Subject: Climate Change Resolution
Date: Tuesday, February 14, 2017 2:16:13 PM

My family and I own a business in CA. In fact, it is a riverfront RV Resort/Campground. We are being eaten alive by the State of CA, the County, and various agencies who answer to no one demanding fees so we may operate. All of this under the guise of "keeping everyone safe". This feel good resolution is along those same lines will inevitably lead to more fees from the state to justify their agenda.

There is NO, ZERO, ZIP, NADA, scientific empirical data that PROVES that climate change, global warming, or any other term along those lines is caused by humans. In fact, there is no evidence that it truly even exists.

It's called weather patterns. They change. Deal with it.

We at Club Royal Oak in Kingsburg CA are completely against this resolution and encourage all interested parties to vote against it.

Alan Degenhardt, CEO Club Royal Oak.
