Sacramento, CA 95812-0100

Subject: Comment Letter on Proposed Drought Emergency Regulations

The Truckee Donner PUD would like to strongly urge the State Water Resources Control Board to not implement a state-wide, one-size-fits-all solution since the unintended consequences could be significant to urban water suppliers. In the Truckee Donner PUD's case, we are responding to the drought and have an active conservation campaign, but we are not in a water supply shortage situation at this time. To impose restrictions would create an undue hardship and the restrictions would not be reasonable in many cases. Emergency water regulations should only be considered for regions that are experiencing an actual water supply shortage and where the urban water supplier has not taken appropriate actions.

Sincerely,

Michael D. Holley
General Manager
