Subject: 2/2/16 BOARD MEETING (Conservation Extended Emergency Regulation)

To whom it may concern,

I am a San Juan water customer and I would like to urge the Board to consider less strict water reductions than the proposed 33% starting in February. This year's rainfall is far above last year's. Proposing sever restrictions this early in the season is what appears to be at least a normal rainfall year seems to be unwarranted at this time. My family made great sacrifices in our water usage last year to the point of letting almost all our landscaping die (at great cost to replace sometime in the future). I urge the board to delay any water-use restriction decision until later in the year so that we all know how the final rainfall totals pan out.

Thank you for your consideration,

Scott Taggart
