**Subject:** Re: Message to RTDOT re: NMFS interim concurrence on TUCP

All,

This email also provides interim concurrence with the July 1 TUCP commencing tomorrow. We are working on a TUC order. This interim concurrence is not meant to provide any assurance about the contents of the final July 1 TUC Order.

> As discussed on RTDOT phone calls this week, the email provides interim concurrence for operations to commence tomorrow, July 1st, as described in the TUCP, and accompanying request for concurrence under the federal ESA. We are still reviewing the submittal (TUCP and Revised Shasta Temperature Plan) we received on Friday from Reclamation, and intend to take final action on the package within the next day or two. In the interim, we have worked closely on the package and have all the information to conclude at this time that interim operations according to the TUCP, specifically the modified outflow standards, are not likely to jeopardize the species that we are responsible nor adversely modify their critical habitat.
