

AGENDA ITEM 23 - Consideration of Adoption of Waste Discharge Requirements General Order For Discharges from Irrigated Lands within the Central Valley Region for Dischargers not Participating in a Third-party Group

Late Revisions (24 July 2013)

ATTACHMENT A – INFORMATION SHEET

Revisions to section “California Water Code Sections 13141 and 13241,” are shown below in underline/strikeout.

Page 33:

The total average estimated annual cost of compliance with this Order, e.g., summation of costs for administration, monitoring, reporting, tracking, implementation of management practices, is expected to be approximately \$123.~~5423~~ per acre greater than the cost associated with the protection of surface water only under the Coalition Group Conditional Waiver. The total average estimated cost of compliance associated with continuation of the previous Coalition Group Conditional Waiver within the entire Central Valley region is expected to be approximately \$~~60.7661.07~~ per acre annually. The total estimated average cost of this Order is \$184.29 per acre annually.

Page 35:

Table 3. Estimated annual average per acre cost of the Order relative to full implementation of the current program (PEIR Alternative 1)

	Order	Current program	Change
Administration	7.75	0. 5990	7.156.84
Farm plans	1.05	--	1.05
Monitoring/reporting/tracking	54.38	0.86	53.52
Management practices	121.12	59.31	61.81
Total	184.29	60.7661.07	118.55123.23

* Totals may not sum due to rounding. Per acre costs have been developed using the estimated irrigated acres in the Central Valley region (est. 7,863,002, Table 3-3, Economics Report).

** These costs are an estimate of *potential*, not required costs of implementing specific practices.
