

LATE REVISIONS – 6 February 2014

- Item 6. **City of Sanger, Domestic Wastewater Treatment Facility, Fresno County** - *Consideration of Revised Waste Discharge Requirements, Order 98-141*

Response to Comments

Add short paragraph after the first full paragraph on Page 10 to read as follows:

CV-SALTS is a collaborative stakeholder driven and managed initiative to develop a sustainable salinity and nitrate management plan (SNMP) for the Central Valley. The Central Valley Water Board is proposing to incorporate components of the CV-SALTS SNMP through amendments to the Basin Plans to address salinity and nitrate concerns in a comprehensive, consistent and sustainable manner. The Board encourages the City of Sanger and similarly-situated municipalities to participate in CV-SALTS and the development of regulatory solutions for salt and nitrate issues. Should the City of Sanger choose to work with CV-SALTS and implement a collaborative solution that complies with the Basin Plan or Board-approved amendments thereto, its work plan may reflect those changed objectives or implementation provisions.
