diversions and amounts of substitute water supply used:

Amount of reduced diversion:
Year 06 4000 (AF/MG) Year 07 4000 (AF/MG) Year 08 4000 (AF/MG)

State the type of substitute water supply: reclaimed surface/subsurface irrigation water

Amount of substitute water supply used:
Year 06 4000 (AF/MG) Year 07 4000 (AF/MG) Year 08 4000 (AF/MG)
I have data to support the above surface water use reductions due to the use of a substitute water supply. YES ✓ NO _____.

3. Conjunctive use of surface water and groundwater

a. Are you now using groundwater in lieu of surface water? YES ✓ NO _____.

b. If you are claiming credit due to the substitution of groundwater for a claimed pre-1914 appropriative right under section 1011.5 of the Water Code, please show the amounts of groundwater used:
Year 06 3212 (AF/MG) Year 07 6096 (AF/MG) Year 08 3212 (AF/MG)
I have data to support the above surface water use reductions due to the use of groundwater. YES ✓ NO _____.

I understand that it may be necessary to document the water savings claimed in "F" above if credit under Water Code sections 1010 and 1011 is sought in the future.

I declare that the information in this report is true to the best of my knowledge and belief.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. After the formation of the California Water Commission back on December 19, 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

SUPPLEMENTAL STATEMENT OF WATER DIVERSION AND USE FORM

D. Quantity of Water Used:

PLEASE NOTE: Patterson Irrigation District is unable to divert all of the water to which it is entitled from the San Joaquin River pursuant to its Pre-1914 appropriative rights for several reasons. First, water levels during the summer period have been reduced by operation of the Central Valley Project Friant Division, and low water levels prevent the district from pumping the full diversion amount to which it is entitled. Additionally, pumping and mechanical failures during the irrigation season sometimes limit the district's ability to utilize its Pre-1914 appropriative rights. Also, water quality problems restrict the use of the district's Pre-1914 appropriative water rights for some purposes. PID obtains water from the Central Valley Project (both project and non-project water) to accommodate for these problems. These additional amounts of water provided by the CVP should be added to the total amount of water appropriated by the district.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:
