

Dear Jessica,

I would like to be as clear as possible with you. I work 7 days a week. I rarely take a day off and I know that is not the healthiest of lifestyles. I just want you to know that I am putting everything I am and have into my farm. I cannot stress enough how important it is that I be allowed to stay in business. I am very passionate about what I do and I am only taking time off from cutting down weeds on a Saturday to let you know that this situation is always on my mind and that I really need your help. I will be thinking about the water situation frequently tomorrow as I prune my trees to reduce their size and water needs. I will be thinking about it all next week as I attend meetings to deal with the asian citrus psyllid in citrus and the shot hole borer in avocados. I will be thinking about it as I work on various farms during the week doing inspections for my other source of income. Most importantly I will be thinking about it every time I turn on water on my baby trees to keep them alive and growing.

Sincerely,

Enrico
