

STATE WATER RESOURCES CONTROL BOARD
RESOLUTION NO. 89-28

DIRECTING THE EXECUTIVE DIRECTOR TO APPLY FOR AND EXECUTE AN AMENDMENT TO THE SOUTH BAY MULTI-SITE COOPERATIVE AGREEMENT WITH THE U.S. ENVIRONMENTAL PROTECTION AGENCY (EPA), REGION IX FOR THE PERIOD APRIL 1989 THROUGH APRIL 1990

WHEREAS:

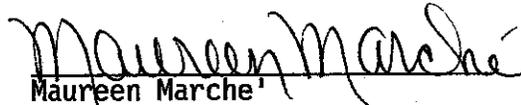

1. The issue of ground water contamination and the need for remedial action and cleanup in the South Bay area is of critical importance in relation to the threat this situation poses to beneficial uses of ground water, especially in regard to human health.
2. The South Bay is part of a large area where approximately 1.5 million residents rely on ground water to supply 50 percent of their drinking water.
3. The San Francisco Bay Regional Water Quality Control Board (Regional Board) since late 1981 has been involved in the implementation of a state effort to address water quality issues resulting from leaking underground storage tanks and poor handling practices of hazardous materials.
4. EPA, Region IX, since 1985 has awarded South Bay Multi-Site Cooperative Agreement (MSCA) grants to the state for staff and other necessary resources for regulation and oversight of ground water cleanup at federal Superfund sites in the South Bay (Santa Clara County). EPA, Region IX, has requested continued cooperation from the State Water Resources Control Board (State Board) and the Regional Board by continuing the grant and funding under the MSCA program at least through spring 1991. EPA, Region IX, supports amendment of the MSCA program through April 1990 at this time, conditioned upon an acceptable MSCA workplan to meet the current Grant Special Conditions.
5. Regional Board staff has prepared a South Bay MSCA workplan to meet the current Grant Special Conditions' time schedule that is suitable for submittal with an application for an EPA grant amendment to obtain funding through April 1990.

THEREFORE BE IT RESOLVED THAT:

1. The State Board approves the Regional Board's amended South Bay 1989-1990 MSCA Workplan funded by EPA. If EPA funding is limited, the Workplan shall be limited to match available EPA funding with priority to cleanup actions.
2. The Executive Director or his designee is directed and authorized to apply for and accept a South Bay MSCA grant amendment with EPA for regulation and oversight of ground water cleanup at South Bay Superfund sites.

CERTIFICATION

The undersigned, Administrative Assistant to the Board, does hereby certify that the foregoing is a full, true, and correct copy of a resolution duly and regularly adopted at a meeting of the State Water Resources Control Board held on April 20, 1989.

Maureen Marche
Administrative Assistant to the Board
