

State Water Resources Control Board

April 2, 2020

Order Recipients Specified in Attachment A

State Water Resources Control Board

APPROVAL OF EXTENSION OF DEADLINES FOR SUBMITTING SITE-SPECIFIC CHROME PLATING WORK PLANS TO DETERMINE THE PRESENCE OF PER- AND POLYFLUOROALKYL SUBSTANCES (PFAS) SUBJECT TO THE OCTOBER 11, 2019 STATE WATER RESOURCES CONTROL BOARD ORDER# WQ 2019-0045-DWQ

This letter serves to approve an additional 60-day extension for submitting Work Plans subject to State Water Resources Control Board's (State Water Board) Order# WQ 2019-0045-DWQ for the Determination of the Presence of Per- and Polyfluoroalkyl Substances (PFAS) at Chrome Plating Facilities, dated October 11, 2019 (Order). This extension is granted to the members listed in five letters dated March 12, 2020 from the Metal Finishing Association of Southern and Northern California (MFASC/MFANC) to the San Francisco, Los Angeles, Central Valley, Santa Ana, and San Diego Regional Water Quality Control Boards (Regional Water Boards). Work Plans must be submitted to the Regional Water Boards no later than May 29, 2020. No further extensions will be granted.

The Order requires 271 suspected chrome plating facilities to submit a questionnaire or a work plan and final sampling and analysis report to the applicable Regional Water Board for a one-time preliminary site investigation of PFAS impacts to soil, groundwater, stormwater runoff, and/or effluent wastewater. The Order allows a time extension for good cause.

Background

The State Water Board issued a letter on November 22, 2019 approving an extension to the due dates for submitting the questionnaires to January 24, 2020 and the Work Plans to March 31, 2020. MFASC/MFANC requested the extension to allow facilities to conduct further reviews to complete the questionnaire accurately, to allow for additional time for the MFASC/MFANC to develop a "model work plan" and to provide time to understand the Order requirements. The State Water Board met with MFASC/MFANC from December 2019 through February 2020 to provide clarifications to the Order requirements and to answer questions. During this process, the MFASC/MFANC developed a Work Plan template and Sampling and Analysis Plan and distributed them to their members in late February 2020.

On March 12, 2020, MFASC/MFANC submitted a letter requesting an additional 120- day extension to the compliance deadlines for the Work Plan for their member facilities. This extension request states that their member facilities need additional time to comply with the Order because consultants are backlogged with other obligations, consultant fees are more expensive than anticipated, and each facility needs more time to complete the procurement process to vet viable consultants for the work. MFASC/MFANC also stated that the situation is exacerbated by the recent and growing challenges the businesses are now facing with Coronavirus 2019 [COVID-19].

The new due date for Work Plans to be submitted to the Regional Board is extended to May 29, 2020. As stated above, no further extensions will be granted.

If you have any questions or need additional information, please contact the following based on the location of the member facility within each Regional Water Board:

| Region | Name | Email Address | Phone Number |
|------------------------------|-------------------|--------------------------------------|----------------|

Chris Flower
 State Water Resources Control Board
 Central Valley Region – Chrome Platers
 Via email: Chris.Flower@waterboards.ca.gov

Dear Mr. Flower -

The Metal Finishing Association of Southern California \ Metal Finishing Association of Northern California requests a 120-day delay in the deadline for our member facilities that are located within your Regional Board for submittal of site assessment work plans as required by Order WQ 2019-0045-DWQ that has been issued by the State Water Resources Control Board.

This request is being submitted because, as these member facilities work towards compliance with the order, they are finding that the consultants are backlogged with other obligations to which they have already committed, that the fees being quoted are more expensive than anticipated, and that the effort will take longer than expected. Each facility needs more time to complete the

procurement process to vet viable consultants for this work. The situation is exacerbated by the recent and growing challenges the businesses are now facing with the rapidly-spreading Coronavirus 2019 [COVID-19].

This request is within the context of our association working together in a collaborative manner with the state board on this order. This includes the development of the templates for the site assessment work plan that are intended to assist our members.

Attached please find the list of our member facilities in your region.

Thank you for your consideration of our request. We would be pleased to discuss at your convenience.

Sincerely,

Bryan Leiker

Alec Naugle

State Water Resources Control Board
 San Francisco Bay Region – Chrome Platers
 Via email: Alec.Naugle@waterboards.ca.gov

Dear Mr. Naugle -

The Metal Finishing Association of Southern California \ Metal Finishing Association of Northern California requests a 120-day delay in the deadline for our member facilities that are located within your Regional Board for submittal of site assessment work plans as required by Order WQ 2019-0045-DWQ that has been issued by the State Water Resources Control Board.

This request is being submitted because, as these member facilities work towards compliance with the order, they are finding that the consultants are backlogged with other obligations to which they have already committed, that the fees being quoted are more expensive than anticipated, and that the effort will take longer than expected. Each facility needs more time to complete the

procurement process to vet viable consultants for this work. The situation is exacerbated by the recent and growing challenges the businesses are now facing with the rapidly-spreading Coronavirus 2019 [COVID-19].

This request is within the context of our association working together in a collaborative manner with the state board on this order. This includes the development of the templates for the site assessment work plan that are intended to assist our members.

Attached please find the list of our member facilities in your region.

Thank you for your consideration of our request. We would be pleased to discuss at your convenience.

Sincerely,

Bryan Leiker
