IN THE MATTER OF THE DETERMINATION OF)
THE RIGHTS OF THE VARIOUS CLAIMANTS TO)
THE WATER OF NORTH FORK OF PIT RIVER AND)
ALL ITS TRIBUTARIES EXCEPT FRANKLIN CREEK,)
IN MODOC COUNTY, CALIFORNIA.)

No. 4074

JUDGMENT AND DECREE

The above entitled proceeding came on regularly for hearing, trial and determination on the 16th day of May, 1939, before the above entitled court and was duly and regularly continued for further hearing, trial and determination to August 24, 1939; Hardin Barry, Esq., appearing as attorney for exceptors, Georgia M. Jones, John B. Faulkner and John Noble Jones; J. S. Henderson, Esq., appearing as attorney for claimants, Harry Russell and Ella Russell, and J. M. Royce; R. A. Laird, Esq., appearing as attorney for claimants, Sarah Laird, Eda V. Laird, James R. Laird, Mildred (Laird) Kenfield and Fannie F. Laird; Spencer Burroughs, Esq. and J. L. Young, Esq., appearing as attorneys for the Division of Water Resources of the Department of Public Works, State of California; all other claimants in said proceeding having been duly and regularly notified of said hearing, trial and determination and having failed to appear at said hearing, trial and determination, and having thereby waived findings of fact and conclusions of law; evidence both oral and documentary having been introduced and the evidence having been closed and the matter having been submitted for decision; the Court having heretofore made and entered orders herein, as hereinafter set forth in paragraph 14, substituting certain parties and amending the order of determination filed herein by the Division of Water Resources of the Department of Public Works, State of California; the Court having made and filed herein its findings of fact and conclusions of law; and the court being fully advised in the premises, now therefore,

IT IS HEREBY ORDERED, ADJUDGED AND DECREED as follows:

1. The exceptions to said order of determination are overruled, denied and dismissed and said order of determination as heretofore amended by the Court is affirmed and adopted as the basis for the decree of this Court

determining and establishing the several rights in and to the use of the waters of the North Fork of Pit River and all its tributaries, except Franklin Creek.

2. All of the rights hereinafter set forth are subject to all definitions, limitations and provisions hereinafter set forth under the heading, "GENERAL DEFINITIONS, LIMITATIONS AND PROVISIONS".

HISTORY OF SAID PROCEEDING

3. The above entitled proceeding was initiated by Frank McArthur who on March 5, 1936, duly filed a petition with said Division of Water Resources, for determination in accordance with the provisions of the water commission act, of the rights of the various claimants in and to the use of the waters of the North Fork of Pit River and all its tributaries, except Franklin Creek.

4. Upon investigation said Division of Water Resources found the facts and conditions to be such that the public interest and necessity would be served by the determination petitioned for. On March 6, 1936, by order duly given and made, said Division of Water Resources granted said petition, and thereafter duly gave notice by publication as provided by law, setting forth the fact of the entry of the aforesaid order and of the pendency of said proceeding, specifying the date upon which said Division of Water Resources would begin its examination of said stream system, to wit, April 15, 1936, and prescribing and requiring all claimants to rights in and to the use of the waters of said North Fork of Pit River and all its tributaries, except Franklin Creek, to make proof of their claims in the manner provided by law.

5. At the time set in said notice said Division of Water Resources began its investigation of the flow of said North Fork of Pit River and all its tributaries, except Franklin Creek, and of the conduits diverting water, and of the lands irrigated or irrigable therefrom, and proceeded to gather all other data and information essential to the proper determination of the rights in and to the use of the waters therefrom, and thereafter said Division of Water Resources reduced its observations, data, information and measurements to writing and executed surveys and prepared maps from the observations of such surveys in accordance with uniform rules and regulations duly and regularly adopted by said Division of Water Resources, which surveys and maps showed with substantial accuracy the course of the streams involved in said proceeding, the location of

each conduit diverting water therefrom, land irrigated and capable of being irrigated by each conduit, and the kind of culture upon said irrigated lands. Said maps were prepared by said Division of Water Resources as the surveys and observations progressed, and when completed were duly and regularly filed and made of record in the office of said Division of Water Resources.

6. A conference of the various claimants included in said proceeding and their representatives was called by said Division of Water Resources on March 31, 1937, at Alturas, in said county and state, for the purpose of presenting the data that had been collected prior to that time by said Division of Water Resources. After discussing the matter at said conference, an agreement based upon the data collected by said Division of Water Resources, was entered into by all claimants in said proceeding, which agreement provided a plan of trial distribution of the waters of the North Fork of Pit River and all its tributaries, except Franklin Creek, during the 1937 season pursuant to the provisions of Section 10a of said water commission act. Said plan of distribution was to be operative during the 1937 season only, and it was provided therein that the rights of said claimants should in no manner be prejudiced by such distribution of water. Said agreement provided that said Division of Water Resources should supervise said plan of distribution through the agency of a water master and that said Division of Water Resources should have power and authority to modify said plan, if any defects in said plan became revealed through operation thereof during the course of said season. Said plan of distribution, as modified and improved during the course of operation thereof, was considered by claimants in said proceeding to correctly show the status, measure and relation of the relative rights involved in said proceeding. The proofs filed by claimants in said proceeding as hereinafter set forth in paragraph 5 were based upon said modified plan of distribution. Operation of said modified plan of distribution was continued through the 1938 season pursuant to an agreement entered into by said claimants on March 17, 1938.

7. Upon the completion of the aforesaid measurements and maps and after filing of said observations, data, information and measurements, as aforesaid, said Division of Water Resources, by order duly given and made, gave notice by publication thereof as provided by law, setting forth the date prior to which proofs to be furnished by claimants, in and to the use of the waters

involved in said proceeding, were required to be filed with said Division of Water Resources, and said Division of Water Resources gave like notice and enclosed therewith forms of proofs as required by said water commission act, by registered mail, with postage fully prepaid thereon, to each claimant to rights in, and to the use of the waters involved in said proceeding, insofar as such claimant could be reasonably ascertained at his last known place of address. Thereafter the time allowed within which proofs might be filed was extended by order duly given and made by said Division of Water Resources, to and including January 15, 1938, and within said period as so extended claimants herein duly filed with said Division of Water Resources proofs of their respective rights in and to the use of the waters involved in said proceeding.

8. After the filing of proofs by claimants as aforesaid, and after the expiration of the time fixed by said Division of Water Resources for the filing of said proofs, said Division of Water Resources duly assembled all proofs which had been filed, and prepared and duly certified an abstract of all said proofs, and duly caused the same to be printed in accordance with the provisions of said water commission act, and thereafter by order duly given and made, prepared a notice fixing and setting a time and place convenient to the claimants when and where evidence taken by or filed with said Division of Water Resources would be open to inspection for a period of not less than ten days; and a copy of said notice together with a printed copy of said abstract of proofs, was thereafter, and more than fifteen days prior to the first day prescribed in said order as the commencement of the period of such inspection, duly mailed by registered mail, with the postage fully prepaid thereon, to each claimant who had appeared and filed proofs as required by said water commission act, and thereafter and in accordance with said notice and with said water commission act, all of the evidence taken by or filed with said Division of Water Resources was open for inspection at the times and in the places and for the period designated in said notice, and any and all persons during said period were permitted to inspect such evidence and proofs in conformity with the provisions of said water commission act, and during all of said period of inspection, a representative of said Division of Water Resources was present.

9. Two contests of claims were filed with said Division of Water Resources within fifteen days after said evidence and proofs were opened to

public inspection in conformity with the provisions of Section 34 of said water commission act; within ten days after the receipt of the notices of each of said contests, said Division of Water Resources notified by registered mail the contestants and the claimants respectively involved in each of said contests of the respective time and place fixed for hearing the matter of said contest, each of said times being fixed not less than fifteen nor more than sixty days from the respective time said Division of Water Resources mailed said notice of hearing in conformity with Section 35 of said water commission act; and both of said contests were withdrawn by contestants prior to the time fixed for said contest hearings.

10. Said Division of Water Resources duly made and entered on February February 10, 1939, its order finding, determining and establishing the several rights in and to the use of the waters of said North Fork of Pit River and all its tributaries, except Franklin Creek, which said order was entered of record in the office of said Division of Water Resources in Book 1, Orders of Determination, at page 484, which said order was duly certified by said Division of Water Resources. Thereafter said Division of Water Resources caused said order of determination so certified to be printed in the State Printing Office and a copy thereof to be sent by registered mail, with the postage fully prepaid, to each person who had filed proof of claim, and to each person who had become interested through intervention in said proceeding under the provisions of said water commission act, in all respects as provided thereby and in conformity therewith.

11. At the time of submission of said proofs, said Division of Water Resources collected the fees due thereon, as prescribed in Section 32 of said water commission act, and after the time of mailing its order of determination as aforesaid, computed the entire cost incurred in performing the duties prescribed in Sections 26 to 36 of said water commission act, and duly apportioned the amount by which said entire cost exceeded the total amount received on account of fees paid at the time of filing said proofs among all claimants according to the method of apportionment provided in Section 32 of said water commission act, and in all respects in conformity therewith, and duly mailed notice of the assessment of additional charges by registered mail to each

claimant, said notice including a statement of the total sum assessed and of the sum assessed against each claimant in said proceeding.

12. After the entry of said order of determination as aforesaid, and on March 20, 1939, a certified copy thereof, together with the original evidence filed with or taken by said Division of Water Resources, all duly certified by said Division of Water Resources, was filed with the clerk of the Superior Court of the State of California, in and for the County of Modoc. Upon the filing of said certified copy of said order and evidence with the clerk of said Court, and on March 20, 1939, said Division of Water Resources procured an order from said Court setting May 16, 1939, at 10:00 o'clock in the morning of said day, in the courtroom of said Court in the City of Alturas in said County and State, as the time and place for hearing on said order of determination, and requiring and prescribing that on or before ten days prior thereto all parties in interest aggrieved or dissatisfied with said order of determination, should file with the clerk of said Court notice of exceptions to said order of determination. Said Division of Water Resources thereupon procured from the clerk of said Court a certified copy of said order of said Court setting said time and place for hearing as aforesaid, and forthwith said Division of Water Resources mailed a copy of such certified copy of said order of said Court by registered mail, with postage fully prepaid thereon, addressed to each known party in interest at his last known place of residence, in all respects as required by said water commission act, and duly caused said certified copy of said order to be published as required by said water commission act, and duly filed with the clerk of said Court proof of such service by registered mail and publication.

13. Within the time and in the manner as provided by Section 36b of said water commission act, Georgia M. Jones, United States Indian Service, John B. Faulkner and John Noble Jones, being aggrieved or dissatisfied with said order of determination of said Division of Water Resources, jointly filed in writing with the clerk of this Court, notice of exceptions and objections to said order of determination. They excepted to the priority and quantity of the allocation to Harry Russell and Ella Russell in first priority class in Schedule 6 of said order of determination, the particulars whereof more fully appear in the notice of said exceptions and objections on file in the above entitled proceeding

which said exceptions came duly and regularly on for hearing on May 16, 1939, at which time the exception on behalf of the United States Indian Service was withdrawn. Judge A. K. Wylie disqualified himself from hearing the exception of Georgis M. Jones, John B. Faulkner and John Noble Jones and duly and regularly continued the hearing to August 24, 1939, and after hearing, said exception was by this Court overruled, denied and dismissed.

14. The Court has heretofore made and entered orders herein as follows:

(a) That on page 17 the proviso at the end of paragraph 32 of said order of determination be changed to read as follows: "Provided however, when the total flow available for rediversion from Stony Canyon is equal to or less than 2.40 cubic feet per second, then said David Graham Reid and Mary C. Reid are entitled to receive all of the waters flowing in said Stony Canyon, except the quantity required for domestic purposes and garden irrigation on the lands of said J. M. Royce, and when said David Graham Reid and Mary C. Reid elect to so receive said total flow they shall be entitled thereto for a period of eight days, whereupon said J. M. Royce shall be entitled to said total flow for the remainder of the then current irrigation season"; and

(b) That on page 17 at the end of paragraph 52 of said order of determination the following provision be added: "and provided further, said David Graham Reid and Mary C. Reid are entitled to divert all or any portion of their allotment of 2.40 cubic feet per second hereinbefore set forth in this paragraph from the natural flow, if any, of said Stony Canyon in lieu of the diversion of a corresponding quantity of water from said Mile Creek"; and

(c) That on page 30 at the end of paragraph 47 of said order of determination, the following provisions be added: "and provided further, the allotment to W. E. Minard through Diversion 142, as set forth in said Schedule 8, shall be subject to the provisions of an agreement entered into on December 27, 1928, and recorded on December 28, 1928, on page 282 in Book 47 of Deeds of Madoc County; and provided further, Sarah Laird, Eda V. Laird, James R. Laird, Mildred (Laird) Kenfield, and Fannie F. Laird are entitled to a first right in the Laird Lateral of the North Fork Ditch (Diversion 139) to convey their allotment set forth after their names in said Schedule 8 to the lands described under their

names in said Schedule 1, and that B. F. Lynip, or his successor or successors in interest, and A. Bolliger and A. Keller, or their successor or successors in interest, are obligated to maintain said Laird Lateral with adequate capacity to carry any additional water, over and above the Laird Allotment, to the lands described under their names in said Schedule 1 and to deliver said Laird Allotment to said Laird lands without interference"; and

(d) That on page 23, line 4 of said order of determination after the word "event" the following be inserted: "said P. D. McDowell and L. Gayle McDowell, and Wheeler E. Pepperdine and Nettie L. Pepperdine shall receive notice of 36 hours prior to the commencement of such rotation and"; and

(e) That on page 30 in paragraph 49 of said order of determination, the name "Nelson Monroe" be stricken out; and

(f) That on page 33 at the end of paragraph 52, the following provision be inserted: "and provided further, the right hereinbefore set forth in this paragraph for G. B. Dorris and Beryl Parker Dorris and P. S. Dorris to divert from said Stockdill Slough shall be subject to the right of Hans A. Heesch and Margaret M. Heesch to divert from said Stockdill Slough as set forth in an agreement entered into on June 15, 1915, and recorded on June 16, 1915, on page 424 in Book 32 of Deeds of Modoc County"; and

(g) That on page 38 in Schedule 1 of said order of determination the figure "37.4" be changed to "34.7" acres in the NW $\frac{1}{4}$ NW $\frac{1}{4}$ of Section 30, T. 42 N., R. 13 E., M.D.B. & M.; and

(h) That on page 44 in Schedule 1 of said order of determination, the name "Nelson H. Monroe" be stricken out; and

(i) That on page 62 in Schedule 4 of said order of determination, immediately above the figure "25" in the 3rd column, the figure "24" be inserted, and immediately above the words "Lower Joseph" in the 4th column the words "Joseph Creek" be inserted; and

(j) That on page 67 in Schedule 8 of said order of determination in the 2nd column, the portion of the bracket which includes the figure "56.7" be excluded; opposite said figure "56.7", the figures "139" and "140" be inserted in the 3rd column; opposite said figure "139", the words "North Fork" be inserted in the 4th column; and opposite said figure "140", the word "Bettendorff" be

inserted in the 4th column; and

(k) That on page 67 in Schedule 8 of said order of determination, the name "Nelson Monroe" be stricken out; and

(l) That on page 67 in Schedule 8, 1st column, in said order of determination, the name "T. J. Laird Estate" be changed to "Sarah Laird, Eda V. Laird, James R. Laird, Mildred (Laird) Kenfield, and Fannie F. Laird"; and

(m) That on page 43 in Schedule 1 of said order of determination, the names "Sarah Laird, Edna V. Laird, James F. Laird, Mildred (Laird) Kenfield, and Fannie F. Laird" be changed to "Sarah Laird, Eda V. Laird, James R. Laird, Mildred (Laird) Kenfield, and Fannie F. Laird"; and

(n) That "United States in Trust, for such bands of Pit River Indians of the State of California as shall be designated by the Secretary of the Interior in accordance with the Act of June 18, 1934 (48 Stat. 984)" has succeeded to all right, title and interest of "Estate of J. M. Johnson, deceased" as set forth in said order of determination, and that said "United States in Trust, for such bands of Pit River Indians of the State of California as shall be designated by the Secretary of the Interior in accordance with the Act of June 18, 1934 (48 Stat. 984)" hereinafter referred to as "United States in Trust", be substituted herein in lieu; place and stead of said "Estate of J. M. Johnson, deceased"; and

(o) That Mary H. Lynip, administratrix of the Estate of B. F. Lynip, deceased, has succeeded to all right, title and interest of B. F. Lynip as set forth in said order of determination, and that said Mary H. Lynip, administratrix of the Estate of B. F. Lynip, deceased, be substituted herein in lieu, place and stead of said B. F. Lynip; and

(p) That G. B. Dorris and Beryl Parker Dorris have succeeded to all right, title and interest of W. J. Dorris as set forth in said order of determination, and that said G. B. Dorris and Beryl Parker Dorris be substituted herein in lieu, place and stead of said W. J. Dorris; and

(q) That C. A. Raker has succeeded to all right, title and interest of Bessie Jackson as set forth in said order of determination, and that said C. A. Raker be substituted herein in lieu, place and stead of said Bessie Jackson; and

(r) That O. D. Austin and Thelma Austin have succeeded to all right, title and interest of Modoc County Bank in Liquidation as set forth in said order of determination, and that said O. D. Austin and Thelma Austin be substituted herein in lieu, place and stead of said Modoc County Bank in Liquidation; and

(s) That Martha E. Page has succeeded to all right, title and interest of Estate of John Page, deceased, as set forth in said order of determination, and that said Martha E. Page be substituted herein in lieu, place and stead of said Estate of John Page, deceased; and

(t) That Leland Chester Porter, Floyd Eldon Porter, and Oakley Willis Porter have succeeded to all right, title and interest of Alice Porter as set forth in said order of determination, and that said Leland Chester Porter, Floyd Eldon Porter and Oakley Willis Porter be substituted herein in lieu, place and stead of said Alice Porter; and

(u) That Milan S. Renner has succeeded to all right, title and interest of Ruth Odessa Allen as set forth in said order of determination, and that said Milan S. Renner be substituted herein in lieu, place and stead of said Ruth Odessa Allen; and

(v) That Ella Russell has succeeded to all right, title and interest of Harry Russell as set forth in said order of determination, and that said Ella Russell be substituted herein in lieu, place and stead of said Harry Russell; and

(w) That Philip W. McKenney has succeeded to all right, title and interest of Lee Wortman as set forth in said order of determination, and that said Philip W. McKenney be substituted herein in lieu, place and stead of said Lee Wortman.

DESCRIPTION OF AREA INVOLVED

15. The North Fork of Pit River has its source in the several tributary streams which rise on the western slope of the Warner Range in the northeastern part of Modoc County. There are no important tributaries from the west. Goose Lake, although topographically within the North Fork basin, has not

contributed to the discharge of the North Fork of Pit River since about 1871 and therefore is not considered as a tributary to the river. The five important tributaries from the east, namely, in order downstream, are Linville Creek, Franklin Creek, Joseph Creek, Thoms Creek and Parker Creek. Franklin Creek, however, is not included in the present determination, the water rights on that stream having been previously adjudicated by judgment and decree entered on September 8, 1933 in C. E. Crowder, et al. vs. P. Indart, et al., No. 3118, Superior Court of California in and for the County of Modoc.

16. Excluding said Franklin Creek, the North Fork of Pit River has a tributary area of about 204 square miles. The altitudes within this area range from about 9700 feet at Warren Peak to about 4500 feet on the plateau surrounding Alturas. Approximately 45,000 acres of land within the basin are classed as agricultural, of which about 11,500 acres are irrigated from the North Fork of Pit River and all its tributaries, except Franklin Creek.

17. The climate of the area involved in said proceeding is typical of that prevailing generally over the Great Basin. Low precipitation, abundance of sunshine, wide range of temperature variations, low humidity and rapid evaporation are the characteristic features of the weather. The mean seasonal precipitation as measured at Alturas, in said county and state, is approximately 12 inches, of which about 85 per cent occurs during the period from October first to May thirty-first. About 65 per cent of the seasonal precipitation falls in the form of snow, normally in the months of December, January, February and March. Occasional thunder showers of high intensity but of short duration occur during the summer months. These showers largely account for the remaining 15 per cent of the seasonal precipitation but cannot be depended upon for crop growth. Records of temperature at Alturas show the mean minimum temperatures for the months from October to April, inclusive, to be below freezing. For the remaining months of the year the monthly mean minimum temperatures range from 34 to 45 degrees and the monthly mean maximum temperatures range from 68 to 89 degrees. The highest recorded temperature at Alturas was 105 degrees and the lowest was minus 32 degrees, a range of 137 degrees. As determined by the dates between killing frosts the average length of the growing

season is about 72 days. These frosts, however, do not cause permanent injury to the predominating crops grown in the area and the growing season for such crops extends from about April fifteenth to September fifteenth, a period of about 150 days.

18. The soils of the irrigated lands involved in said proceeding range from clay loams to gravelly loams in their various phases, with the clay loams and sandy loams predominating. These soils are well adapted to the crops grown in the area.

19. Agriculture on a commercial basis is limited by the climate of the region to the growing of forage crops and the hardier grains upon the lands involved in said proceeding. Of the total irrigated area in the North Fork of Pit River basin, approximately 80 per cent is devoted to the production of meadow hay and meadow pasturage. The remaining 20 per cent of the area is about equally divided between lands planted to alfalfa and those cropped to grain. Small orchards and gardens found on each ranch for home use account for about one-half of one per cent of the total irrigated area. The forage crops and grain are consumed locally in the livestock and dairying industries.

20. The successful production of said basic crops is dependent upon irrigation, and since the water supply of the North Fork of Pit River and its tributaries is inadequate for all agricultural needs throughout each irrigation season, it is essential that the rights in and to the use of waters of said North Fork of Pit River and all its tributaries, except Franklin Creek, be determined in order that there may be an orderly distribution of the same to the rightful owners.

GENERAL DEFINITIONS, LIMITATIONS AND PROVISIONS

21. The term "act" when used herein means the "water commission act", being Chapter 586, Statutes of 1913 of the State of California, as amended; the term "stream system" when used herein means the North Fork of Pit River and all its tributaries, except Franklin Creek; the term "claimant" when used herein means a party claiming rights in and to the use of waters of the North Fork of Pit River or any of its tributaries, except Franklin Creek.

22. Although all quantities of water hereinafter found for the several claimants for direct application to beneficial use are severally expressed in terms of continuous flow, nevertheless, nothing herein contained shall be construed as limiting or restricting the rights of any such claimants to rotate in the use of water, or the right of any such claimant to divert for limited periods of time convenient "irrigation heads"; and thus apply water to his lands at a greater rate than indicated by the quantity of continuous flow so found; provided, that such practice of rotation or use of "irrigation heads" shall not result in the use by any such claimant of a total quantity of water during any thirty-day period in excess of the equivalent of such claimant's continuous flow allowance for thirty days; and provided, further, that such practice of rotation or such use of "irrigation heads" shall not impair or infringe the right of any other such claimant.

23. Nothing herein contained shall, or shall be construed to, prevent any of the claimants herein, who jointly use a ditch, where there is a continuous flow allotment to said ditch, from employing by agreement of such joint users of said ditch a system of rotation in use as among themselves; or prevent any claimant herein who has allotments to two or more ditches, from using all or any portion of the summation of such allotments through each or any of said ditches on all or any portion of his lands, provided the total quantity of water diverted by said claimant at any time shall not exceed said summation of such allotments.

24. The term "directly apply to beneficial use" means the direct conveyance and application of water diverted to beneficial use without intermediate storage, except such regulatory storage as may be practiced for the purpose of equalizing the flow of water diverted to a convenient irrigation head.

25. The term "natural flow" means such flow as will naturally occur at any given point in a stream from the run-off of the watershed which it drains, from springs which naturally contribute to the stream, from seepage, and from waste and return flow from dams, conduits and irrigated lands; as distinguished from released stored water, and from foreign water directly conveyed to the stream from another watershed.

26. The "Division of Water Resources Map" hereinafter referred to as "D.W.R. Map" is the map prepared by the Division of Water Resources of the Department of Public Works of the State of California, from its surveys made in 1931 and 1936, which map comprises three sheets, is entitled "North Fork of Pit River Stream System Showing Diversions and Irrigated Lands, Modoc County, California", is dated 1937, and is on file in said proceeding.

DEFINITION OF WATER RIGHTS

27. The rights in and to the waters, and in and to the use thereof, from said stream system are divided into six separate groups, designated as follows:

Linville Creek Group, Joseph Creek Group, Thoms Creek Group, Gleason Creek Group, Parker Creek Group, and North Fork of Pit River Group; and all rights in each of the five first named groups, to wit, Linville Creek, Joseph Creek, Thoms Creek, Gleason Creek and Parker Creek are independent of all rights in the remaining four of said five first named groups, but are superior in priority and in right to all rights in said North Fork of Pit River Group as hereinafter set forth.

28. The various claimants in said proceeding are entitled to use of the waters of said stream system upon the irrigated lands hereinafter described under their respective names in Schedule 1, and are entitled to divert said waters at the respective points of diversion from said stream system as hereinafter named, numbered and described in Schedule 2. The respective points of measurement of the quantities of water hereinafter allotted to the several claimants are at said respective points of diversion from said stream system; except that the allotments to Martin Espil and Lucie Espil, V. L. Jacobs and Georgia Jacobs, Irvin K. Wilson and that portion of the allotment to LeRoy G. Black diverted through the Wilson Main Ditch set forth in Schedule 4 hereof, all allotments to all claimants set forth in Schedule 5 hereof, and the allotments to the United States in Trust and C. W. Clarke Co. set forth in Schedule 8 hereof are hereinafter specified in terms of quantity allowed for net consumptive use as distinguished from all other allotments which are hereinafter

specified in terms of quantity allowed for gross diversion and which said allotments to said claimants for net consumptive use shall be ascertained by measurement of the average difference during any seven day period between (a) the waters available for use upon their respective lands hereinafter described in Schedule 1 and (b) the waters passing off of their respective lands, whether in a natural stream channel, or in the process of returning thereto and whether through conduits, ditches, pipes or by drainage or other means.

29. The various claimants in said proceeding are entitled to "inter-related", "special class", and "surplus class" water rights. All allocations of said "interrelated" water rights in each of said groups in said stream system, to-wit, Linville Creek, Joseph Creek, Thoms Creek, Gleason Creek, Parker Creek, and North Fork of Pit River Groups, occur in various priority classes and are hereinafter respectively set forth in Schedules 3, 4, 5, 6, 7 and 8; each of said Linville Creek, Thoms Creek, Parker Creek, and North Fork of Pit River Groups, contains rights in "special class" in addition to said water right allocations respectively set forth in said Schedules 3, 5, 7, and 8, which said rights in "special class" are independent of each other, but are superior in priority and in right to all other rights in the group in which said rights in "special class" respectively occur, as hereinafter set forth; and each of said Linville Creek, Parker Creek, and North Fork of Pit River Groups, contains rights in "surplus class" in addition to said water right allocations respectively set forth in said Schedules 3, 7, and 8 and in addition to said rights in "special class", which said rights in "surplus class" are inferior and subject to all other rights in the group in which said rights in "surplus class" respectively occur, as hereinafter set forth.

30. All allotments of first priority class set forth in Schedules 3, 4, 5, 6, 7, and 8 hereof, all allotments of second priority class set forth in said Schedule 6, and the allotments hereinafter provided in paragraphs 32, 33, 44, and 53 to C. T. Watkins, Grace F. Bonner, Electa Fogarty and United States in Trust shall be for continuous usage without regard to season; all allotments of second priority class set forth in said Schedule 3, all allotments of second, third, fourth and fifth priority classes set forth in said Schedules 6

and 8, all allotments of second, third and fourth priority classes set forth in said Schedules 4 and 7, and the allotment for the inchoate right hereinafter set forth in paragraph 51 shall be for continuous usage during the season from April 1 to September 30, both dates inclusive, of each and every year; all allotments of second and third priority classes set forth in said Schedule 5, and the allotments hereinafter provided in paragraphs 38 and 39 to J. F. Kerr, F. L. Wallace and Jane Wallace, F. W. Koenig and A. H. Koenig, David Graham Reid and Mery C. Reid, J. M. Royce, and United States in Trust shall be for continuous usage during the season from April 15 to September 30, both dates inclusive, of each and every year; and all rights hereinafter provided in "surplus class" for the storage of the waters of the North Fork of Pit River and its tributaries shall be for diversion to storage at any season of each year whenever there is a surplus, if any, over and above the quantity required to fully supply all rights to divert and directly apply water to beneficial use as hereinbefore set forth in this paragraph, except said inchoate right hereinafter set forth in paragraph 51.

Definition of Water Rights in Linville Creek Group

31. Said Linville Creek Group, as hereinbefore designated in paragraph 27, comprises rights of "special class", "first priority class", "second priority class", and one right in "surplus class". Said "special class" embraces two rights hereinafter defined in paragraphs 32 and 33, which are independent of each other, but are superior in priority and in right to all other rights in said Linville Creek Group.

32. C. T. WATKINS is entitled to divert as a right in said "special class" from the natural flow of Linville Creek, at a point designated on said D.W.R. Map as Diversion 147A, described in Schedule 2 hereof, through the Linville Power Ditch,

2,55 cubic feet per second,
during the period from January first to December thirty-first, both dates inclusive, of each year for the generation of electrical energy and for domestic purposes, or as much of said amount of water as is directly applied

to beneficial use during said period for said purposes at the Davis Creek Electric Power Plant located within the SE $\frac{1}{4}$ SW $\frac{1}{4}$ of Section 34, T. 45 N., R. 14 E., M.D.B. & M: provided, however, that all of said 2.55 cubic feet per second, except the quantity consumed for domestic use and reasonably lost in transportation shall be returned directly to Linville Creek from said plant within the said SE $\frac{1}{4}$ SW $\frac{1}{4}$ of Section 34.

33. GRACE F. BONNER is entitled to divert as a right in said "special class" from the natural or developed flow of Crabtree Spring, at a point designated on said D.W.R. Map as Diversion 147, described in Schedule 2 hereof, through the Crabtree Spring Pipe Line,

0.03 cubic foot per second,
during the period from January first to December thirty-first, both dates inclusive, of each year for domestic purposes, or as much of said amount of water as is directly applied to beneficial use during said period for said purposes on her land described under her name in Schedule 1 hereof.

34. Subject to the foregoing rights, the various claimants enumerated in Schedule 3 hereof, are entitled to said rights of "first priority class" and "second priority class" in and to the use of the natural flow of Linville Creek and its tributaries, during the seasons hereinbefore stated in paragraph 30, for domestic, stock-watering and irrigation purposes upon their respective lands as shown on said D.W.R. Map and as described under their respective names in Schedule 1 hereof, in accordance with the acreages to be supplied, priorities and quantities of water allotted, and through the diversions numbered and named as set forth in said Schedule 3. Said rights in "first priority class" are equal in priority and correlative in right, are subject and inferior to said rights in "special class", but are superior in priority and in right to all other rights in said Linville Creek Group, and at all times when the available water supply is inadequate to supply all of said rights in "first priority class", then during the continuance of such shortage, the owners of such rights shall prorate the available water supply, if any, in excess of the quantity required to supply said rights in "special class", in accordance with their respective allotments in said "first priority class" as set forth in said Schedule 3. Said rights in "second priority class" are equal in priority and

correlative in right, are subject and inferior to said rights in "special class" and "first priority class", but are superior in priority and in right to all other rights in said Linville Creek Group, and at all times when the available water supply is inadequate to supply all of said rights in "second priority class", then during the continuance of such shortage, the owners of such rights shall prorate the available water supply, if any, in excess of the quantity required to supply said rights in "special class" and "first priority class", in accordance with their respective allotments in said "second priority class" as set forth in said Schedule 3.

35. Subject to the foregoing rights, LAKE SHORE CATTLE COMPANY, a corporation, organized and existing under and by virtue of the laws of the State of California, having its office and principal place of business at Fort Bidwell, County of Modoc, State of California, is entitled to divert from the natural flow of Linville Creek as said right in "surplus class" at a point designated on said D.W.R. Map as Diversion 12, described in Schedule 2 hereof, through the Page-Renner Ditch for storage in the Page Reservoir,

168 acre-feet per annum,
to be used as a supplemental supply for domestic, stock-watering and irrigation purposes, or as much of said amount of water as is impounded in said Page Reservoir, situated in the NE $\frac{1}{4}$ NW $\frac{1}{4}$ Sec. 7, T. 44 N., R. 14 E., M.D.B. & M., and thereafter withdrawn from said reservoir during the period from March fifteenth to October fifteenth, both dates inclusive, of each year and applied to beneficial use for said purposes on the lands described under the name of said company in Schedule 1 hereof.

Definition of Water Rights in Joseph Creek Group

36. Said Joseph Creek Group, as hereinbefore designated in paragraph 27, comprises rights of "first priority class", "second priority class", "third priority class", and "fourth priority class", all of said rights being included in Schedule 4 hereof. The various claimants enumerated in said Schedule 4 are entitled to rights in and to the natural flow of Joseph Creek and its tribu-

taries during the seasons hereinbefore stated in paragraph 30, for domestic, stock-watering and irrigation purposes upon their respective lands as shown on said D.W.R. Map and as described under their respective names in Schedule 1 hereof, in accordance with the acreages to be supplied, priorities and quantities of water allotted, and through the diversions numbered and named as set forth in said Schedule 4. Said rights in "first priority class" are equal in priority and correlative in right, are superior in priority and in right to all other rights in said Joseph Creek Group, and at all times when the available water supply is inadequate to supply all of said rights in "first priority class", then during the continuance of such shortage, the owners of such rights shall prorate the available water supply in accordance with their respective allotments in said "first priority class" as set forth in said Schedule 4. Said rights in "second priority class" are equal in priority and correlative in right, are subject and inferior to said rights in "first priority class", but are superior in priority and in right to all other rights in said Joseph Creek Group, and at all times when the available water supply is inadequate to supply all of said rights in "second priority class", then during the continuance of such shortage, the owners of such rights shall prorate the available water supply, if any, in excess of the quantity required to supply said rights in "first priority class", in accordance with their respective allotments in said "second priority class" as set forth in said Schedule 4. Said "third priority class" contains only one right, which is inferior and subject to all of said rights in "first priority class" and "second priority class", and is superior in priority and in right to all other rights in said Joseph Creek Group. Said rights in "fourth priority class" are equal in priority and correlative in right, are subject and inferior to all other rights in said Joseph Creek Group, and at all times when the available water supply is inadequate to supply all of said rights in "fourth priority class", then during the continuance of such shortage, the owners of such rights shall prorate the available water supply, if any, in excess of the quantity required to supply said rights in "first priority class", "second priority class" and "third priority class", in accordance with their respective allotments in said "fourth priority class"

as set forth in said Schedule 4.

Definition of Water Rights in Thoms Creek Group

37. Said Thoms Creek Group, as hereinbefore designated in paragraph 27, comprises rights of "special class", "first priority class", "second priority class" and "third priority class". Said "special class" embraces two rights, hereinafter defined in paragraphs 38 and 39, which are independent of each other but are superior in priority and in right to all other rights in said Thoms Creek Group.

38. J. F. KERR, F. W. KOENIG and A. H. KOENIG, and F. L. WALLACE and JANE WALLACE are entitled to divert as a right in said "special class", from the natural flow of Thoms Creek at a point designated on said D.W.R. Map as Diversion 159, described in Schedule 2 hereof, through the Cedar Pass Ditch in the amounts set after their respective names as follows:

J. F. Kerr	- 2.40 cubic feet per second
F. W. Koenig and A. H. Koenig	- 0.20 cubic foot per second
F. L. Wallace and Jane Wallace	- 2.40 cubic feet per second

and to convey said amounts of water to Cedar Creek, thence down Cedar Creek and redivert said water therefrom, during the season hereinbefore stated in paragraph 30, for domestic, stock-watering and irrigation purposes, or as much of said amounts of water as are directly applied to beneficial use for said purposes on their respective lands described under their respective names in Schedule 1 hereof; and at all times when the available water supply is inadequate to supply all of said amounts of water above set forth in this paragraph, then during the continuance of such shortage, said owners thereof shall prorate the available water supply in accordance with their respective allotments above set forth in this paragraph after their respective names.

39. DAVID GRAHAM REID and MARY C. REID, J. M. ROYCE, and UNITED STATES IN TRUST, are entitled to divert, as a right in said "special class", from the natural flow of Mile Creek at a point designated on said D.W.R. Map as Diversion 80, described in Schedule 2 hereof, through the Mile Creek Ditch in the amounts set after their respective names as follows:

David Graham Reid and Mary C. Reid	- 2.40 cubic feet per second
J. M. Royce	- 0.80 cubic foot per second
United States in Trust	- 1.20 cubic feet per second

and to convey said amounts of water to Stony Canyon, thence down Stony Canyon and redivert said water therefrom by means of Diversions 77 to 83, inclusive, named and described in said Schedule 2, during the season hereinbefore stated in paragraph 30, for domestic, stock-watering and irrigation purposes, or as much of said amounts of water as are directly applied to beneficial use for said purposes on their respective lands described under their respective names in Schedule 1 hereof; provided however, when the total flow available for re-diversion from Stony Canyon is equal to or less than 2.40 cubic feet per second, then said David Graham Reid and Mary C. Reid are entitled to receive all of the waters flowing in said Stony Canyon, except the quantity required for domestic purposes and garden irrigation on the lands of said J. M. Royce, and when said David Graham Reid and Mary C. Reid elect to so receive said total flow they shall be entitled thereto for a period of eight days, whereupon said J. M. Royce shall be entitled to said total flow for the remainder of the then current irrigation season; and provided further, said David Graham Reid and Mary C. Reid are entitled to divert all or any portion of their allotment of 2.40 cubic feet per second hereinbefore set forth in this paragraph from the natural flow, if any, of said Stony Canyon in lieu of the diversion of a corresponding quantity of water from said Mile Creek.

40. Subject to the rights hereinbefore defined in paragraphs 38 and 39, the various claimants enumerated in Schedule 5 hereof, are entitled to said rights in "first priority class", "second priority class" and "third priority class", in and to the use of the natural flow of Thoms Creek and its tributaries, during the seasons hereinbefore stated in paragraph 30, for domestic, stock-watering and irrigation purposes upon their respective lands as shown on said D.W.R. Map and as described under their respective names in Schedule 1 hereof, in accordance with the acreages to be supplied, priorities and quantities of water allotted, and through the diversions numbered and named as set forth in said Schedule 5. Said rights in "first priority class", are equal in priority and correlative in right, are subject and inferior to said rights in "special

class", but are superior in priority and in right to all other rights in said Thoms Creek Group, and at all times when the available water supply is inadequate to supply all of said rights in "first priority class", then during the continuance of such shortage, the owners of such rights shall prorate the available water supply, if any, in excess of the quantity required to supply said rights in "special class", in accordance with their respective allotments in said "first priority class" as set forth in said Schedule 5. Said rights in "second priority class" are equal in priority and correlative in right, are subject and inferior to said rights in "special class" and "first priority class", but are superior in priority and in right to all other rights in said Thoms Creek Group, and at all times when the available water supply is inadequate to supply all of said rights in "second priority class", then during the continuance of such shortage the owners of such rights shall prorate the available water supply, if any, in excess of the quantity required to supply said rights in "special class" and "first priority class", in accordance with their respective allotments in said "second priority class", as set forth in said Schedule 5. Said rights in "third priority class" are equal in priority and correlative in right, are subject and inferior to all other rights in said Thoms Creek Group, and at all times when the available water supply is inadequate to supply all of said rights in "third priority class", then during the continuance of such shortage, the owners of such rights shall prorate the available water supply, if any, in excess of the quantity required to supply said rights in "special class", "first priority class" and "second priority class", in accordance with their respective allotments in said "third priority class" as set forth in said Schedule 5.

Definition of Water Rights in Gleason Creek Group

41. Said Gleason Creek Group, as hereinbefore designated in paragraph 27, comprises rights of "first priority class", "second priority class", "third priority class", "fourth priority class", and "fifth priority class", all of said rights being included in Schedule 6 hereof. The various claimants enumerated in said Schedule 6 are entitled to rights in and to the use of the natural flow of

Gleason Creek and its tributaries, during the seasons hereinbefore stated in paragraph 30, for domestic, stock-watering and irrigation purposes upon their respective lands as shown on said D.W.R. Map and as described under their respective names in Schedule 1 hereof, in accordance with the acreages to be supplied, priorities and quantities of water allotted, and through the diversions numbered and named as set forth in said Schedule 6. Said "first priority class" contains only one right, which right is superior in priority and in right to all other rights in said Gleason Creek Group. Said rights in "second priority class" are equal in priority and correlative in right, are subject and inferior to said right in "first priority class", but are superior in priority and in right to all other rights in said Gleason Creek Group, and at all times when the available water supply is inadequate to supply all of said rights in "second priority class", then during the continuance of such shortage, the owners of such rights shall prorate the available water supply, if any, in excess of the quantity required to supply said right in "first priority class", in accordance with their respective allotments in said "second priority class" as set forth in said Schedule 6. Said "third priority class" contains only one right, which right is inferior and subject to all rights in "first priority class" and "second priority class", but is superior in priority and in right to all other rights in said Gleason Creek Group. Said rights in "fourth priority class" are equal in priority and correlative in right, are subject and inferior to said rights in "first priority class", "second priority class", and "third priority class", but are superior in priority and in right to all other rights in said Gleason Creek Group, and at all times when the available water supply is inadequate to supply all of said rights in "fourth priority class", then during the continuance of such shortage, the owners of such rights shall prorate the available water supply, if any, in excess of the quantity required to supply said rights in "first priority class", "second priority class", and "third priority class", in accordance with their respective allotments in said "fourth priority class", as set forth in said Schedule 6. Said "fifth priority class" contains only one right, which right is inferior and subject to all other rights in said Gleason Creek Group.

Definition of Water Rights in Parker Creek Group

42. The rights hereinafter defined in said Parker Creek Group, as hereinbefore designated in paragraph 27, are subject to the provisions of the judgment and decree of the Superior Court of the State of California, in and for the County of Modoc, entered April 24, 1923, in Case No. 2379, entitled Phear E. Porter, et al. vs. C. A. Ward, et al., insofar as said rights have heretofore been determined by said judgment and decree.

43. Said Parker Creek Group comprises rights of "special class", "first priority class", "second priority class", "third priority class", "fourth priority class", and "surplus class". Said "special class" contains only one right, which right is a waste water right and is superior in priority and in right to all other rights in said Parker Creek Group in and to the collection and use of said waste water, if any occurs upon the lands of the owner of said right in "special class" as hereinafter defined in paragraph 44.

44. ELECTA FOGARTY is entitled to divert, as a right in said "special class", from the flow collected from Shields Creek drainage from the Page Ranch in the Fogarty Collecting Ditch along the South boundary of the SW $\frac{1}{4}$ NW $\frac{1}{4}$ of Section 18, T. 42 N., R. 14 E., M.D.B. & M., being within said SW $\frac{1}{4}$ SW $\frac{1}{4}$ of said Section 18,

1.00 cubic foot per second,
during the season hereinbefore stated in paragraph 30, at all times when drainage flow reaches said collecting ditch, for domestic, stock-watering and irrigation purposes, or as much of said amount of such water as is directly applied to beneficial use at such times for said purposes on the Shields Creek Drainage lands described under her name in Schedule 1 hereof.

45. Subject to the right hereinbefore defined in paragraph 44, the various claimants enumerated in Schedule 7 hereof, are entitled to said rights in "first priority class", "second priority class", "third priority class", and "fourth priority class" in and to the use of the natural flow of Parker Creek and its tributaries, during the seasons hereinbefore stated in paragraph 30, for domestic, stock-watering and irrigation purposes upon their respective lands as shown on said D.W.R. Map and as described under their respective names

in Schedule 1 hereof, in accordance with the acreages to be supplied, priorities and quantities of water allotted, and through the diversions numbered and named as set forth in said Schedule 7. Said rights in "first priority class" are equal in priority and correlative in right, are subject and inferior to said right in "special class", but are superior in priority and in right to all other rights in said Parker Creek Group, and at all times when the available water supply is inadequate to supply all of said rights in "first priority class", then during the continuance of such shortage, the owners of such rights shall prorate the available water supply in accordance with their respective allotments in said "first priority class" as set forth in said Schedule 7. Said rights in "second priority class" are equal in priority and correlative in right, are subject and inferior to said rights in "special class" and "first priority class", but are superior in priority and in right to all other rights in said Parker Creek Group, and at all times when the available water supply is inadequate to supply all of said rights in "second priority class", then during the continuance of such shortage, the owners of such rights shall prorate the available water supply, if any, in excess of the quantity required to supply all prior rights, or rotate in the use thereof as hereinafter provided in this paragraph. Said rights in "third priority class", are equal in priority and correlative in right, are subject and inferior to said rights in "special class", "first priority class", and "second priority class", but are superior in priority and in right to all other rights in said Parker Creek Group, and at all times when the available water supply is inadequate to supply said rights in "third priority class", then during the continuance of such shortage, the owners of such rights shall prorate the available water supply, if any, in excess of the quantity required to supply all prior rights, in accordance with their respective allotments in said "third priority class" as set forth in said Schedule 7. Said rights in "fourth priority class", are equal in priority and correlative in right, are subject and inferior to said rights in "special class", "first priority class", "second priority class" and "third priority class", except as hereinafter provided in this paragraph, but are superior in priority and in right to all other rights in said Parker Creek Group, and at all times when the avail-

able water supply is inadequate to supply said rights in "fourth priority class", then during the continuance of such shortage, the owners of such rights shall prorate the available water supply, if any, in excess of the quantity required to supply all prior rights, in accordance with their respective allotments in said "fourth priority class" as set forth in said Schedule 7, except as hereinafter provided in this paragraph; provided, however, that at all times after the first day of July during said irrigation season of each year when the total flow of Shields Creek above all diversions is less than 4.00 cubic feet per second, then said total flow shall be prorated in the following proportions:

<u>Claimant</u>	<u>Per Cent of Total Flow</u>
P. D. McDowell and L. Gayle McDowell	19%
Wheeler E. Pepperdine and Nettie L. Pepperdine	6%
W. S. Trumbo	32.1%
Martha E. Page	32.1%
Passing unobstructed down Shields Creek	10.8%

unless said P. D. McDowell and L. Gayle McDowell, Wheeler E. Pepperdine and Nettie L. Pepperdine, W. S. Trumbo, and Martha E. Page, at such times elect to rotate in the use of said total flow, in which latter event said P. D. McDowell and L. Gayle McDowell, and Wheeler E. Pepperdine and Nettie L. Pepperdine shall receive notice of 36 hours prior to the commencement of such rotation and said total flow shall be used in the following manner:

At the time of commencement of rotation, said W. S. Trumbo shall be entitled to divert and use the entire flow of said Shields Creek over and above the quantity necessary to supply all allotments of "first priority class" for one and one-half days, then said P. D. McDowell and L. Gayle McDowell, and Wheeler E. Pepperdine and Nettie L. Pepperdine shall be entitled to divert and use one-half of the total flow of said Shields Creek for three days and for each alternate three-day period thereafter for the remainder of the then current irrigation season.

From the time when P. D. McDowell and L. Gayle McDowell, and Wheeler E. Pepperdine and Nettie L. Pepperdine first receive water under the rotation provision as provided above, said W. S. Trumbo shall be entitled to divert and use the remaining one-half of the flow of said Shields Creek for one and one-half days, except 0.20 cubic foot per second which Martha E. Page is entitled to divert and use either through the Page Upper Ditch (Diversion 111) or the Page Lower Ditch (Diversion 112).

Then Martha E. Page shall be entitled to divert and use all of the waters of said Shields Creek flowing from Section 28, T. 42 N., R. 14 E., M.D.B. & M., for three days, after which all waters of said Shields Creek flowing from said Section 29, except said 0.20 cubic foot per second hereinabove in this rotation provision provided for said Martha E. Page, shall be allowed to flow unobstructed into Parker Creek for one day. From then on during the continuance of this rotation schedule until the end of the then current irrigation season, all the water flowing from said Section 28, except said 0.20 cubic

foot per second hereinabove in this rotation provision provided for said Martha E. Page, shall be rotated during each seven-day period, as follows, to wit:

W. S. Trumbo shall be entitled to divert and use all water so available for the first three days of each such seven-day period, Martha E. Page shall be entitled to divert and use all water so available for the next three days of each such seven-day period, and on the last day of each such seven-day period all water so available shall be allowed to flow unobstructed down the channel of said Shields Creek into Parker Creek.

provided further, that whenever the total flow available for diversion from Parker Creek and its tributaries under the rights set forth in said Schedule 7 is equal to or less than 27.20 cubic feet per second, diversion by Martha E. Page, and Leland Chester Porter, Floyd Eldon Porter, and Oakley Willis Porter through the Pepperdine Upper Ditch (Diversion 100) from said Shields Creek into Plum Canyon Reservoir shall be reduced to 0.50 cubic foot per second until such time as the total flow of said Shields Creek above all diversions therefrom has receded to 4.00 cubic feet per second, whereupon no water shall be diverted from said Shields Creek through said Pepperdine Upper Ditch (Diversion 100) into said Plum Canyon Reservoir for the remainder of the then current irrigation season; and provided further, that whenever the total flow available for diversion from said Parker Creek and its tributaries under the rights set forth in said Schedule 7 is in excess of 27.20 cubic feet per second, water may be diverted from such excess by said Martha E. Page, and Leland Chester Porter, Floyd Eldon Porter and Oakley Willis Porter through said Pepperdine Upper Ditch and by Pearl F. Gibson and C. C. Gibson through the Fogarty-Porter Ditch (Diversion 113) under their rights in "fourth priority class", as set forth in said Schedule 7, at three times the average rate of diversion respectively therein set forth for their said rights in "fourth priority class".

46. Said "surplus class" embraces rights to store waters of Parker Creek and its tributaries in four reservoirs and an inchoate right by appropriation initiated under the provisions of said water commission act; said rights in "surplus class" are inferior and subject to all other rights in said Parker Creek Group, as hereinbefore set forth in paragraphs 44 and 45; and the relative priorities of said rights in "surplus class" are as hereinafter set forth in paragraphs 47, 48, 49, 50, and 51.

47. MARTHA E. PAGE, and LELAND CHESTER PORTER, FLOYD ELDON PORTER, and OAKLEY WILLIS PORTER are entitled to divert, as a right in said "surplus class", from the natural flow of Shields Creek at a point designated on said D.W.R. Map as Diversion 100, described in Schedule 2 hereof, through the Pepperdine Upper Ditch for storage in the Plum Canyon (Page-Porter) Reservoir in the amounts set forth after their respective names as follows:

Martha E. Page	- 100 acre-feet per annum
Leland Chester Porter, Floyd Eldon Porter, and Oakley Willis Porter	- 200 acre-feet per annum

to be used as a supplemental supply for domestic, stock-watering and irrigation purposes, or as much of said amounts of water as are impounded in said Plum Canyon (Page-Porter) Reservoir, situated in the $N\frac{1}{2} NE\frac{1}{4}$ of Section 32, T. 42 N., R. 14 E., M.D.B. & M., and thereafter withdrawn from said reservoir during the period from April first to September thirtieth, both dates inclusive, of each year and applied to beneficial use for said purposes on the lands described under their respective names in Schedule 1 hereof; and said rights defined in this paragraph are subject and inferior to the rights hereinbefore defined in said Parker Creek Group, but are superior in priority and in right to the rights hereinafter defined in paragraphs 48, 49, 50 and 51.

48. JAMES C. PORTER and ESTATE OF PHEAR E. PORTER, deceased, collectively, are entitled to divert, as a right in said "surplus class", from the natural flows of Giles Creek and Parker Creek at points respectively designated on said D.W.R. Map as Diversions 128 and 113, described in Schedule 2 hereof, respectively through the Giles Supply and the Fogarty-Porter Ditches for storage in the Jim Porter Reservoir,

292.5 acre-feet per annum,

to be used as a supplemental supply for domestic, stock-watering and irrigation purposes, or as much of said amount of water as is impounded in said Jim Porter Reservoir, situated in the $SW\frac{1}{4} NE\frac{1}{4}$, $SE\frac{1}{4} NW\frac{1}{4}$, $NE\frac{1}{4} SW\frac{1}{4}$, and $NW\frac{1}{4} SE\frac{1}{4}$ of Section 1, T. 42 N., R. 13 E., M.D.B. & M., and thereafter withdrawn from said reservoir during the period from April first to September thirtieth, both dates inclusive, of each year and applied to beneficial use for said purposes on the lands

described under their names in Schedule 1 hereof; provided however, said James C. Porter and Estate of Phear E. Porter, deceased, shall only be entitled to divert such water as is necessary from said Parker Creek through said Fogarty-Porter Ditch to supply the deficiency, if any, in the water supply available from said Giles Creek for the right hereinbefore set forth in this paragraph; and the right set forth in this paragraph is subject and inferior to all rights hereinbefore defined in said Parker Creek Group, but is superior in priority and in right to the rights hereinafter defined in paragraphs 49, 50, and 51.

49. PEARL F. GIBSON and C. C. GIBSON, collectively, are entitled to divert as a right in said "surplus class", from the natural flow of Parker Creek at a point designated on said D.W.R. Map as Diversion 113, described in Schedule 2 hereof, through the Fogarty-Porter Ditch for storage in the Pearl Porter Reservoir,

198 acre-feet per annum,

to be used as a supplemental supply for domestic, stock-watering and irrigation purposes, or as much of said amount of water as is impounded in said Pearl Porter Reservoir, situated in the $N\frac{1}{2}$ $NE\frac{1}{4}$ of Section 12, T. 42 N., R. 13 E., M.D.B. & M., and thereafter withdrawn from said reservoir during the period from April first to September thirtieth, both dates inclusive, of each year, and applied to beneficial use for said purposes on the lands described under their names in Schedule 1 hereof; and the right set forth in this paragraph is subject and inferior to all rights in said Parker Creek Group as hereinbefore defined, but is superior in priority and in right to the rights hereinafter defined in paragraphs 50 and 51.

50. PEARL F. GIBSON and C. C. GIBSON, collectively, are entitled to divert, as a right in said "surplus class", from the natural flow of the North Fork of Parker Creek at a point designated on said D.W.R. Map as Diversion 121, described in Schedule 2 hereof, for storage in the Porter Upper Reservoir,

100 acre-feet per annum,

to be used as a supplemental supply for domestic, stock-watering and irrigation purposes, or as much of said amount of water as is impounded in said Porter Upper Reservoir, situated in the $NW\frac{1}{4}$ of Section 28, T. 42 N., R. 15 E., M.D.B. & M. M.D.B. & M., released from said reservoir into said Parker Creek, and rediverted

therefrom by means of Diversions 113, 120, 123, 125, 126 and 127, described in said Schedule 2, during the period from April first to September thirtieth, both dates inclusive, of each year, and applied to beneficial use for said purposes on the lands described under their names in Schedule 1 hereof; provided however, that such impounded water so released shall not be rediverted through the Fogarty-Porter Ditch (Diversion 113) at any time that the total natural flow of Parker Creek and its tributaries available for diversion is equal to or less than 27.20 cubic feet per second; and the right set forth in this paragraph is inferior and subject to all rights hereinbefore defined in said Parker Creek Group, but is superior in priority and in right to the right hereinafter defined in paragraph 51.

51. JAMES C. PORTER will be entitled to divert, as a right in said "surplus class", from the natural flow of Parker Creek at a point designated on said D.W.R. Map as Diversion 113, described in Schedule 2 hereof, through the Fogarty-Porter Ditch,

1.15 cubic feet per second,
during the season hereinbefore stated in paragraph 30, or as much of said amount of water as is directly applied to beneficial use for domestic, stock-watering and irrigation purposes in accordance with his Application 6291, filed under the provisions of the Water Commission Act, on the following described lands:

40.0 acres in the NW $\frac{1}{4}$ NW $\frac{1}{4}$ Sec. 1, T. 42 N., R. 13 E., M.D.B. & M.
40.0 acres in the NE $\frac{1}{4}$ NW $\frac{1}{4}$ Sec. 1, T. 42 N., R. 13 E., M.D.B. & M. 6291
80.0 acres - Total.

and the right set forth in this paragraph is inferior and subject to all rights hereinbefore defined in said Parker Creek Group; provided, that prior to December 1, 1943, said James C. Porter shall have completed the above appropriation and applied said water to beneficial use in accordance with the terms of the Division of Water Resources Permit 3873, and shall have submitted evidence of such completed appropriation and use to the Superior Court of the State of California, in and for the County of Modoc, in accordance with the provisions of Section 36f of said act.

Definition of Water Rights in North Fork of Pit River Group

52. Said North Fork of Pit River Group, as hereinbefore designated in paragraph 27, comprises rights of "special class", "first priority class", "second priority class", "third priority class", "fourth priority class", "fifth priority class", and "surplus class". Said "special class" contains only one right, hereinafter set forth in paragraph 53, which right is superior in priority and in right to all other rights in said North Fork of Pit River Group.

53. UNITED STATES IN TRUST, is entitled, as said right in said "special class", to divert from the natural or developed flow of an unnamed water course below Mud Lake Reservoir, at a point designated on said D.W.R. Map as Diversion 157, described in Schedule 2 hereof, through the X L Garden Ditch,

0.10 cubic foot per second,

for continuous usage without regard to season for domestic purposes, or as much of said amount of water as is directly applied to beneficial use for said purpose on the North Fork Ranch lands described under the name of United States in Trust in Schedule 1 hereof.

54. Subject to all rights hereinbefore defined, the various claimants enumerated in Schedule 8 hereof, are entitled to said rights in "first priority class", "second priority class", "third priority class", "fourth priority class" and "fifth priority class", in and to the use of the natural flow of the North Fork of Pit River and its tributaries, during the seasons hereinbefore stated in paragraph 30, for domestic, stock-watering and irrigation purposes upon their respective lands as shown on said D.W.R. Map and as described in Schedule 1 hereof, in accordance with the acreages to be supplied, priorities and quantities of water allotted, and through the diversions numbered and named as set forth in said Schedule 8. Said rights in "first priority class" are equal in priority and correlative in right, are subject and inferior to said right in "special class", but are superior in priority and in right to all other rights in said North Fork of Pit River Group, and at all times when the available water supply is inadequate to supply all of said rights in "first priority class", then during the continuance of such shortage, the owners of such rights shall prorate

the available water supply, if any, in excess of the quantity required to supply said right in "special class", in accordance with their respective allotments in said "first priority class" as set forth in said Schedule 8. Said rights in "second priority class", are equal in priority and correlative in right, are subject and inferior to said rights in "special class" and "first priority class", but are superior in priority and in right to all other rights in said North Fork of Pit River Group, and at all times when the available water supply is inadequate to supply all of said rights in "second priority class", then during the continuance of such shortage, the owners of such rights shall prorate the available water supply, if any, in excess of the quantity required to supply all prior rights, in accordance with their respective allotments in said "second priority class" as set forth in said Schedule 8. Said rights in "third priority class", are equal in priority and correlative in right, are inferior and subject to said rights in "special class", "first priority class", and "second priority class", but are superior in priority and in right to all other rights in said North Fork of Pit River Group, and at all times when the available water supply is inadequate to supply all of said rights in "third priority class", then during the continuance of such shortage, the owners of such rights shall prorate the available water supply, if any, in excess of the quantity required to supply all prior rights, in accordance with their respective allotments in said "third priority class" as set forth in said Schedule 8. Said rights in "fourth priority class" are equal in priority and correlative in right, are inferior and subject to said rights in "special class", "first priority class", "second priority class", and "third priority class", but are superior in priority and in right to all other rights in said North Fork of Pit River Group, and at all times when the available water supply is inadequate to supply all of said rights in "fourth priority class", then during the continuance of such shortage, the owners of such rights shall prorate the available water supply, if any, in excess of the quantity required to supply all prior rights, in accordance with their respective allotments in said "fourth priority class" as set forth in said Schedule 8. Said rights in "fifth priority class", are equal in priority and

correlative in right, are inferior and subject to said rights in "special class", "first priority class", "second priority class", "third priority class", and "fourth priority class", but are superior in priority and in right to all other rights in said North Fork of Pit River Group, and at all times when the available water supply is inadequate to supply all of said rights in "fifth priority class", then during the continuance of such shortage, the owners of such rights shall prorate the available water supply, if any, in excess of the quantity required to supply all prior rights, in accordance with their respective allotments in said "fifth priority class" as set forth in said Schedule 8; provided however, that whenever the total flow available for diversion from said North Fork of Pit River under the rights set forth in said Schedule 8 is in excess of 52.08 cubic feet per second, water may be diverted from such excess under all rights in said "fourth priority class" and "fifth priority class" at three times the average rate of diversion respectively set forth therefor in said Schedule 8; and provided further, the allotment to W. E. Minard through Diversion 142, as set forth in said Schedule 8, shall be subject to the provisions of an agreement entered into on December 27, 1928, and recorded on December 28, 1928, on page 282 in Book 47 of Deeds of Modoc County; and provided further, Sarah Laird, Eda V. Laird, James R. Laird, Mildred (Laird) Kenfield, and Fannie F. Laird are entitled to a first right in the Laird Lateral of the North Fork Ditch (Diversion 139) to convey their allotment set forth after their names in said Schedule 8 to the lands described under their names in said Schedule 1, and that B. F. Lynip, or his successor or successors in interest, and A. Bolliger and A. Keller, or their successor or successors in interest, are obligated to maintain said Laird Lateral with adequate capacity to carry any additional water, over and above the Laird Allotment, to the lands described under their names in said Schedule 1 and to deliver said Laird Allotment to said Laird lands without interference.

55. Said "surplus class" embraces rights to store waters of tributaries to said North Fork of Pit River in four reservoirs as hereinafter set forth in paragraphs 56, 57, 58 and 59; and said rights in "surplus class" are independent of each other and are inferior and subject to all other rights in said stream system.

56. FRANK McARTHUR is entitled to divert, as a right in said "surplus class", from the natural flow of an unnamed canyon tributary to the North Fork of Pit River at a point designated on said D.W.R. Map as Diversion 151 for storage in the Lauer Reservoir,

900 acre-feet per annum,
to be used as a supplemental supply for domestic, stock-watering and irrigation purposes, or as much of said amount of water as is impounded in said Lauer Reservoir, situated in $S\frac{1}{2}$ Section 9, $NE\frac{1}{4}$ and $NE\frac{1}{4} NW\frac{1}{4}$ of Section 16, and $W\frac{1}{2} NW\frac{1}{4}$ Section 15, all in T. 44 N., R. 13 E., M.D.B. & M., and thereafter released from said reservoir into the North Fork of Pit River and rediverted therefrom through Diversion 136, described in said Schedule 2, during the period from March fifteenth to September thirtieth, both dates inclusive, of each year and applied to beneficial use for said purposes on the lands described under his name in Schedule 1 hereof.

57. GEORGE L. DEWEY and ELIZABETH DEWEY and LAWRENCE McHUGH are entitled to divert as a right in said "surplus class", from the natural flow of an unnamed canyon tributary to the North Fork of Pit River at a point designated on said D.W.R. Map as Diversion 155 for storage in the Kelley and Greiner Reservoir, in the amounts set forth after their respective names as follows:

George L. Dewey and Elizabeth Dewey	- 142 acre-feet per annum
Lawrence McHugh	- 142 acre-feet per annum

to be used for domestic, stock-watering and irrigation purposes, or as much of said amounts of water as are impounded in said Kelley and Greiner Reservoir, situated in the $SE\frac{1}{4} SE\frac{1}{4}$ Section 17, $SW\frac{1}{4} SW\frac{1}{4}$ Section 16, $NW\frac{1}{4} NW\frac{1}{4}$ Section 21, and $NE\frac{1}{4} NE\frac{1}{4}$ Section 22, all in T. 43 N., R. 13 E., M.D.B. & M., and thereafter withdrawn from said reservoir during the period from March fifteenth to September thirtieth, both dates inclusive, of each year and applied to beneficial use for said purposes on the lands described under their respective names in Schedule 1 hereof.

58. ALBERT THOMAS, IVA S. RAKER and C. A. RAKER (known as "Raker and Thomas"), are entitled to divert, as a right in said "surplus class", from the

natural flow of an unnamed stream tributary to the North Fork of Pit River at a point designated on said D.W.R. Map as Diversion 156, described in Schedule 2 hereof, for storage in the Mud Lake Reservoir,

545 acre-feet per annum,

to be used as a supplemental supply for domestic, stock-watering and irrigation purposes, or as much of said amount of water as is impounded in said Mud Lake Reservoir, situated in the $E\frac{1}{2}$ NW $\frac{1}{4}$, W $\frac{1}{2}$ NE $\frac{1}{4}$, NW $\frac{1}{4}$ SE $\frac{1}{4}$, and NE $\frac{1}{4}$ SW $\frac{1}{4}$ Section 20, T. 43 N., R. 13 E., M.D.B. & M., and thereafter withdrawn from said reservoir during the period from March fifteenth to September thirtieth, both dates inclusive, of each year and applied to beneficial use for said purposes on the lands described under their names in Schedule 1 hereof.

59. G. B. DORRIS and BERYL PARKER DORRIS, and P. S. DORRIS, will be entitled to divert, as a right in said "surplus class", from the natural flow of Parker Creek at a point designated on said D.W.R. Map as Diversion 119, described in Schedule 2 hereof, through the Dorris Supply Ditch for storage in the Dorris Reservoir in the amounts set forth after their respective names as follows:

G. B. Dorris and Beryl Parker Dorris	- 3050 acre-feet per annum
P. S. Dorris	- 3050 acre-feet per annum,

to be used as a supplemental supply for domestic, stock-watering and irrigation purposes, or as much of said amounts of water as are impounded in said Dorris Reservoir, situated in the $E\frac{1}{2}$ SE $\frac{1}{4}$ Section 8, S $\frac{1}{2}$ Section 9, SW $\frac{1}{4}$ and SW $\frac{1}{4}$ SE $\frac{1}{4}$ Section 10, NW $\frac{1}{4}$, W $\frac{1}{2}$ SW $\frac{1}{4}$ and NE $\frac{1}{4}$ SW $\frac{1}{4}$ Section 15, all of Section 16, $E\frac{1}{2}$ NE $\frac{1}{4}$ Section 17, and N $\frac{1}{2}$ NE $\frac{1}{4}$ Section 21, all in T. 42 N., R. 13 E., M.D.B. & M., and thereafter withdrawn from said reservoir during the period from April first to September thirtieth, both dates inclusive, of each year and applied to beneficial use for said purposes in accordance with their Application 1321, filed under the provisions of the Water Commission Act, on the lands described under their respective names in Schedule 1 hereof; and said G. B. Dorris and Beryl Parker Dorris, and P. S. Dorris are entitled to divert, in addition to the amounts of water hereinbefore set forth in this paragraph, as a right in said "surplus class", from the natural flow of Stockdill Slough at a point designated on said D.W.R. Map as Diversion 132, described in Schedule 2 hereof, for storage in said Dorris Reservoir in the amounts set after their respective names as follows:

G. B. Dorris and Beryl Parker Dorris - 400 acre-feet per annum
P. S. Dorris - 400 acre-feet per annum,

to be used as a supplemental supply for domestic, stock-watering and irrigation purposes, or as much of said amounts of water as are impounded in said Dorris Reservoir, and thereafter withdrawn from said reservoir during the period from April first to September thirtieth, both dates inclusive, of each year and applied to beneficial use for said purposes on the lands described under their respective names in said Schedule 1; provided, that prior to December 1, 1943, said G. B. Dorris and Beryl Parker Dorris, and P. S. Dorris shall have completed said appropriation from Parker Creek and applied said water to beneficial use in accordance with the terms of the Division of Water Resources Permit 854, and shall have submitted evidence of such completed appropriation and use to the Superior Court of the State of California, in and for the County of Modoc, in accordance with the provisions of Section 36f of said act; and provided further, the right hereinbefore set forth in this paragraph for G. B. Dorris and Beryl Parker Dorris and P. S. Dorris to divert from said Stockdill Slough shall be subject to the right of Hans A. Heesch and Margaret M. Heesch to divert from said Stockdill Slough as set forth in an agreement entered into on June 15, 1915, and recorded on June 16, 1915, on page 424 in Book 32 of Deeds of Modoc County.

60. Whenever there is a surplus of water in said stream system over and above the quantity necessary to supply all of the allotments herein provided, then that portion of such surplus water, if any, flowing in Parker Creek and its tributaries above Gleason Creek shall be apportioned among the claimants enumerated in Schedule 7 hereof in proportion to their respective total allotments, as set forth in said Schedule 7, for use for domestic, stock-watering and irrigation purposes, during the period from April first to September thirtieth, both dates inclusive, of each year, upon their lands described under their respective names in Schedule 1 hereof; provided, however, that nothing herein contained shall, or shall be construed to, permit any claimant to divert a quantity of water in excess of the quantity reasonably necessary for his requirements for beneficial use.
