Dear Water Board,

I am a physicist who follows the research into so called "Climate Change" closely. It is junk science. It is a farce. You will soon see the US EPA back away from "Climate Change" and rightly so.

AB 32 is a joke, totally unfounded. The Water Board's Resolution No. 2007-0059 was a wrong move. To now move forward on another resolution in regards to adopting a Climate Change resolution is a further step down a false road.

I strongly ask the State Water Board not adopt the climate change resolution as drafted by staff.

Kind Regards,
Edward W Tollefson
