NOTICE OF NONCOMPLIANCE

Our notice of noncompliance dated 4 April 1988 was in error. The notice indicated that the maximum allowable salinity concentrations of the wastewater are boron (1.0 mg/l), chloride (150 mg/l), and total dissolved solids (1000 mg/l). However, those salinity limitations are not applicable to wastewater which is contained in the ponds on-site.

We apologize for any inconvenience this may have caused. If you have any questions, please call Cliff Raley of this office at (209) 445-5145.
