Re: Dellar Landfill Closure Plan

Dear Mr. De Frate:

The purpose of this letter is to supplement the August 1, 2008 status report submitted by the City of Sacramento in regard to the above-described matter.

The Dellar Trust is coordinating with the City and its consultants for access to the property to conduct the specified survey contemplated by the cleanup and abatement order. In addition, the Trust is working out arrangements for the stockpiling of approximately 100,000 cubic yards of soil to be utilized for the landfill cap. Specific details with regard to sampling protocols of the stockpiled material are in the process of being developed.

The Trust joins in the request of the City for an extension to August 31, 2008, to complete the engineering drawings 30% complete and submit them to the Regional Water Quality Control Board.

Sincerely,

*Dictated but not ready to avoid delay.*

Jeffery J. Scharff
