Meeting Purpose:

The Central Valley Water Board is beginning the process of developing a mercury control program for the lower American River and Lake Natoma. The purpose of this meeting is to provide information about the sources of inorganic mercury and methylmercury to the lower American River and Lake Natoma. In addition, staff will present a range of fish tissue targets that will be evaluated for this project. Staff is looking for suggestions and information regarding other fish tissue targets that should be evaluated.

Schedule:

- Welcome, Introductions, and Agenda Review
- Sources of Inorganic Mercury (Mass Balance)
 - Upstream
 - In-stream
 - NPDES
 - Atmospheric Deposition, etc.
- Sources of Methylmercury (Mass Balance)
 - Upstream
 - In-stream Production
 - Atmospheric Deposition, etc.
- Potential fish tissue targets
- Linkage Analysis
 - Describes the relationship between the proposed numeric fish tissue objective target and aqueous methylmercury concentrations.
- Closing, Next Steps
