

**California-Registered Water Treatment Devices
for Arsenic Reduction as of April 15, 2014**

Arsenic in groundwater has two forms: Arsenic 3 and Arsenic 5. In well water, arsenic is typically found in both forms. However the amount of each form in the well water varies from location to location.

Both forms of Arsenic are of health concern. Arsenic 3 is much more difficult to remove from the water. Most water treatment devices are certified to reduce Arsenic 5 but may provide a minimal reduction of Arsenic 3. For this reason, we have provided two tables below so that you can choose the device that meets your needs.

If you are concerned about the performance of a water treatment device, you should have the water tested periodically for reduction of Arsenic.

Table 1.
**The models listed in this table provide devices that
are capable of arsenic reduction – Reduces BOTH Arsenic 3 and Arsenic 5**

Registration Number	Manufacturer	Model Number	Technology
1999	Culligan International	Gold Arsenic 14"	Absorption Media
1998	Culligan International	Gold Arsenic 12"	Absorption Media
1997	Culligan International	Gold Arsenic 10"	Absorption Media
1963	Culligan International	Aqua-Clear Advanced Drinking Water System with RO30, TD and AS3	Reverse Osmosis, Ion Exchange, Carbon Block
1962	Culligan International	Aqua-Clear Advanced Drinking Water System with RO30, TD and AS3	Reverse Osmosis, Ion Exchange, Carbon Block
1961	Culligan International	Aqua-Clear Advanced Drinking Water System with RO30 and AS3	Reverse Osmosis, Ion Exchange, Carbon Block
1960	Culligan International	Aqua-Clear Advanced Drinking Water System with RO30 and AS3	Reverse Osmosis, Ion Exchange, Carbon Block
1949	Culligan International	Aqua Clear Advanced Drinking Water System with RO30, TD and AS3	Reverse Osmosis, Ion Exchange, Carbon Block
1948	Culligan International	Aqua Clear Advanced Drinking Water System with RO30 and AS3	Reverse Osmosis, Ion Exchange, Carbon Block

Table 2.
**The models listed in this table provide devices that
are capable of arsenic reduction Arsenic Reduction – Reduces Arsenic 5 but may not effectively reduce Arsenic 3.
Therefore, only use where the Arsenic 3 levels have been determined to be low, or where chlorination is provided of the water
supply at all times.**

Registration Number	Manufacturer	Model Number	Technology
1569	Multipure International	Multi-Pure MP880SB	carbon block
1569	Multipure International	Multi-Pure MP880SC	carbon block
1569	Multipure International	Multi-Pure MP880SI	carbon block
