NOTICE IS HEARBY GIVEN that the State Water Resources Control Board (State Water Board), Division of Water Quality, Site Cleanup Unit staff will hold two public scoping meetings for a proposed amendment to State Water Board [Resolution No. 92-49](#) (as amended on April 21, 1994, and October 2, 1996) to include requirements for the investigation and assessment of vapor intrusion at cleanup sites statewide. The purpose of the scoping meetings is to receive input on the range of project actions, alternatives, reasonably foreseeable methods of compliance, significant impacts to be analyzed, cumulative impacts if any, and mitigation measures that will reduce impacts to a less than significant level; and to eliminate from detailed study issues found not to be important from the draft Substitute Environmental Document (SED). The SED will be prepared in accordance with the requirements of State Water

E. JOAQUIN ESQUIVEL, CHAIR | EILEEN SOBECK, EXECUTIVE DIRECTOR

Board's certified California Environmental Quality Act regulatory program and will provide an analysis of any significant or potentially significant adverse environmental impacts resulting from the proposed amendment pursuant to California Code of Regulations, title 23, section 3777.

Two separate virtual meetings with the same presentation will be held to allow schedule flexibility. The meetings will provide an overview of the draft amendment and an opportunity for the public to provide oral and written comments. A public comment period and public hearing will also be held regarding the draft amendment at a later date.

Written comments may be submitted in accordance with the instructions set forth below by **12:00 p.m. PDT (noon) on May 9, 2022**.

Project Description

The State Water Board proposes to amend State Water Board Resolution No. 92-49 to include requirements for the investigation and assessment of vapor intrusion from vapor-forming chemicals. Vapor intrusion is a frequent problem at contaminated sites statewide. If left uncontrolled, chemical vapors can pose a significant health risk to communities living on and near contaminated sites. Vapor migration from the subsurface into buildings is complex which can cause an underestimation of vapor concentrations indoors. To control or prevent vapor migration into existing buildings or for future development, sites must first be assessed or screened for vapor intrusion risk.

Currently, vapor intrusion assessments are conducted on a case-by-case basis, using applicable guidance as appropriate. The proposed amendment to State Water Board Resolution No. 92-49 would establish state policy for water quality control that requires the use of an expeditious, consistent, and protective approach using statewide data for assessing vapor intrusion risk.

Language Services

To request language interpretation or sign language services, please submit your request at least 10 business days before the meeting by contacting Marina Perez at (916) 322-4265 or marina.perez@waterboards.ca.gov.
