

ITEM: 25

SUBJECT: Musco Olive Products, Inc. and The Studley Company, Musco Family Olive Company, Class II Surface Impoundments; San Joaquin County

BOARD ACTION: Consideration of Revised Waste Discharge Requirements

BACKGROUND: Musco Family Olive Company has been in operation at this site since 1983 processing olives for canning. The brine solution from olive processing is identified as designated waste and is discharged to multiple surface impoundments for year round containment and evaporation.

ISSUES: Musco Family Olive Company is contesting the financial assurance requirements, the unsaturated zone monitoring requirements and deepening monitoring wells where groundwater levels have fallen below the well screen interval.

RECOMMENDATION: Adopt the Revised Waste Discharge Requirements as written requiring Musco Family Olives to meet the requirements of Title 27 for their Class II surface impoundment site.
