

State Water Resources Control Board

February 27, 2024

Ms. Katherine Rubin
Director of Environmental Affairs
Los Angeles Department of Water and Power
Post Office Box 51111
Los Angeles, CA 90051-5700

Dear Ms. Rubin:

RE: INVOICE FOR THE 2021-2022 INTERIM MITIGATION PERIOD FOR HAYNES GENERATING STATION - ONCE-THROUGH COOLING POLICY

This letter serves as an invoice for Haynes Generating Station's interim mitigation payment for the operating period of October 1, 2021 through September 30, 2022 (2021-2022 interim mitigation period). The final determination calculating the interim mitigation payment is included as Attachment A.

The State Water Resources Control Board's (State Water Board) Statewide Water Quality Control Policy on the Use of Coastal and Estuarine Waters for Power Plant Cooling (Once-Through Cooling or OTC Policy) requires owners or operators of existing power plants to implement measures to mitigate interim impingement and entrainment impacts resulting from their cooling water intake structures. The interim mitigation period commenced on October 1, 2015, and continues up to and until owners or operators achieve final compliance with the OTC Policy. Section 2.C(3) of the OTC Policy provides options for demonstrating compliance with the interim mitigation requirements.

As stated in the 2015-2016 Final Determination for Haynes Generating Stationⁱ, Los Angeles Department of Water and Power (LADWP) elected to comply with the interim mitigation requirements in Section 2.C(3)(b) of the OTC Policy. Under this option, LADWP demonstrates compliance with interim mitigation by providing funding to the Ocean Protection Council (OPC) or State Coastal Conservancy (Conservancy) to fund appropriate mitigation projects.

On April 14, 2020, the State Water Board received a letter from LADWP requesting that future interim mitigation funds required by the OTC Policy from Haynes Generating Station be dedicated to restoration efforts for local wetlands. Staff from the State Water

ⁱ [2015-2016 Final Determination for Haynes Generating Station](#)

Board, OPC, and Conservancy agreed to allocate a total of \$6 million of the interim mitigation funds received from Haynes Generating Station from October 1, 2018 to the facility's OTC Policy compliance date to restoration projects in the greater Los Angeles area. This \$6 million is approximately 70 percent of the funds the OPC is presently projected to receive from Haynes Generating Station in this timeframe. Specifically, the funds will be used for the restoration of Los Cerritos Wetlands Complex from the Southern California Wetland Recovery Project work plan. The remaining 30 percent will be used to support other critical priorities for the Marine Protected Areas Management Program, which will benefit the Los Angeles area and other regions affected by once-through cooling.

The State Water Board calculated the interim mitigation payment for the 2021-2022 interim mitigation period for Haynes Generating Station using information provided by LADWP in its April 20, 2023 information response letter. The annual interim mitigation payment is the sum of three components: an entrainment payment, an impingement payment, and a management and monitoring payment. The interim mitigation payment for Haynes Generating Station for the operating period of October 1, 2021 through September 30, 2022 is \$1,089,677.84.

LADWP has 60 days from receipt of this letter to make this payment to the Natural Resources Agency's Ocean Protection Council. When submitting this payment, include a cover letter that identifies the National Pollutant Discharge Elimination System number for Haynes Generating Station and copy Karen Mogus, Deputy Director of the Division of Water Quality at the State Water Board. Please make the check payable to the Natural Resources Agency and send to:

California Natural Resources Agency

Attachment A – Final Determination for Haynes Generating Station

**FINAL 2021 - 2022 DETERMINATION TO APPROVE MITIGATION MEASURES
FOR THE WATER QUALITY CONTROL POLICY ON THE USE OF
COASTAL AND ESTUARINE WATERS FOR POWER PLANT COOLING:**

**HAYNES GENERATING STATION
OCTOBER 1, 2021, THROUGH SEPTEMBER 30, 2022**

Interim Mitigation Requirements and Determinations

The State Water Resources Control Board's (State Water Board) Water Quality Control Policy on the Use of Coastal and Estuarine Waters for Power Plant Cooling (also known as the Once-Through Cooling or OTC Policy) requires owners or operators of existing power plants to implement measures to mitigate interim impingement and entrainment impacts resulting from their cooling water intake structures. The interim mitigation period commenced on October 1, 2015, and continues up to and until owners or operators achieve final compliance with the OTC Policy.

The State Water Board approved Haynes Generating Station's continued request to comply with the interim mitigation measures described in Section 2.C(3)(b) and Section 2.C(3)(e) of the OTC Policy in the Final Determination for the October 1, 2020, to September 30, 2021 interim mitigation period (2020-2021 Final Determination).

In the sections below, the State Water Board calculated Haynes Generating Station's interim mitigation payment for October 1, 2021, through September 30, 2022 (also known as the 2021-2022 determination period). This calculation is consistent with the methods and calculations applied in the 2020-2021 Final Determination. Consistent with Resolution No. 2015-0057ⁱⁱ and the recommendations in the Expert Review Panel's Final Reportⁱⁱⁱ, the interim mitigation payment is comprised of an entrainment payment, an impingement payment, and a management and monitoring payment.

Interim Mitigation Payment Calculation for Haynes Generation Station

Entrainment Payment Calculation

To calculate the portion of the interim mitigation payment to offset entrainment impacts, the State Water Board used the default average cost of entrainment determined in the Expert Review Panel's Final Report. Consistent with Resolution No. 2015-0057 and the Expert Review Panel's Final Report, the State Water Board used a three percent escalator to update the average cost of entrainment from the 2020-2021 Final

ⁱⁱ [Resolution No. 2015-0057](#)

ⁱⁱⁱ [Expert Review Panel's Final Report](#)

Determination to 2022 dollars to account for inflation. The resulting average default entrainment cost for October 1, 2021, through September 30, 2022, increased from \$5.49 per million gallons (MG) to \$5.65/MG:

$$(\$5.49/\text{MG} \times 0.03) + \$5.49/\text{MG} = \$5.65/\text{MG}$$

In its April 20, 2023 letter, the Los Angeles Department of Water and Power (LADWP) provided the intake volume for Haynes Generating Station for the 2021-2022 determination period of 160,719 MG. The State Water Board verified the intake volume with the data submitted in the National Pollutant Discharge Elimination System permit monitoring reports for Haynes Generating Station.

To calculate the entrainment payment, the State Water Board multiplied the intake volume by the updated average default cost of entrainment:

$$\$5.65/\text{MG} \times 160,719 \text{ MG} = \$908,062.35$$

Impingement Payment Calculation

In its April 20, 2023 letter, the LADWP provided the total fish impingement biomass for Haynes Generating Station for the 2021-2022 determination period of 3.146 pounds. The State Water Board calculated the impingement payment using the estimated total pounds of fish impinged multiplied by the average indirect economic value of the fisheries as determined in the Expert Review Panel's Final Report of \$0.80 per pound:

$$\$0.80/\text{pound} \times 3.146 \text{ pounds} = \$2.52$$

Management and Monitoring Payment Calculation

The State Water Board calculated the management and monitoring payment by taking twenty percent of the sum of the entrainment and impingement payments:

$$0.20 \times (\$908,062.35 + \$2.52) = \$181,612.97$$

State Water Board's Final Determination for Haynes Generating Station

Based on the sum of the entrainment, impingement, and management and monitoring payment calculations, the total payment to fulfill the interim mitigation obligation for the LADWP's Haynes Generating Station for the interim mitigation period of October 1, 2021, to September 30, 2022, is \$1,089,677.84.

$$\$908,062.35 + \$2.52 + \$181,612.97 = \$1,089,677.84$$
