Project Name:

L6001 MP23.88 Recoat Project, located in Riverside County, California
WDID No.: 7A133174001, RM: 450558, Place ID: 884886

Receiving Water:

Unnamed wash (ephemeral stream)

Location:

City or area: Located approximately 8 miles north of the City of Niland, in
unincorporated Riverside County, California 92257

Latitude/Longitude: 33.35565°N, - 115.48299°W

Section, Township, Range: Section 26, Township 9 South, Range 42 East

Project Description:

The Southern California Gas Company (SoCalGas) has identified a 100-foot segment of 10-inch pipeline, located at Mile Post 23.88 (MP23.88) along the right-of-way (ROW) for Line 6001 (L6001), that needs to be excavated and recoated to provide sufficient cathodic protection. Cathodic protection is necessary to help prevent corrosion from occurring on the exterior of the pipeline and is mandated by the Department of Transportation (DOT). The current cathodic protection at this location is considered out of tolerance by the DOT and needs to be addressed to ensure pipeline safety.

SoCalGas proposes to excavate, sand blast, and recoat the pipeline. Equipment that will be used includes pick-up trucks, portable generators, forklifts, water trucks, side boom, excavator, air-compressor, vacuum truck, welding truck, crane, and backhoe. The work and staging areas are estimated at 150-foot by 50-foot. All work will occur

within the SoCalGas pipeline ROW. Crews of approximately ten persons will be working at the site for about 3 weeks.

Anticipated Project Start and End Dates:

March 2023 – April 2023

US Army Corps of Engineers Nationwide Permit Number(s):

n/a
