

SMALL WATER SYSTEMS PROGRAM PLAN MONTHLY UPDATE

May 2014

Summary:

The Small Water Systems Program Plan (SWSP) tracks the progress of small water systems that are in violation of a primary constituent MCL by meeting specific milestones. There are a total of **183** community water systems that have between 15 and 999 service connections listed on the SWSP. The total population targeted on the SWSP is approximately 60,000 and the total number of service connections is approximately 18,000. There are eight types of primary drinking water standards that are violated by these systems. The total numbers of water systems that are violating primary drinking water standards are: 107 Arsenic, 61 Nitrate, 11 Uranium, 2 Gross Alpha, 9 Surface Water, 2 Perchlorate, 1 DBCP, and 1 Fluoride (some systems exceed more than one standard).

Progress:

A small water system listed on the SWSP is measured on progress in returning to compliance by meeting specific milestones/goals. These milestones/goals are as follows: issuance of a compliance order, submittal of a universal pre-application for funding, placement on the Safe Drinking Water State Revolving Fund (SDWSRF) project priority list (PPL), invitation for funding, submittal of a statement of intent (SOI) to pursue funding, submittal of a funding application, execution of a funding agreement, and finally, the return of the water system to compliance by solving the problem.

Every unsolved system on the list has met the following milestones:

- Received a compliance order
- Submitted a universal pre-application for funding
- Placed on the SDWSRF PPL and invited for funding

Systems Receiving Executed Funding Agreement in May 2014:

- None to report

Systems Solved in May 2014 :

- 1010030 – Tranquility Irrigation District (Fresno County)- Tranquility Irrigation District, which serves approximately 800 people through 342 connection, received an enforcement action in 2008 for violating the arsenic MCL. To address this problem, the system converted two agricultural wells to use as domestic production wells through P84 funding. Upon completion of the work on the two wells, the system inactivated the high-arsenic wells. Although arsenic is no longer a problem, the converted wells exceed secondary standards. The system is currently working on the design and construction of an iron and manganese treatment facility.

Progress statistics through May 2014 are as follows:

Progress Status	Current Status Total	Previous Status Total
Solved/Returned to compliance	24	23
Under construction with CDPH funding	23	24
Construction underway, privately financed	2	2
Awaiting CDPH construction funds, complete application submitted	24	17
Received CDPH planning funds, work to be completed within 18 months	51	57
Awaiting CDPH planning funds, complete application submitted	14	15
Total amount funded by CDPH (in millions)	99.2	99.1
Systems referred for technical assistance	129	129

Solved/Returned to compliance – 24

0400027	Foothill Mobile Home Park (Butte)	3100033	Tahoma Meadows MWC (Placer)
0400058	Rancho Villa Mobile Acres (Butte)	3301755	Sunbird MHP (Riverside)
0600013	Princeton Water District (Colusa)	3400149	Rancho Marina (Sacramento)
