Subject: 2/2/16 BOARD MEETING (Conservation Extended Emergency Regulation

TO: State Water Resources Control Board
RE: Existing Emergency Water Conservation Regulations

Dear SWRCB:

During this unprecedented drought, my family has strived to comply with 36% water usage reduction. The reduction to 33% seems premature in light of El Niño rains and snow. Please reconsider this minimal change and I urge your reconsideration until water data is available in April.

Sincerely,

Steven B Raffin, MD, FACP
