Subject: Ironhouse Tentative Order

Hi Kathy,

Are the ammonia effluent limitations in the Ironhouse tentative order based on the April 2013 Ambient Water Quality Criteria for Ammonia?

I noticed that standard provision f does not have the public notification language. Do you need a formal comment letter from CUWA to add it?

f. The Discharger shall take all reasonable steps to minimize any adverse effects to waters of the State or users of those waters resulting from any discharge or sludge use or disposal in violation of this Order. Reasonable steps shall include such accelerated or additional monitoring as necessary to determine the nature and impact of the non-complying discharge or sludge use or disposal, and adequate public notification within 24 hours to downstream water agencies or others whose contact is reasonably foreseeable with the non-complying discharge.

Thanks,
Elaine
