THIS REPORT IS REQUIRED BY THE TERMS AND CONDITIONS OF YOUR LICENSE

IMPORTANT!

Every License is issued subject to the conditions therein expressed. I have currently reviewed and am complying with the conditions under which this License has been issued. Yes No
 This report is important in providing the record of use needed in maintaining your water right. It should be filled out carefully and returned promptly to the State Water Resources Control Board, Division of Water Rights, Room 1015, Resources Building, 1416 Ninth Street, Sacramento, California 95814.

The project has been abandoned, and I request revocation of the License. Yes No

DIRECT DIVERSION

- Have you used the full licensed amount of water each year? Yes No
- State the quantity of water used each month in gallons or acre-feet (if not known, check months water was used.)

	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total Annual	AMOUNTS IN MILLIONS OF GALLONS

(Report continues on reverse side)

NOTE: The following questions relate to the Board's continuing responsibility to insure that appropriated water is best developed, conserved, and utilized in the public interest as required by the Water Code.

CONSERVATION OF WATER

- 17. What measures are you using or planning to reduce water losses in conveyance systems? (1) Seepage or leak detection program (2) Lining canals ; (3) Phreatophyte and aquatic vegetation control ; (4) Other (describe in remarks) .
- 18. What measures are used to encourage consumers to conserve water in agricultural use? (1) Program to encourage more efficient irrigation systems (sprinkler, drip, etc.), where applicable ; (2) Return-flow systems on individual farms ; (3) Return-flow system areawide ; (4) Water pricing to encourage reduced use ; (5) Charges for drainage of irrigated lands ; (6) Other (describe in remarks) .
- 19. What measures are used to encourage municipal and industrial consumers to conserve water? (1) Regulations to control wasteful use ; (2) Public education program on water conservation ; (3) Pricing to encourage reduced use ; (4) Assistance to industry in design of recycle systems ; (5) Other (describe in remarks) .
- 20. What records are maintained on water use and conservation? (1) Loss rate from conveyance system ; (2) Water use for major crops by each farm ; (3) Other (describe in remarks) .

WATER QUALITY AND WASTEWATER RECLAMATION

- 21. Describe methods you are using to minimize erosion and to prevent the entry of silt into surface waters:
ALL WATER IS IN A CLOSED SYSTEM, PIPING
NO OPEN DITCHES.
- 22. After use, the water is (1) retained in reservoir ; (2) discharged into a stream or lake ; (3) discharged into settling ponds ; (4) Other ; Describe: DISCHARGED INTO SEPTIC SYSTEMS.
- 23. Is or will water being discharged contain waste materials? Yes No
(1) Domestic ; (2) Municipal ; (3) Industrial ; (4) Agricultural ; (5) Other ; Describe: _____
- 24. Is or will water being discharged contain any specific material which is deleterious to fish and wildlife or which would impair the water for beneficial uses? Yes No Describe: _____
- 25. Describe what steps you are, have been, or can take to reclaim or directly reuse the water sought being appropriated: _____

REMARKS

Please designate by number the question you are answering:

19. P.U.C. INCREASED WATER RATES IN 1974
29. PLACING OF CUSTOMERS ON METERS TO
REDUCE AMOUNT OF WATER USED.

Gentlemen;

SUBJECT: THE NAMING OF AN UNKNOWN STREAM LOCATED IN TUOLUMNE COUNTY, TRIBUTARY TO NORTH FORK OF TUOLUMNE RIVER.

LOCATION OF STREAM IS AS FOLLOWS:

North 2,300 feet and east 2,500 feet from SW corner of section 31, T4N, R18E, MDB&M, being within NW $\frac{1}{4}$ of SE $\frac{1}{4}$ of said section 31.

In the past, some government agencies referred to this as an unknown stream. However, in the future we will refer to it as,

KERNS CREEK

The reason for this is for clarification of identity. The California State Water Resources Control Board issued certain water rights, PERMIT 14633, LICENSE 9120, to Sam & Melba Kerns, later transferred to Cold Springs Water Co., Inc., (owned by them,) on August 15, 1969.

A DESCRIPTION OF LANDS OR THE PLACE WHERE SUCH WATER IS PUT TO BENEFICIAL USE IS AS FOLLOWS:

Cold Springs Subdivision within section 36, T4N, R17E, MDB&M, and Peter Pam Subdivision within SW $\frac{1}{4}$ of NE $\frac{1}{4}$ of section 2, T3N, R17E, MDB&M.

HISTORICAL

The Sam Kerns family has resided in this area for over 30 years. They are the developers of Cold Springs and Peter Pam Subdivisions, which the main source of water supply comes from this creek. For the last several years, the local County Health Dept., and the

Subject: The naming of an unknown stream located in Tuolumne County, Tributary to North Fork of Tuolumne River

Attached is a letter addressed to Department of Water Resources on the naming of an unknown stream located in Tuolumne County, tributary to North Fork of Tuolumne River.

I am not sure by what means it reached my office. However, since it did, as Chairman of the California Advisory Committee on Geographic Names, I forwarded a copy to Mr. Chesterman, one of the committee members whose area of responsibility covers Tuolumne County.

I am sending you the original letter as it appears it should have been sent to the Water Rights Division.

Gentlemen:

R.E.--PROGRESS REPORT YEAR 1966
APPLICATION 21647
PERMIT 14633

We started using water from this stream on July 19, 1966 for domestic use in our Cold Springs Subdivisions Units 1-2-3- and 4 ----

The actual construction of this project was finished last week- Oct. 14, 1966 when we installed our automatic chlorination system ---All construction work was finished then-- with the exception, as a matter of clarification, we have one more pump to install at our main water pumping station located below our property on the North Fork of the Tuolumne River, which will be used to pump our full Water Right capacity as more houses are built and the demand requires it.

At the present time we are using a 25 h.p. Mino Pump that pumps 89 gallons per minute. -- All plumbing and electric wiring has been completed ready for the installation of the second pump, which will be installed probably next summer---When this is installed we will be able to pump our full capacity and it will also fulfill the Public Utility requirements as a stand by pump.

We are ready for a final inspection-- whenever it is convenient for you. Would appreciate it if you would let us know in advance, as this is off season and we are not at the Tract every day. If an inspection is not made within the next few weeks it would probably be better to wait until late Spring, because of snow conditions.

We have made regular checks of the amount of water coming from the

STATE WATER RIGHTS BOARD~~XXXXXXXXXX~~
C.M. HARRIS

MEMORANDUM

TO Engineering Staff
FROM L. C. JopsonDATE August 2, 1963
SUBJECT General Instructions for
the Handling of Unprotected Applications

Following issuance of Decisions D 990 and D 1045, several methods of handling unprotected applications have been developed depending on physical condition relating to water supply, as follows:

a. Where unappropriated water appears to be available at all times. In this case the application is approved without reduction of diversion season.

b. Where there is no hydraulic continuity between applicant's source and any surface water course leading to the Delta during the summer and fall months. Again in this case the application is approved without reduction in season.

c. Where there is hydraulic continuity of the applicant's source to the Delta during the low flow period via streams where diversion during some months has been denied by decision. Applicant is required to delete critical months from diversion season before permit is issued, or appear for hearing.

d. Where applicant is above a reservoir which has an all year season of collection or diversion and exercises full control of the stream during the critical season; or where a downstream diverter takes the entire flow during the critical season. If applicant can eliminate the protest of the agency controlling or diverting the entire stream, all year diversion is allowed subject to higher level staff approval.

e. Special cases, such as an application for interim use, which do not fall in any of the above categories. Proceed in an equitable manner as determined by higher staff levels.

There is some overlap in the above classification, and the staff may not find it easy to determine in what category an application should be placed. A field investigation during the critical season is essential in most instances, and the results of the investigation will be utilized in determining the proper category. Once the category is established, the processing will ordinarily proceed as indicated above.

Subject: Application 21647

Dear Mr. Hill:

Many thanks for your letter of Jan. 8, 1965 that our application
has been approved and permit has been issued.

Enclosed is a money order for \$ 5.00 for the minimum fee.

I would appreciate it if you would rush our copy of the application
with the endorsed permit, as I am in need of it for the Public
Utility Commission.

Many thanks to everyone for your wonderful cooperation,

Sincerely,

Sam Kerns

Dear Mr. and Mrs. Kerns:

Your application has been approved and permit has been issued. Fees are now due in accordance with the provisions of the Water Code as follows:

Minimum fee \$5.00

12-19454

You should give this matter immediate attention by sending post office money order or check in the above amount within 10 days if possible. After we receive the fee, a copy of your application with the permit endorsed on the back of it will be sent to you. Checks are accepted subject to collection.

Sincerely,

L. K. Hill

COUNTY: TUOLUMNE

AMOUNT: 0.25 CU FT/SEC

SEASON OF DIVERSION: January 1 to December 31

PURPOSE: DOMESTIC & FIRE PROTECTION

PROTESTS:	PROTESTANTS	ANSWERED	STIPULATIONS	DISMISSED OR WITHDRAWN
-----------	-------------	----------	--------------	---------------------------

None

REMARKS:

Investigated by L. D. Johnson.
No prior pending protested applications affected.
Mr. Johnson states that continuity of flow apparently exists from the point of diversion to the Delta. He also states that approval of the application would not diminish the supply to the Delta during the critical months in the years of water shortage. Turlock Irrigation District and Modesto Irrigation District received notice of the application but did not protest.

PERMIT TERMS

Application No. 21647 Filled out by APC Date 9-22-64

This is to certify that the application of which the foregoing is a true and correct copy has been considered and is hereby approved SUBJECT TO VESTED RIGHTS and the following limitations and conditions:

1. The amount of water appropriated shall be limited to the amount which can be beneficially used and shall not exceed 0.25 cubic foot per second to be diverted from January 1 to December 31 of each year.

~~XX~~

~~The equivalent of such continuous flow allowance for any thirty day period may be diverted in a shorter time if there be no interference with vested rights.~~

2. The maximum amount herein stated may be reduced in the license if investigation so warrants.
 3. Actual construction work shall begin on or before ~~September 1, 1964~~ June 1, 1965 and shall hereafter be prosecuted with reasonable diligence, and if not so commenced and prosecuted, this permit may be revoked.

4. Said construction work shall be completed on or before December 1, 1966, 1967

5. Complete application of the water to the proposed use shall be made on or before December 1, 1968.

6. Progress reports shall be filed promptly by permittee on forms which will be provided annually by the State Water Rights Board until license is issued.

7. All rights and privileges under this permit including method of diversion, method of use and quantity of water diverted are subject to the continuing authority of the State Water Rights Board in accordance with law and in the interest of the public welfare to prevent waste, unreasonable use, unreasonable method of use or unreasonable method of diversion of said water.

~~9. This permit does not authorize collection of water to storage during the period from about to about of each season to offset evaporation and seepage losses, or for any other purpose.~~

8. Permittee shall allow representatives of the State Water Rights Board and other parties, as may be authorized from time to time by said Board, reasonable access to project works to determine compliance with the terms of this permit.

PERMIT 14633

Neither the filing of an application nor issuance of a permit in approval thereof constitutes a water right. A water right is established only by beneficial use of water in accordance with the terms and conditions of the permit. This report provides a record of the development of your project. If the project is diligently completed a license will be issued to confirm the right developed by beneficial use.

1. Has construction work commenced? YES
 2. Has all construction work been completed? NO If not, give estimated date of completion 7/1/66
 3. State approximate cost of construction work on this project during the past 12 months 12,000.00

Describe briefly the portions of the project upon which the above amount was spent. BUILT & COMPLETED

CONCRETE DIVERSION DAM - COMPLETED INSTALLED AT APPROX. 3500' OF 4" TRANSITE PIPE FROM DAM TO PUMPING PLANT - PAID FOR APPROX. 6500' FT. OF AND CONCRETE TRANSITE PIPE TO PLACE FROM PUMPING PLANT TO STORAGE IN UNIT #4 - STORAGE TANK AND PUMP AT STORAGE

4. What construction work remains to be done to complete the project? PUMPING PLANT, FILTER
 5. Has use of water commenced? YES Amount (if known) _____
 6. Has use of water, as to both amount and season, been as great as you expect in any future year under this permit? YES
 7. During what months was water used in 1965 under this permit? None
 8. Has location of the intake or place of use been changed? NO
 9. Did the source go dry? NO If so, during what months? _____
 10. Did your reservoir spill this year? YES If not, how many feet below crest vertically was the water level at maximum storage? _____ Have you emptied the reservoir? YES If not, how many feet below crest vertically was it drawn down at end of season? EMPTIED IT TO FRESH IT OUT

11. You should keep complete records of your use of water in your own files. Please supply information below concerning your use of water.

L.K.Hill
Executive Officer

Dear Mr. Hill:

Subject: Permit No. 14833

This is to inform you that clearing of our Diversion Dam Site and pipe line right of way was started in May 1965. The Diversion Dam was completed in June 1965 (Picture enclosed) We are now in the process of installing the pipe line from the Dam to our pumping station and from the pumping station to our water storage tanks. We expect to have this completed by Sept.1,1965

We are keeping a log of our construction progress as well as a log on the water flow at the Dam at various times through out the year. These logs are at your disposal at all times.

Our last test on the water flow at the Dam was taken July 11,1965. This test showed a little over 300 gallons per minute, which far exceeds our water Permit.

We expect to have this entire project completed by the end of this year and in complete operation not later than July 1,1966.

If you require any additional information, please do not hesitate to contact us.

Sincerely,
COLD SPRINGS WATER CO.

Sam Kerns

STATE OF CALIFORNIA
STATE WATER RIGHTS BOARD

MEMORANDUM

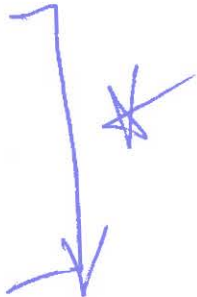

TO K. L. Woodward
FROM L. D. JohnsonDATE August 28, 1964
SUBJECT Continuity of Flow,
Application 21647 - Unnamed
Stream Tributary to North
Fork Tuolumne River in
Tuolumne County

This application was referred to the Hearing Section for investigation regarding continuity of flow to the Sacramento-San Joaquin Delta.

I visited the area of the proposed project on August 25, accompanied by Peter J. Kerns, the applicants' son. No construction work has been done on the project. The point of diversion is located on an unnamed stream approximately 100 feet from its confluence North Fork Tuolumne River. Flow at the point of diversion was about 0.2 cubic foot per second. The flow of North Fork Tuolumne River below the confluence with the unnamed stream was about 2 cubic feet per second.

The flow of North Fork Tuolumne River was also checked at Browns Meadow several miles downstream. Although the surface flow was less, it still exceeded 1 cubic foot per second. Continuity of flow apparently exists from the point of diversion to the Delta.

Although continuity of flow exists, approval of the application would not diminish the supply to the Delta during the critical months in the years of water shortage. The flow of

Tuolumne River during July, August and September is now almost completely controlled by the 290,000 acre-foot capacity Don Pedro Reservoir of Turlock and Modesto Irrigation Districts. In addition to storage the districts have rights for direct diversion not to exceed 4500 cubic feet per second.

Under present conditions uncontrolled flow below Don Pedro Dam has occurred during July, August and September only for a few days, usually in July, during wet years. At these times no shortage would be expected to be occurring in the Delta.

In addition, the districts hold Application 14127, Permit 9320, for storage of an additional 1,568,000 acre-feet in the proposed new Don Pedro Reservoir. Usable storage capacity of 1,730,000 acre-feet is now planned for this reservoir. Upon completion of this project, uncontrolled flows during July, August and September in Tuolumne River below the reservoir can be expected to be practically nonexistent.

Both Turlock Irrigation District and Modesto Irrigation District received notice of Application 21647. Neither district submitted a protest. A letter was received from Modesto Irrigation District indicating that they had no objection to the application.

L. C. Jopson, in his memorandum "General Instructions for the Handling of Unprotested Applications" dated August 2, 1963, states as follows:

"d. Where applicant is above a reservoir which has an all year season of collection or diversion and exercises full control of the stream during the critical season; or where a downstream diverter takes the entire flow during the critical season. If applicant can eliminate the protest of the agency controlling or diverting the entire stream, all year diversion is allowed subject to higher level staff approval."

The project proposed under Application 21647 can be expected to result in no diminution of supply to the Delta during July, August and September in years of water shortage. The situation conforms substantially to the instructions in the Chief Engineer's memorandum. Thus, I recommend that a permit be issued to the applicants for the full season requested.

Attention: L. K. Hill, Executive Officer

Dear Mr. Hill: Re: Application #21647 - Notice of Application to
Appropriate Water by
Cold Springs Water Co.

With reference to the above referenced application, the undersigned holders of Water Use Permit #10124 for diversion of water from an unnamed stream, tributary to the North Fork of the Tuolumne River, to the extent of 12,000 gallons per day between April 1 and October 1 of each year, for use on Lots 2,3 and 4 in Section 6, Tp 3N, R18E, MDB&M, Tuolumne County, hereby expresses its intention to protest the aforementioned application.

It is respectfully requested that the necessary blanks be forwarded immediately for submitting such protest within the time limit indicated in a notice from your office which has just reached the hand of the undersigned, your notice of application bearing date of May 22, 1964.

Our Water Use Permit is issued in the name of the Boy Scout Memorial Foundation, a corporation which holds title to our property above referred to. For the purpose of expediting the filing of such protest within the time limit, kindly address your correspondence c/o Santa Clara County Council Boy Scouts of America, 2095 Park Avenue, 26, San Jose, California, attention of Raymond J. Ewan, Executive.

It is the feeling and judgment of the Council Camping Committee that the diversion of the volume of water, the year around, by the said applicant would seriously impair and restrict the use of our property for camp use in our permanent program.

It is noted that said application affects an unnamed stream lying within the NE 1/4 of the SW 1/4 of Sec 31, Tp4N, R18E, MDB&M, which adjoins our property to the North, and is government land.

Respectfully

Chairman, Camping Committee

Gentlemen:

There are enclosed three copies of a notice of your application, two of which should be posted as indicated below and the third of which should be returned to this office with attached affidavit.

You are directed to post two copies of this notice on or before June 8, 1964, in at least two conspicuous places in the locality to be affected by the proposed appropriation. On or before July 1, 1964, you should file with this office proof of such posting. IT IS REQUIRED THAT PROOF OF POSTING SHALL CONSIST OF AN AFFIDAVIT EXECUTED ON THE ENCLOSED FORM ATTACHED TO A COPY OF THE NOTICE OF APPLICATION TO APPROPRIATE. In case of inability to post two copies of the notice or file proof of posting within the time allowed kindly advise this office immediately and copies of a new notice of a later date will be forwarded.

This notice is designed for the mutual protection of applicant and prior claimants. Although vested rights to the use of water from the source from which the appropriation is sought cannot be lost, prejudiced or impaired by failure to protest against the application, prior claimants are given this notice so that they may protest if it is felt the proposed appropriation will result in injury to them.

If protests are filed you will be furnished with copies thereof and you are required to file with this office and with the protestant a brief but complete answer to each protest. There is no prescribed legal form which such answer must take but anything which you may do toward placing this office in possession of all the facts relative to the objections raised to your application will expedite action thereon.

Very truly yours

L. K. Hill

STATE OF CALIFORNIA—STATE WATER RIGHTS BOARD

FEB 20 2 09 PM '64

Application No. 21647 Filed Feb. 20, 1964 at 2:09 SACRAMENTO STATE WATER RIGHTS BOARD

APPLICATION TO APPROPRIATE UNAPPROPRIATED WATER

I, Son and Melba Kern DBA Cold Springs Water Co. Name of applicant or applicants
of Box 1280, Star Butte, Sonoma County of Tuolumne
State of California, do hereby make application for a permit to appropriate the

following described unappropriated waters of the State of California, **SUBJECT TO VESTED RIGHTS:**

Source, Amount, Use and Location of Diversion Works

1. The source of the proposed appropriation is UPSTREAM REACH OF THE NORTH FORK TUOLUMNE RIVER
located in Tuolumne County, tributary to Tuolumne River

2. The amount of water which applicant desires to appropriate under this application is as follows:

(a) For diversion to be directly applied to beneficial use 25 cubic feet per second, to be diverted from January 1 to December 31 of each year.

(b) For diversion to be stored and later applied to beneficial use _____ acre-feet per annum, to be collected between _____ and _____ of each season.

Note.—Answer (a) or (b) or both (a) and (b) as may be necessary. If amount under (a) is less than .021 cubic foot per second, state in gallons per day. Neither the amount nor the season may be increased after application is filed. If underground storage is proposed a special supplemental form will be supplied by the State Water Rights Board upon request.

3. The use to which the water is to be applied is Domestic & Fire Protection

4. The point of diversion is to be located 2500 feet North, 3800 feet West of the S.W. Cor. Sec. 31, T. 4N, R. 10E.

being within the NW 1/4 of SE 1/4 of Section 31, T. 4N, R. 10E, S. B. & M., in the County of Tuolumne

5. The main conduit terminates in _____ of Sec. _____, T. _____, R. _____, S. B. & M.

Description of Diversion Works

NOTE.—An application cannot be approved for an amount grossly in excess of the estimated capacity of the diversion works.

6. Intake or Headworks (fill only those blanks which apply)

(a) Diversion will be made by pumping from _____

(b) Diversion will be by gravity, the diverting dam being 3 1/2 feet in height (stream bed to level of overflow); 20 feet long on top; and constructed of Concrete

(c) The storage dam will be _____ feet in height (stream bed to spillway level); _____ feet long on top; have a freeboard of _____ feet, and be constructed of _____

7. Storage Reservoir

The storage reservoir will flood lands in _____

477

It will have a surface area of _____ acres, and a capacity of _____ acre-feet. If reservoir has a capacity of 25 acre-feet or more fill in the following: Diameter of outlet pipe _____ inches; length _____ feet; difference in elevation from spillway level to highest point of outlet pipe _____ feet; fall in pipe _____ feet.

FORM 1 Vol II 126 15' 904 d Long Bay, Calif.

3. Conduit System (describe main conduit only) _____ feet; depth of water _____ feet; length _____ feet; grade _____ feet per 1,000 feet materials
 (b) Canal ditch, flume, width on top (or water line) _____ feet; width at bottom _____ feet; depth of water _____ feet; length _____ feet; grade _____ feet per 1,000 feet materials
Cover and type over head

(b) Pipe line: Diameter _____ inches; length _____ feet; grade _____ feet per 1,000 feet materials
Material, make, make, size
 1,000 feet; total lift _____ feet; kind _____ feet per 1,000 feet materials
From inside to outlet

Note:—If a combination of different sizes or kinds of conduit is to be used, attach extra sheet with complete description, also show location of each directly on map.
 5. The estimated capacity of the diversion conduit or pumping plant proposed is _____ CFS @ P.M.
 The estimated cost of the diversion works proposed is \$50,000.00
Other info, name of location, or location, pump, storage reservoir and with attached detailed plans

Completion Schedule

10. Construction work will begin on or before April 1, 1935
 Construction work will be completed on or before July 1, 1935
 The water will be completely applied to the proposed use on or before _____

Description of Proposed Use

11. Place of Use. Cold Springs Subdivision on 240 acres in Section 20, T. 4 S., R. 17 E., (Sec 20) attached
Show town subdivision of the public land survey. If land is surveyed include the location in the Block of the public land survey you refer to. See the location on your old number. Section of the original railroad right-of-way if you prefer. If you show the location of all other lands, describe same in a general way and show detail upon map.

Do (a) applicant (s) own the land upon which use of water will be made? No
 All land owned should include tract name as applicants and date acquisition or location of tract map.

Applicant is Private Utility Service Water to Home in Cold Springs Subdivision
 If applicant does not own land, whom the of water will be made? Show tract and address of owner and name when completed. Show how water will flow to the above named lands.
 12. Other Rights: Describe all rights except those on file with the State Water Right Board under which water is served to the above named lands.

No.	Name of Right (Easement, appurtenance, jointure, etc.)	Section of State Use	Yield under normal irrigation including amount if known	Season of Use	Source of Other Supply
1.					
2.					
3.					
4.					

Attach supplement at top of page 3 if necessary.
 13. Irrigation Use. The area to be irrigated is None acres.
 The segregation of crops as to crops is as follows: Rice _____ acres; Alfalfa _____ acres;

orchard _____ acres; general crops _____ acres; pasture _____ acres.
 Note:—Care should be taken that the various statements as to acreage are consistent with each other, with the statement in Part 11, and with the map.
 The irrigation season will begin about _____ and end about _____
Beginning date Ending date

14. Power Use. The total fall to be utilized is _____ and head about _____ feet.
Difference between amount of draft under water level and flow from water surface above
 The maximum amount of water to be used through the penstock is _____ cubic feet per second.
 The maximum theoretical horsepower capable of being generated by the works is _____ horsepower.
Based on law X Fall + H

The use to which the power is to be applied is _____
 The nature of the works by means of which power is to be developed is _____
 The size of the nozzle to be used is _____ inches.

The water will be returned to _____
 The water will not _____
 Sec. T _____ R. R. E. M.
Name survey State of your subdivision

DO NOT WRITE IN THIS SPACE
ATTACH EXTRA SHEETS HERE

15. Municipal Use. This application is made for the purpose of serving none
Name city or village, town or ward. Urban areas only
having a present population of _____

The estimated average daily consumption during the month of maximum use at the end of each five-year period until the full amount applied for is put to beneficial use is as follows:

16. Mining Use. The name of the mining property to be served is _____
Name of claim
and the nature of the mines is _____
Gold, silver, copper, etc.

The method of utilizing the water is _____

It is estimated that the ultimate water requirement for this project will be _____
Galloons per second, gallons per minute. State basis of estimate

The water will be polluted by chemicals or otherwise _____
will not Explain nature of pollution, if any

and it will be returned to _____ in _____ of _____
will not Name stream State or town subdivision
Sec. _____, T. _____, R. _____, B. & M. _____

17. Other Uses. The nature of the use proposed is Domestic
Industrial, recreational, domestic, stockwatering, fish culture, etc.

State basis of determination of amount needed. 300 House of 200 Gallons per day each.
Number of persons, residences, acre of domestic lawns and gardens, number and kind of stock, type

Industrial use, and water requirements _____

General

18. Are the maps as required by the Rules and Regulations filed with Application? Yes If not, state specifically the time required for filing same

19. Does the applicant own the land at the proposed point of diversion? No If not, give name and address of owner and state what steps have been taken to secure right of access thereto
Stanislaus National Forest, Sonoma, Calif.
Application has been made for pipe line, road, storage tanks and power.

20. What is the name of the post office most used by those living near the proposed point of diversion?
Sonoma (Form 7)

21. What are the names and addresses of claimants of water from the source of supply below the proposed point of diversion?

APPLICANT'S SIGNATURE
[SIGNATURE OF APPLICANT] Stan Stanislaus

APPLICANT MUST NOT FILL IN BLANKS BELOW

PERMIT No. _____

This is to certify that the application of which the foregoing is a true and correct copy has been considered and approved by the State Water Rights Board SUBJECT TO VESTED RIGHTS and the following limitations and conditions:

1. The amount of water appropriated shall be limited to the amount which can be beneficially used, and shall not exceed _____
2. The maximum amount herein stated may be reduced in the license if investigation warrants.
3. Actual construction work shall begin on or before _____ and shall thereafter be prosecuted with reasonable diligence, and if not so commenced and prosecuted this permit may be revoked.
4. Said construction work shall be completed on or before _____
5. Complete application of the water to the proposed use shall be made on or before _____
6. Progress reports shall be filed promptly by permittee on forms which will be provided annually by the State Water Rights Board until license is issued.
7. All rights and privileges under this permit including method of diversion, method of use and quantity of water diverted are subject to the continuing authority of the State Water Rights Board in accordance with law and in the interest of the public welfare to prevent waste, unreasonable use, unreasonable method of use or unreasonable method of diversion of said water.
8. Permittee shall allow representatives of the State Water Rights Board and other parties, as may be authorized from time to time by said Board, reasonable access to project works to determine compliance with the terms of this permit.

This permit is issued and permittee takes it subject to the following provisions of the Water Code:

Section 1390. A permit shall be effective for such time as the water actually appropriated under it is used for a useful and beneficial purpose in conformity with this division (of the Water Code), but no longer.

Section 1391. Every permit shall include the enumeration of conditions therein which in substance shall include all of the provisions of this article and the statement that any appropriator of water to whom a permit is issued takes it subject to the conditions therein expressed.

Section 1392. Every permittee, if he accepts a permit, does so under the conditions precedent that no value whatsoever in excess of the actual amount paid to the State therefor shall at any time be assigned to or claimed for any permit granted or issued under the provisions of this division (of the Water Code), or for any rights granted or acquired under the provisions of this division (of the Water Code), in respect to the regulation by any competent public authority of the services or the price of the services to be rendered by any permittee or by the holder of any rights granted or acquired under the provisions of this division (of the Water Code) or in respect to any valuation for purposes of sale to or purchase, whether through condemnation proceedings or otherwise, by the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State, of the rights and property of any permittee, or the possession of any rights granted, issued, or acquired under the provisions of this division (of the Water Code).

Dated: _____

STATE WATER RIGHTS BOARD

[For full information concerning the filing out of this form, refer to Article 4 of Rules and Regulations Pertaining to Appropriation of Water.]

STATE OF CALIFORNIA—STATE WATER RIGHTS BOARD

Application No. 21647 Filed February 20, 1964 at 209 P.M.
(Applicant must not fill in the above blank.)

APPLICATION TO APPROPRIATE UNAPPROPRIATED WATER

I, Sam and Melba Kerns DBA Cold Springs Water Company
Name of applicant or applicants
of Box 1280, Star Route, Sonora County of Tuolumne
Address
State of California, do hereby make application for a permit to appropriate the

following described unappropriated waters of the State of California, **SUBJECT TO VESTED RIGHTS:**

Source, Amount, Use and Location of Diversion Works

1. The source of the proposed appropriation is unnamed stream
Give name of stream, lake, etc., if named; if unnamed state nature of source and that it is unnamed.
located in Tuolumne County, tributary to North Fork Tuolumne River thence Tuolumne River

2. The amount of water which applicant desires to appropriate under this application is as follows:

(a) For diversion to be directly applied to beneficial use .27 cubic feet per
1 cubic foot per second equals 43.2 statute cubic inches or 64.6317 gallons per day
second, to be diverted from January 1 to December 31 of each year.
Beginning date Closing date

(b) For diversion to be stored and later applied to beneficial use _____ acre-feet
1 acre-foot equals 325,851 gallons
per annum, to be collected between _____ and _____ of each season.
Beginning date Closing date

NOTE.—Answer (a) or (b) or both (a) and (b) as may be necessary. If amount under (a) is less than .025 cubic foot per second, state in gallons per day. Neither the amount nor the season may be increased after application is filed. If underground storage is proposed a special supplemental form will be supplied by the State Water Rights Board upon request.

3. The use to which the water is to be applied is domestic and fire protection
(Domestic, irrigation, power, municipal, mining, industrial, recreational)
_____ purposes.

4. The point of diversion is to be located 2300' N and 2500' E of the SW corner of Section 31
State bearing and distance or coordinates derived from section or quarter section corner

being within the NW¹ of SE¹
State 40-acre subdivisions of public land survey or protection thereof
of Section 31, T. 4N, R. 18E, M.D. B. & M., in the County of Tuolumne

5. The main conduit terminates in _____ of Sec. _____, T. _____, R. _____ B. & M.
State 40-acre subdivision of U. S. Government survey or protection thereof

Description of Diversion Works

NOTE.—An application cannot be approved for an amount greater in excess of the estimated capacity of the diversion works.

6. Intake or Headworks (fill only those blanks which apply)

(a) Diversion will be made by pumping from _____
ump, siphon, well, restricted channel, etc.
(b) Diversion will be by gravity, the diverting dam being _____ feet in height (stream bed to

level of overflow); 20 feet long on top; and constructed of concrete
Concrete, earth, brush, etc.

(c) The storage dam will be _____ feet in height (stream bed to spillway level); _____ feet
long on top; have a freeboard of _____ feet, and be constructed of _____
Concrete, earth, etc.

7. Storage Reservoir
Name

The storage reservoir will flood lands in _____
Indicate section or sections, also 40-acre subdivisions; water shown upon map

It will have a surface area of _____ acres, and a capacity of _____ acre-feet. If reservoir has a
capacity of 27 acre-feet or more fill in the following: Diameter of outlet pipe _____ inches; length _____ feet;
difference in elevation from spillway level to highest point of outlet pipe _____ feet; fall in pipe _____ feet.

NOTE.—In case of insufficient space for answers in form, attach extra sheets at top of page 3 and cross reference.

8. Conduit System (describes main conduits only)

(a) Canal, ditch, flume: Width on top (at water line) _____ feet; width at bottom _____ feet; depth of water _____ feet; length _____ feet; grade _____ feet per 1,000 feet; materials of construction _____
Earth, rock, timber, etc.

(b) Pipe line: Diameter 6 inches; length 8000 feet; grade 125 feet per 1,000 feet; total ^{YANK} lift from intake to outlet 800 feet; kind Steel
Riveted steel, concrete, wood-stave, etc.

NOTE.—If a combination of different sizes or kinds of conduit is to be used, attach extra sheets with complete description, also show location of each clearly on map.

9. The estimated capacity of the diversion conduit or pumping plant proposed is 100 gallons per minute
State cubic feet per second or gallons per minute

The estimated cost of the diversion works proposed is \$ 30,000.
Give only cost of intake, or headworks, pump, concrete structure and main conduits described herein

Completion Schedule

10. Construction work will begin on or before April 1, 1964
 Construction work will be completed on or before June 15, 1964
 The water will be completely applied to the proposed use on or before July 1, 1964

Description of Proposed Use

11. Place of Use. Cold Springs subdivision - 248 acres in Section 36, T4N, R17E, MDB&M.
State 40-acre subdivisions of the public land survey. If area is unsurveyed indicate the location as if lines of the public land survey were projected. In the case of irrigation set state the number of acres to be irrigated in each 40-acre tract, if space permits. If space does not permit listing of all 40-acre tracts, describe area in a general way and show detail upon map.

Do (es) applicant (s) own the land whereon use of water will be made? No Jointly? No
Yes or No Yes or No

Applicant is Public Utility Serving Water to Homes in Cold Springs Subdivision
If applicant does not own land whereon use of water will be made, give name and address of owner and state what arrangements have been made with him.

12. Other Rights. Describe all rights except those on file with the State Water Right Board under which water is served to the above named lands.

Nature of Right (irrigation, appropriative, purchased water, etc.)	Year of First Use	Use made in recent years including amount if known	Season of Use	Source of Other Supply
1.				
2.				
3.				
4.				

Attach supplement at top of page 3 if necessary.

13. Irrigation Use. The area to be irrigated is _____ acres.
State net acreage to be irrigated

The segregation of acreage as to crops is as follows: Rice _____ acres; alfalfa _____ acres; orchard _____ acres; general crops _____ acres; pasture _____ acres.

NOTE.—Care should be taken that the various statements as to acreage are consistent with each other, with the statement in Paragraph 11, and with the map.

The irrigation season will begin about _____ and end about _____
Beginning date Closing date

14. Power Use. The total fall to be utilized is _____ feet.
Difference between intake or draft tube water level and first free water surface above

The maximum amount of water to be used through the penstock is _____ cubic feet per second.

The maximum theoretical horsepower capable of being generated by the works is _____ horsepower.
Second feet X fall ÷ 5.5

The use to which the power is to be applied is _____
For distribution and sale or private use, etc.

The nature of the works by means of which power is to be developed is _____
Turbine, Pelton wheel, etc.

The size of the nozzle to be used is _____ inches.

The water will be returned to _____ in _____ of _____
Name owner Section 40-acre subdivision

Sec. _____, T. _____, _____, B. & M.

DO NOT WRITE IN THIS SPACE
ATTACH EXTRA SHEETS HERE

15. Municipal Use. This application is made for the purpose of serving _____
Name city or district, town or village. Urban uses only
having a present population of _____

The estimated average daily consumption during the month of maximum use at the end of each five-year period until the full amount applied for is put to beneficial use is as follows:

16. Mining Use. The name of the mining property to be served is _____
Name of mine
and the nature of the mines is _____
Gold, silver, copper, etc.

The method of utilizing the water is _____

It is estimated that the ultimate water requirement for this project will be _____
Cubic feet per second, gallons per minute, flow bank of estimate

The water will be polluted by chemicals or otherwise _____
Specify nature of pollution, if any

and it will be returned to _____ in _____ of _____
Name stream State or subdivision

Sec. _____ T. _____ R. _____ B. & M. _____

17. Other Uses. The nature of the use proposed is _____
Industrial, recreational, domestic, stockraising, fish culture, etc.

State basis of determination of amount needed. 500 homes at 500 gallons per day each
Number of persons, residences, area of domestic lawns and gardens, number and kind of stock, etc.

Industrial use, and unit requirements _____

_____ **General** _____

18. Are the maps as required by the Rules and Regulations filed with Application? Yes If not, state specifically the time required for filing same _____
Yes or No

19. Does the applicant own the land at the proposed point of diversion? No If not, give name and address of owner and state what steps have been taken to secure right of access thereto.

Stanislaus National Forest, Sonora, California - Application has been made for pipeline, road, storage tanks and power.

20. What is the name of the post office most used by those living near the proposed point of diversion?
Sonora, California

21. What are the names and addresses of claimants of water from the source of supply below the proposed point of diversion?

[SIGNATURE OF APPLICANT] /s/ Sam Kerns - Owner

APPLICANT MUST NOT FILL IN SPACES BELOW

PERMIT NO. 14633

This is to certify that the application of which the foregoing is a true and correct copy has been considered and approved by the State Water Rights Board SUBJECT TO VESTED RIGHTS and the following limitations and conditions:

1. The amount of water appropriated shall be limited to the amount which can be beneficially used, and shall not exceed 0.25 cubic foot per second to be diverted from January 1 to December 31 of each year.
2. The maximum amount herein stated may be reduced in the license if investigation warrants
3. Actual construction work shall begin on or before June 1, 1965, and shall thereafter be prosecuted with reasonable diligence, and if not so continued and prosecuted this permit may be revoked.
4. Said construction work shall be completed on or before December 1, 1967.
5. Complete application of the water to the proposed use shall be made on or before December 1, 1968.
6. Progress reports shall be filed promptly by permittee at four month intervals which will be provided annually by the State Water Rights Board until license is issued.
7. All rights and privileges under this permit including method of diversion, method of use and quantity of water diverted are subject to the continuing suitability of the State Water Rights Board in accordance with law and in the interest of the public welfare to prevent waste, unreasonable use, unreasonable method of use or unreasonable method of diversion of said water.
8. Permittee shall allow representatives of the State Water Rights Board and other parties, as may be authorized from time to time by said Board, reasonable access to project works to determine compliance with the terms of this permit.

14633

This permit is issued and permittee takes it subject to the following provisions of the Water Codes:

Section 1190. A permit shall be effective for such time as will not be actually appropriated under it is used for a useful and beneficial purpose in conformity with this division (of the Water Code), but no longer.

Section 1191. Every permit shall include the amount and destination of water to which a permit is issued and it subject to the conditions therein expressed, and the statement that any appropriation of water to which a permit is issued shall be subject to the conditions therein expressed.

Section 1192. Every permittee, if he accepts a specific flow or under the conditions precedent that no value whatsoever is given of the total amount paid to the State therefor shall at any time be subject to or obtained for any permit granted or issued under the provisions of this division (of the Water Code), or for any rights granted or acquired under the provisions of this division (of the Water Code), in respect to the regulations by any competent public authority of this division (of the Water Code) or in respect to any violation for purpose of sale by or purchase, whether through commission, prospecting or otherwise, by the State or any city, any and county, municipal water district, irrigation district, public district, or any political subdivision of the State, of the rights and property of any permittee, or the possession of any rights granted, issued, or acquired under the provisions of this division (of the Water Code).

STATE WATER RIGHTS BOARD
SACRAMENTO

APPLICATION TO APPROPRIATE UNAPPROPRIATED WATER

I, Sam and Melba Kerns DBA Cold Springs Water Co.
Name of applicant or applicant
of Box #280, Star Route, Sonora County of Tuolumne
Address
State of California, do hereby make application for a permit to appropriate the

following described unappropriated waters of the State of California, **SUBJECT TO VESTED RIGHTS:**

Source, Amount, Use and Location of Diversion Works

1. The source of the proposed appropriation is un-named branch of the North Fork, Tuolumne River
Give name of stream, lake, etc., if named; if unnamed give nature of source and that it is unnamed
located in Tuolumne County, tributary to North Tuolumne River

2. The amount of water which applicant desires to appropriate under this application is as follows:

(a) For diversion to be directly applied to beneficial use .25 cubic feet per second, to be diverted from January 1 to December 31 of each year.
1 cubic foot per second equals 44.883117 gallons per day
Beginning date Closing date

(b) For diversion to be stored and later applied to beneficial use _____ acre-feet per annum, to be collected between _____ and _____ of each season.
1 acre-foot equals 325,851 gallons
Beginning date Closing date

Note.—Answer (a) or (b) or both (a) and (b) as may be necessary. If amount under (a) is less than .021 cubic foot per second, state in gallons per day. Neither the amount nor the season may be increased after application is filed. If underground storage is proposed a special supplemental form will be supplied by the State Water Rights Board upon request.

3. The use to which the water is to be applied is Domestic & Fire protection
Domestic, irrigation, power, municipal, mining, industrial, recreational purposes.

4. The point of diversion is to be located 2300 feet North, 2400 feet West of the S.W. Cor. Sec. 31, T4N.R. 18 E.
State bearing and distance or coordinate distances from section or quarter section corner

being within the NE 1/4 SW 1/4 of Section 31, T. 4N, R. 18E, M.D.B. & M., in the County of Tuolumne
State 40-acre subdivision of public land, survey or projection thereof

5. The main conduit terminates in _____ of Sec. _____, T. _____, R. _____ B. & M.
State 40-acre subdivision of U. S. Government survey or projection thereof

Description of Diversion Works

NOTE.—An application cannot be approved for an amount greater in excess of the estimated capacity of the diversion works.

6. Intake or Headworks (fill only those blanks which apply)

(a) Diversion will be made by pumping from _____
Pump, offset wall, unobstructed channel, etc.

(b) Diversion will be by gravity, the diverting dam being 3 1/2 feet in height (stream bed to level of overflow); 20 feet long on top; and constructed of Concrete
Concrete, earth, brush, etc.

(c) The storage dam will be _____ feet in height (stream bed to spillway level); _____ feet long on top; have a freeboard of _____ feet, and be constructed of _____
Concrete, earth, etc.

7. Storage Reservoir _____
Name

The storage reservoir will flood lands in _____
Indicate portion or sections, also 40-acre subdivisions unless shown upon map

It will have a surface area of _____ acres, and a capacity of _____ acre-feet. If reservoir has a capacity of 25 acre-feet or more fill in the following: Diameter of outlet pipe _____ inches; length _____ feet; difference in elevation from spillway level to highest point of outlet pipe _____ feet; fall in pipe _____ feet.

Note.—In case of insufficient space for answers in form, attach extra sheets at top of page 3 and cross reference.

SUPERSEDED

10.00
AC 229

UNRECORDED

8. Conduit System (describe main conduit only)

(a) Canal, ditch, flume; Width on top (at water line) _____ feet; width at bottom _____ feet; depth of water _____ feet; length _____ feet; grade _____ feet per 1,000 feet; materials of construction _____

(b) Pipe line: Diameter 6 inches; length 8000 feet; grade 100 feet per 1,000 feet; total lift from intake to outlet 800 feet; kind Steel

Note.—If a combination of different sizes or kinds of conduit is to be used, attach extra sheets with complete description, also show location of each clearly on map.

9. The estimated capacity of the diversion conduit or pumping plant proposed is 125 g.p.m. The estimated cost of the diversion works proposed is \$30,000.00

Completion Schedule

10. Construction work will begin on or before April 1, 1964 Construction work will be completed on or before June 15, 1964 The water will be completely applied to the proposed use on or before July 1, 1964

Description of Proposed Use

11. Place of Use. Cold Springs Subdivision - 248 acres in Section 36, T. 4 N. R. 17 E. (See Map) attached

Do (es) applicant(s) own the land whereon use of water will be made? No Jointly? Yes

Applicant is Public Utility Serving Water to Homes in Cold Springs Subdivision

12. Other Rights. Describe all rights except those on file with the State Water Rights Board under which water is served to the above named lands:

Table with 5 columns: Name of Right, Year of First Use, Use made in recent years, Season of Use, Source of Other Supply

PROOF OF SERVICE

I, Lisa Haddix, declare as follows:

I am employed in the County of Sacramento, over the age of eighteen years and not a party to this action. My business address is 2100 21st Street, Sacramento, California 95818.

On June 17, 2016, I served the foregoing document(s) described as:

DECLARATION OF GLEN HANSEN IN SUPPORT OF FAHEY'S CLOSING BRIEF

On the parties stated below, by placing a true copy thereof in an envelope addressed as shown below by the following means of service:

SEE ATTACHED SERVICE LIST

- X BY MAIL:** I placed a true copy in a sealed envelope addressed as indicated above on the above-mentioned date. I am familiar with the firm's practice of collection and processing correspondence for mailing. It is deposited with the U.S. Postal Service on that same day in the ordinary course of business. I am aware that on motion of party served, service is presumed invalid if postal cancellation date or postage meter date is more than one day after the date of deposit for mailing in affidavit.
- X BY ELECTRONIC SERVICE [EMAIL]:** Sending a true copy of the above-described document(s) via electronic transmission from email address lhaddix@aklandlaw.com to the persons listed above on June 17, 2016, before 5:00 p.m. The transmission was reported as complete and without error. [CRC 2.256 (a)(4), 2.260].
- BY FEDEX:** On the above-mentioned date, I enclosed the documents in an envelope or package provided by an overnight delivery carrier and addressed to the persons listed on the attached service list. I placed the envelope or package for collection and overnight delivery following our ordinary business practices.
- BY PERSONAL SERVICE:** I placed a true copy in a sealed envelope addressed to each person[s] named at the address[es] shown and giving same to a messenger for personal delivery before 5:00 p.m. on the above-mentioned date.

I declare, under penalty of perjury under the laws of the State of California, that the foregoing is true and correct. Executed on June 17, 2016, at Sacramento, California.

Lisa Haddix
