Subject: Bear Valley Water District

Dear Mr. Marshall,

I am a Bear Valley Water District ratepayer. I am writing you to express my strong support for the NPDES permit draft requiring secondary treatment. As I believe you know, Bear Valley has some very unique characteristics and discharge to surface waters is likely only under extreme conditions (ie 1-in 25 or more year events). Our effluent is already substantially tertiary under current conditions, it is the state policy of the District to discharge only in emergencies, and the District indicates that there has been no discharge in over ten years.

Accordingly, I strongly support secondary treatment as the basis for issuing the current NPDES permit.

Very truly yours,

Paul Webber
