Subject: 8/16/16 BOARD MEETING -- ITEM # 10 Sea to Salton Sea

To Whom It May concern:

My letter to day is to express my concern about lack of action by politicians to do something before it's too late. It is absolutely ridiculous to spend an enormous amount on this SWIFFT plan that does zero to address the long term environmental and health issues happening right now!!! Swift??? Really??? This receding shoreline has been an issue for many years and during this time IID and all the agencies have been lying to us. You stole our water and gave it to San Diego. Why??? We are going to become very sick. Bruce Wilcox has denied dust here. That is a flat out lie!!! I am a homeowner and taxpayer and registered voter. Why can't someone please stop screwing around with my future?? I am guaranteed the right to pursue happiness in the declaration of independence. I have worked hard paid taxes and purchased a home that due to inept government has been losing value. Then the fact that my health is increasingly at risk. So please stop putting off he inevitable and put the money into a sea to sea plan. It solves everything.

Thank you
Tracey Milsop
