**Subject:** Water Grab

The state's water storage hasn't changed in sixty years, and yet your pushing taking water from central valley farmers instead of advocating for more water storage. It is my opinion that you consider valley farmers an easier target than taking on your compadres in the environmental movement. You have the money and the power (Southern California) to push your agenda, and now you're using cherry picked data to push a fabricated environmental ruling. This is clearly a WATER GRAB.

THERE IS NO WAY THE TWIN TUNNELS AND THIS WATER GRAB ARE UNRELATED. ABSOLUTELY NO WAY, AND MY TRUST IN GOVERNMENT IS BEING ERODED BEYOND REPAIR!

Steve Dickson
