**Project Name:**

Southern California Edison - Cabazon Idle Facilities Removal Project, WDID No.  
7A333129001

**Receiving Water:**

Jenson Creek, tributary to San Geronio River

**Location:**

The Cabazon Idle Facilities Removal Project is located just south of Cabazon, Riverside County, California. The project is located east of Lime Street and Date Avenue and north of Esperanza Avenue. The project is located on the White Water USGS 7.5-minute quadrangle at 523516 – 3751238 (UTM NAD 83). The elevation is approximately 1,523 feet above mean sea level.

**Project Description:**

The project consists of the removal of five abandoned underground structures/vaults and wiring leaving the underground duct in place. The underground structures are M5184248, M5184243, M5184244, X5184245 and B5184246. Structure M518243 is located in Jenson Creek. Removal activities will involve the use of a backhoe to excavate the structures with an approximate impact area approximately 20 feet in diameter at each structure. After removal of each structure, the hole will be backfilled with excavated material. This project will result in temporary impacts of 0.0072 acre of state waters. The impacts will be a result of the removal of the abandoned underground structure M5184243.

**Action:**

Pending
