NOTICE OF PUBLIC HEARING

concerning

**RENEWAL OF WASTE DISCHARGE REQUIREMENTS
AND
NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM PERMIT
(NPDES NO. CA0080489)
AND
RESCISSION OF TIME SCHEDULE ORDER R5-2011-0904
FOR
STALLION SPRINGS COMMUNITY SERVICES DISTRICT
WASTEWATER TREATMENT FACILITY
KERN COUNTY**

The Stallion Springs Community Services District (hereafter Discharger) is the owner and operator of the Wastewater Treatment Facility (Facility), which is a Publicly-Owned Treatment Works (POTW) that serves the unincorporated community of Stallion Springs. The Facility is in Tehachapi at 28500 Stallion Springs Drive. The Facility consists of bar screening, two oxidation ditch/clarifier units, and chlorine disinfection with a dechlorination agent feed system. Disinfected secondary-treated domestic wastewater is discharged from the Facility to Chanac Creek, a water of the United States and a tributary to Tejon Creek, after storage in a concrete-lined storage pond. Waste Discharge Requirements (WDRs) Order R5-2008-0091 currently regulates the discharge of disinfected secondary-treated domestic wastewater to Chanac Creek.

On 20 June 2011, the Central Valley Regional Water Quality Control Board's (Central Valley Water Board) Executive Officer issued Time Schedule Order R5-2011-0904 to provide the Discharger interim copper effluent limitations and time schedule to fully implement additional control measures specified in plans submitted by the Discharger, or take other actions to come into compliance with the maximum daily and average monthly final effluent limitations for copper contained in Order R5-2008-0091. The Discharger has achieved compliance by taking actions to come into compliance with the final effluent limitations for copper and has demonstrated the ability, through monitoring, to comply with the proposed effluent limits for copper in the tentative WDRs/NPDES Permit for the Facility. Therefore, Time Schedule Order R5-2011-0904 is no longer needed.

The Central Valley Water Board will consider both the adoption of the WDRs renewing the NPDES Permit and the rescission of Time Schedule Order R5-2011-0904. The proposed WDRs/NPDES Permit includes final effluent limitations for flow, biochemical oxygen demand (BOD), total suspended solids (TSS), BOD and TSS removal, pH, ammonia, copper, boron, chloride, settleable solids, total residual chlorine, total coliform organisms, electrical conductivity, and acute whole effluent toxicity.

A public hearing concerning these matters will be held during the Central Valley Water Board meeting scheduled for:

DATE: 9/10 October 2014
TIME: 8:30 a.m.
PLACE: Central Valley Regional Water Quality Control Board
11020 Sun Center Drive, #200
Rancho Cordova, CA 95670
