

March 2006

Applicant: Coachella Valley Water District

Project Name: CVSC Slope Protection Repair Downstream of Jefferson St

Receiving Water: Coachella Valley Stormwater Channel

Location: The project is located in the City of Indio, within Section 28, Township 5 South, Range 7 East, SBB&M, in Riverside County

Project Description: The project consists of the repair of approximately 400 linear feet of concrete slope protection on the south bank of the Coachella Valley Stormwater Channel, downstream of Jefferson Street. The existing slope protection was undermined during heavy winter storms in 2004-2005. The damaged slope protection will be repaired to the original design standards to prevent further erosion of the banks of the channel. Approximately 20 panels will be exposed through excavation and will be demolished and removed. The slope will be excavated to competent foundation, backfilled and compacted to grade. Rebar, welded wire fabric and concrete will be placed on the exposed slopes to complete the slope protection repair.

Action: Pending
