Subject: Tentative amendment WDR 5-00-264-001

Lixin,

The following are the District's comments on the proposed amendment.

1. Page 2
 - a. Item 9
Item states the RWD states John Kautz Farms may decrease use reclaimed water due to a change to more drought-tolerant crop species..... This is not stated in the RWD. The RWD states ".....the farming operation from time-to-time may not need the whole amount of effluent produced by the WWTF." This is driven by yearly climatic conditions not potential changes in crop species.
 - b. Item 10
Item states "tertiary disinfected effluent" will be discharged to the LAAs. This is incorrect and should read "secondary disinfected effluent".

If you have an questions, let me know.

Gary
