STATE OF CALIFORNIA
WATER RESOURCES CONTROL BOARD
DIVISION OF DRINKING WATER

TO: City of Kingsburg
140 Draper Street
Kingsburg, CA 93631-1908

Water System No. 1010019

Attn: Robert Stucky

**CITATION FOR VIOLATION OF CALIFORNIA CODE OF REGULATIONS, TITLE 22,
SECTION 64426.1 (b) (2) - TOTAL COLIFORM MAXIMUM CONTAMINANT LEVEL
September, November, and December 2014**

CITATION NO. 03-23-15C-001

Issued on January 21, 2015

Section 116650 of the California Health and Safety Code authorizes the issuance of a citation to a public water system for violation the California Safe Drinking Water Act (Health and Safety Code, Division 104, Part 12, Chapter 4, commencing with Section 116270) (hereinafter "California SDWA"), or any regulation, standard, permit or order issued or adopted thereunder.

The State Water Resources Control Board, acting by and through its Division of Drinking Water (hereinafter "Division") and the Deputy Director for the Division (hereinafter "Deputy Director"), hereby issues a citation to the City of Kingsburg (hereinafter, City) (mailing address: 1401 Draper Street, Kingsburg, CA 93631-1908) for violation of California Code of Regulations (CCR), Title 22, Section 64426.1 subsections (b)(2).

32 APPLICABLE AUTHORITIES

33 **Section 116650 of California Health and Safety Code provides:**

34 (a) If the Division determines that a public water system is in violation of this chapter or
35 any regulation, permit, standard, citation, or order issued or adopted thereunder, the
36 Division may issue a citation to the public water system. The citation shall be served upon
37 the public water system personally or by certified mail. Service shall be deemed effective
38 as of the date of personal service or the date of receipt of the certified mail. If a person to
39 whom a citation is directed refuses to accept delivery of the certified mail, the date of
40 service shall be deemed to be the date of mailing.

41 (b) Each citation shall be in writing and shall describe the nature of the violation or
42 violations, including a reference to the statutory provision, standard, order, citation, permit,
43 or regulation alleged to have been violated.

44 (c) A citation may specify a date for elimination or correction of the condition constituting
45 the violation.

46 (d) A citation may include the assessment of a penalty as specified in subdivision (e).

47 (e) The Division may assess a penalty in an amount not to exceed one thousand dollars
48 (\$1,000) per day for each day that a violation occurred, and for each day that a violation
49 continues to occur. A separate penalty may be assessed for each violation.

50 **California Code of Regulations, Title 22, Section 64426.1, subsections (a) and (b)**
51 **provide, in relevant part:**

52 **§64426.1. Total Coliform Maximum Contaminant Level (MCL).**

53 (a) Results of all samples collected in a calendar month pursuant to Sections 64423,
54 64424, and 64425 that are not invalidated by the Division or the laboratory shall be
55 included in determining compliance with the total coliform MCL. Special purpose
56 samples such as those listed in §64421(b) and samples collected by the water
57 supplier during special investigations shall not be used to determine compliance with
58 the total coliform MCL.

59 (b) A public water system is in violation of the total coliform MCL when any of the
60 following occurs:

61 (1) For a public water system which collects at least 40 samples per month, more
62 than 5.0 percent of the samples collected during any month are total coliform-
63 positive; or

64 (2) For a public water system which collects fewer than 40 samples per month,
65 more than one sample collected during any month is total coliform-positive

66 **§ 64424. Repeat Sampling**

67 Specifies that for systems collecting only one sample per month or quarter, a
68 repeat sample set shall consist of four (4) samples as follows: one (1) from the
routine sample site at which the positive occurred, one (1) from the upstream

70 repeat sample site, one (1) from the downstream repeat sample site and one (1)
71 from the operating well or another location within the system that would best help
72 to identify the source or area of contamination.

73 If a public water system for which fewer than five routine samples per month are
74 collected has one or more total coliform-positive samples, the water supplier shall
75 collect at least five routine samples the following month. If the supplier stops
76 supplying water during the month after the total coliform-positive(s), at least five
77 samples shall be collected during the first month the system resumes operation.

78

79 **The Groundwater Rule**

80

81 Adopted by the Division, effective August 18, 2011, the rule requires the collection
82 of a sample for bacteriological evaluation from wells serving the system in
83 response to a coliform positive distribution sample.

84

85

STATEMENT OF FACTS

86 The City's water system is operated under Water Supply Permit No. 03-92-026, issued
87 October 1992 and amended in issued January 2011. City of Kingsburg is a community
88 water system serving a population of approximately eleven-thousand, five-hundred ninety
89 (11,590) through approximately three-thousand seven-hundred five (3,705) service
90 connections.

91

92 The City is served by seven wells; however, not all wells serve the City at the same time.
93 The bacteriological water analysis results submitted by the City reported the presence of
94 total coliform bacteria in seven (7) of forty (40) samples in September of 2014; four (4) of
95 twenty-seven (27) samples collected during November 2014; and six (6) of twenty-five
96 (25) samples collected during December 2014. None of the positive samples showed the
97 presence of fecal coliform or *E. coli* bacteria.

98

99 On September 10, 2014, the City was advised to flush the water system. On September
100 11, 2014, Bob Stucky, certified water system operator, informed the Division that all
101 source samples were clean, but all distribution repeat samples were positive for total
102 coliform, and absent for *E. coli* and fecal coliform. Bob Stucky also mentioned that minor

103 work was completed on a service building, but that the City conducted flushing of the
 104 water system, but no chlorine disinfection. The City was advised to install the chlorinator.
 105 The City was on continuous chlorination from September 12, 2014 – October 20, 2014.
 106 On September 15, 2014, repeat samples were taken and showed the results were absent
 107 for total coliform. After September 15, 2014 and the rest of the month of September 2014,
 108 the bacteriological samples collected weekly showed an absence of total coliform. In
 109 October 2014, the City collected routine samples as required and showed an absence of
 110 total coliform. On November 18, 2014, the City then informed the Division that a
 111 bacteriological sample collected on November 17, 2014 was positive for total coliform,
 112 absent for E. coli and fecal coliform. On November 18, 2014, the City collected repeat
 113 samples and two (2) out of the five (5) repeat samples were positive for total coliform,
 114 absent for E. coli and fecal coliform. For the rest of the month of November 2014, the City
 115 collected weekly bacteriological samples, which were absent for total coliform. On
 116 December 3, 2014, the City informed the Division that were a total of three bacteriological
 117 samples collected on December 1 and December 2, 2014 that were positive for total
 118 coliform and absent for E. coli and fecal coliform. The City continued to collect routine and
 119 repeat bacteriological samples and three (3) more bacteriological samples showed a
 120 presence of total coliform. On December 10, 2014, the City initiated continuous
 121 chlorination. The City then collected additional routine and repeat samples through the
 122 end of December 2014, which showed an absence of total coliform. The City was on
 123 continuous chlorination from December 10, 2014 to January 13, 2015.

124

125 The following table summarizes the bacteriological monitoring conducted during
 126 September, November, and December 2014:

127

Collection Date	Number of Samples	Sample Labeled	Number TC positive	Number E. Coli positive
9/2/2014	3	Routine	0	0

9/8/2014	3	Routine	1	0
9/9/2014	3	Repeat	1	0
9/10/2014	10	Repeat	3	0
9/11/2014	8	Repeat	2	0
9/15/2014	6	Routine	0	0
9/22/2014	4	Routine	0	0
9/29/2014	3	Routine	0	0
11/3/2014	3	Routine	1	0
11/5/2014	5	Repeat	0	0
11/10/2014	3	Routine	0	0
11/17/2014	3	Routine	1	0
11/18/2014	5	Repeat	2	0
11/20/2014	5	Repeat	0	0
11/24/2014	3	Routine	0	0
12/1/2014	3	Routine	1	0
12/2/2014	5	Repeat	2	0
12/4/2014	3	Repeat	1	0
12/9/2014	3	Routine	2	0
12/15/2014	6	Routine and 1 special	0	0
12/29/2014	3	Routine	0	0

128 Due to the above-mentioned total coliform positive samples, the City failed the total
129 coliform MCL for the months of September, November, and December of 2014. Results
130 for water samples tested for coliform bacteria during 2014 are summarized in Attachment
131 A.

132

133 The Groundwater Rule adopted by the Division, effective August 18, 2011, requires the
134 collection of a sample for bacteriological evaluation from wells serving the system in
135 response to a coliform positive distribution sample. **This requirement was met.**

136

137

VIOLATIONS

138 The Drinking Water Field Operations Branch of the State Water Resources Control Board
139 – Division of Drinking Water (hereinafter ‘Division’) hereby issues a Citation to City of
140 Kingsburg (hereinafter ‘City’), for failure to comply with Section 116555(a)(1) of the CHSC
141 and Section 64426.1(b)(2) of Title 22, California Code of Regulations (CCR). Specifically,
142 the Water System (mailing address: 1401 Draper Street Kingsburg, CA 93631-1908)
143 failed to comply with the total coliform Maximum Contaminant Level (MCL) for the months
144 of September, November, and December 2014.

145

146

NOTIFICATION REQUIREMENTS

147 Section 64426.1(c) requires a public water system to notify the Division and the
148 consumers of the water system, when a violation of Section 64426.1(b)(1) through (4) the
149 total coliform MCL occurs. Notification to the Division shall be by the end of the business
150 day on which the violation has been determined. If the Division is closed, notification shall
151 be within 24 hours of the determination. **The Division was notified in a timely manner**
152 **and as required.**

153

154 A Tier 2 Public Notice for violation of paragraph 64426.1(b) (2) (Attachment B) shall be
155 given pursuant to Section 64463.4 and 64465. The Tier 2 Public Notice shall include the
156 mandatory health effects language from Appendix 64465-A for a total coliform MCL
157 failure.

158

159 Section 64463.4 allows community water systems to use mail or direct delivery to each
customer and the use of one or more of the following methods: publication in a daily or

161 weekly newspaper, posting the public notice in a conspicuous public place within the
162 water system or on the internet, or by delivery to community organizations.

163

164 The City shall either mail or conduct direct delivery of the public notice to all customers
165 served within the general service area. Section 116450(g) requires that upon receipt of
166 notification from a public water system, schools must notify school employees, students,
167 and parents (if the students are minors), residential rental property owners or managers
168 (including nursing homes and care facilities) must notify their tenants and business
169 property owners, managers or operators must notify employees of businesses located on
170 the property. These secondary notification requirements are included in the public notice.

171 The Department hereby waives public notification by newspaper, posting or delivery to
172 community organizations.

173

174 Proof of Notification is required. The City has completed public notification and submitted
175 the proof of notification for the month of September 2014, provided as Attachment F and
176 notification was made on October 29, 2014 and is provided as Attachment E. The City
177 shall complete public notification for the months of November and December 2014. The
178 City shall complete the proof of notification form provided as Attachment C and return it to
179 the Division by **February 28, 2015**.

180

181

182

DIRECTIVES

183

The City is hereby directed to take the following actions:

184

185

1. By **February 1, 2015**, the City of Kingsburg shall provide public notification of the
186 total coliform Maximum Contaminant Level failure for November and December
187 2014 by posting the notice provided as Attachment B in conspicuous locations
throughout the area served by the water system.

187

189 By **February 28, 2015**, the City shall provide proof of public notification of the total
190 coliform MCL violation for November and December 2014 by completing
191 Attachment C and returning it to:

192
193 Betsy S. Lichti, Senior Sanitary Engineer
194 Division of Drinking Water
195 Drinking Water Field Operations Branch
196 265 W. Bullard Avenue, Suite 101
197 Fresno, CA 93704

198
199 2. By **February 28, 2015**, the City shall complete and submit the enclosed "Positive
200 Total Coliform Investigation" form to the Division that describes the incident and all
201 corrective actions taken, and the results of the investigation. The appropriate
202 investigation report is provided as Attachment D.

203
204

205 **PARTIES BOUND**

206 This Citation shall apply to and be binding upon City of Kingsburg, its officers, directors,
207 shareholders, agents, employees, contractors, successors, and assignees.

208

209

210 **SEVERABILITY**

211 The Directives of this Citation are severable, and City of Kingsburg shall comply with each
212 and every provision thereof, notwithstanding the effectiveness of any other provision.

213

214

215 **FURTHER ENFORCEMENT ACTION**

216 The California SDWA authorizes the Division to: issue citation with assessment of
217 administrative penalties to a public water system for violation or continued violation of the
218 requirements of the California SDWA or any permit, regulation, permit or order issued or
adopted thereunder including, but not limited to, failure to correct a violation identified in a

220 citation or compliance order. The California SDWA also authorizes the Division to take
221 action to suspend or revoke a permit that has been issued to a public water system if the
222 system has violated applicable law or regulations or has failed to comply with an order of
223 the Division; and to petition the superior court to take various enforcement measures
224 against a public water system that has failed to comply with violates an order of the
225 Division. The Division does not waive any further enforcement action by issuance of this
226 citation.

MCL	Exceeds the maximum contaminant level	MR5	Incorrect number of repeat samples as follow-up to a positive sample
MR1	No monthly sample for the report month	MR6	No source sample
MR2	No quarterly sample for the report month	MR7	No summary report submitted
MR3	Incorrect number of routine samples for the report month	MR8	Other comments and/or info
MR4	Did not collect 5 routine samples for previous month's positive sample	MR9	CI2 not reported

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Este informe contiene información muy importante sobre su agua potable.
Tradúzcalo o hable con alguien que lo entienda bien.

**City of Kingsburg Has Levels of Coliform Bacteria
Above the Drinking Water Standard**

Our water system recently failed a drinking water standard. Although this incident was not an emergency, as our customers, you have a right to know what you should do, what happened and what we did to correct this situation.

We routinely monitor for drinking water contaminants. We took ___ samples to test for the presence of coliform bacteria in November and December 2014. _____ of these samples showed the presence of total coliform bacteria. The standard is that no more than one sample per month may show the presence of coliform bacteria.

What should I do?

- **You do not need to boil your water or take other corrective actions.**
- This is not an emergency. If it had been, you would have been notified immediately. Total coliform bacteria are generally not harmful themselves. *Coliforms are bacteria which are naturally present in the environment and are used as an indicator that other, potentially-harmful, bacteria may be present. Coliforms were found in more samples than allowed and this was a warning of potential problems.*
- Usually, coliforms are a sign that there could be a problem with the treatment or distribution system (pipes). Whenever we detect coliform bacteria in any sample, we do follow-up testing to see if other bacteria of greater concern, such as fecal coliform or *E. coli*, are present. **We did not find any of these bacteria in our subsequent testing (reword accordingly)**
- People with severely compromised immune systems, infants, and some elderly may be at increased risk. These people should seek advice about drinking water from their health care providers. General guidelines on ways to lessen the risk of infection by microbes are available from EPA's Safe Drinking Water Hotline at 1(800) 426-4791.
- If you have other health issues concerning the consumption of this water, you may wish to consult your doctor.

What happened? What is being done?

[Describe corrective action]. _____
_____.

For more information, please contact _____ [name of contact] at _____ [phone number] or _____ [mailing address].

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this public notice in a public place or distributing copies by hand or mail.

Secondary Notification Requirements

Upon receipt of notification from a person operating a public water system, the following notification must be given within 10 days [Health and Safety Code Section 116450(g)]:

- **SCHOOLS:** Must notify school employees, students, and parents (if the students are minors).
- **RESIDENTIAL RENTAL PROPERTY OWNERS OR MANAGERS** (including nursing homes and care facilities): Must notify tenants.
- **BUSINESS PROPERTY OWNERS, MANAGERS, OR OPERATORS:** Must notify employees of businesses located on the property.

This notice is being sent to you City of Kingsburg.

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Este informe contiene información muy importante sobre su agua potable.

Tradúzcalo o hable con alguien que lo entienda bien.

**The City of Kingsburg Had Levels of Bacteria
Above the Drinking Water Standard**

Our water system recently failed a drinking water standard. Although this incident was not an emergency, as our customers, you have a right to know what you should do, what happened and what we did to correct this situation.

We routinely monitor for drinking water contaminants taking three (3) samples every week from different parts of the city. In September, we took a total of thirty-six (36) samples to test for the presence of coliform bacteria. Seven (7) of these samples showed the presence of total coliform bacteria. The standard is that no more than one sample per month may show the presence of coliform bacteria.

What should I do?

- **You do not need to boil your water or take other corrective actions.**
- This is not an emergency. If it had been, you would have been notified immediately. Total coliform bacteria are generally not harmful themselves. *Coliforms are bacteria which are naturally present in the environment and are used as an indicator that other potentially-harmful, bacteria may be present. Coliforms were found in more samples than allowed and this was a warning of potential problems.*
- Usually, coliforms are a sign that there could be a problem with the treatment or distribution system (pipes). Whenever we detect coliform bacteria in any sample, we do follow-up testing to see if other bacteria of greater concern, such as fecal coliform or *E. coli*, are present. *We did not find any of these bacteria in our subsequent testing.*
- People with severely compromised immune systems, infants, and some elderly may be at increased risk. These people should seek advice about drinking water from their health care providers. General guidelines on ways to lessen the risk of infection by microbes are available from EPA's Safe Drinking Water Hotline at 1(800) 426-4791.
- If you have other health issues concerning the consumption of this water, you may wish to consult your doctor.

What happened? What is being done?

After routine samples were taken and analyzed, repeat samples were taken at the sites that were total coliform positive to confirm the results. One or more of the repeat samples was Total Coliform Positive so at the direction of the State Department of Water Resources, chlorination of the water system began on September 12th for approximately 30 days.

For more information please contact Rob Bissett (559) 897-1066.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this public notice in a public place or distributing copies by hand or mail. Property owners please share this information with your tenants.

Secondary Notification Requirements

Upon receipt of notification from a person operating a public water system, the following notification must be given within 10 days [Health and Safety Code Section 116450(g)]:

- **SCHOOLS:** Must notify school employees, students, and parents (if the students are minors).
- **RESIDENTIAL RENTAL PROPERTY OWNERS OR MANAGERS** (including nursing homes and care facilities): Must notify tenants.
- **BUSINESS PROPERTY OWNERS, MANAGERS, or OPERATORS:** Must notify employees of businesses located on the property.

This notice is being sent to you by the City of Kingsburg Water System. Date distributed: October 24, 2014

PROOF OF NOTIFICATION
(Return with copy of the Notice)

As required by Section 116450 of the California Health and Safety Code, I notified all users of water supplied by the City of Kingsburg of the failure to meet the **total coliform bacteria MCL** for the month of September 2014 as directed by the Department. At least one primary distribution method is required: mail, hand-delivery or newspaper publication. A second method is also required in order to reach persons not likely to be reached by a mailing, direct delivery or newspaper publication (renters, nursing home patients, prison inmates, etc.):

Notification was made on October 29, 2014.

To summarize report delivery used and good-faith efforts taken, please check all items below that apply and fill-in where appropriate:

- The notice was distributed by mail delivery to each customer served by the water system.
- The notice was distributed by direct delivery to each customer served by the water system. Specify direct delivery method(s) used: _____
- Publication of the notice in a local newspaper or newsletter of general circulation (attach a copy of the published notice, including name of newspaper and date published).
- Posted the notice at the following conspicuous locations served by the water system (if needed, please attach a list of locations). Bulletin Board outside of City Hall 1401 Draper St
- Posted the notice on the Internet at www.cityofkingsburg-ca.gov
- Other method used to notify customers. _____

DISCLOSURE: Be advised that Section 116725 and 116730 of the California Health and Safety Code state that any person who knowingly makes any false statement on any report or document submitted for the purpose of compliance with the attached order may be liable for a civil penalty not to exceed five thousand dollars (\$5,000) for separate violation for each day that violation continues. In addition, the violators may be prosecuted in criminal court and upon conviction, be punished by a fine of not more than \$25,000 for each day of violation, or be imprisoned in the county jail not to exceed one year, or by both the fine and imprisonment.
