Project Name:

Windpower Partners - Palm Springs Repower Wind Energy Project
WDID No. 7A333100001

Receiving Water:

Ephemeral streams associated with the Garnet Wash

Location:

City: Palm Springs, County: Riverside
Longitude/Latitude -116.63°/33.92° and 116.57/33.91°
Township/Range 3 South, 4 East Section 8, 9, 14, and 16

Project Description:

As part of a re-powering project, Windpower Partners proposes to remove and decommission up to 89 existing Kenetech KVS-33 (360 kilowatt (kW)) wind turbine generators. The total output of these turbines is approximately 32.04 MW. A total of 9 existing KVS-33 turbines will be decommissioned in the western block and 80 KVS-33 turbines will be decommissioned within the eastern block. The KVS- 33 turbines would be replaced with up to 29 General Electric (GE) 1.5 megawatt (MW) (SLE) turbines with 3 GE turbines installed in the western block and 26 GE turbines installed in the eastern block.

Action:

Pending
