Subject: Comment Letter – Climate Change Resolution
Date: Friday, February 10, 2017 3:58:41 PM

To whom it may concern,

I would like to offer my strong support for the adoption of the Resolution titled Comprehensive Response to Climate Change as proposed (currently in Draft form and dated Feb 9, 2017).

The link between water resources in California and CO2 emissions is clear. Recognizing the risks and addressing the root cause as well as the symptoms is imperative. The fight against Climate Change benefits the state, its citizens and wildlife in many ways in addition to reducing CO2 emissions including: reducing flood risk by capturing and infiltrating stormwater, reducing withdraws from habitats, improving reliability of local drinking water as well as others noted in the Resolution.

Thank you not only for the opportunity to comment on this Resolution but for developing it and moving it forward toward approval.

Best,
Keith Linker
