

EDMUND G. BROWN JR.
GOVERNOR

MATTHEW ROBBIDUE
SECRETARY FOR
ENVIRONMENTAL PROTECTION

State Water Resources Control Board
Division of Drinking Water

May 27, 2016

Mr. Dan Page
Canyon Forks Properties
7447 N. First Street, Ste. 200
Fresno, CA 93720

RE: Canyon Forks Properties – System No. 1000424
Compliance Order No. 03_23_16R_003

Dear Mr. Page:

The State Water Resources Control Board – Division of Drinking Water (Division) has issued Compliance Order No. 03_23_16R_003 for violation of the Uranium MCL. The compliance order is enclosed.

The Compliance Order requires the Water System to submit a written response by **June 15, 2016**, indicating its willingness to comply with the directives. It requires the Water System to present Corrective Action Plan in an office meeting no later than **August 31, 2016** and achieve compliance with Uranium MCL no later than **March 1, 2019**.

The California Safe Drinking Water Act, Section 116577 provides for this agency to be reimbursed by the public water system for costs incurred for preparing and issuing an enforcement action to that system. Therefore, your water system will be billed for the preparation and issuance of this order. Our costs are approximately \$153 per hour. You will receive a bill for these costs at the end of the State's fiscal year, from our Fee Billing Unit in Sacramento.

If you have any questions regarding this matter, please contact our office at (559) 447-3300.

Sincerely,

A handwritten signature in blue ink that reads "Betsy Lichti".

Betsy S. Lichti, P.E.
Senior Sanitary Engineer, Fresno District
SOUTHERN CALIFORNIA BRANCH

**STATE OF CALIFORNIA
STATE WATER RESOURCES CONTROL BOARD
DIVISION OF DRINKING WATER**

IN RE: **CANYON FORK PROPERTIES**
WATER SYSTEM NO. 1000424

TO: DAN PAGE
CANYON FORK PROPERTIES
7447 N. FIRST STREET, STE. 200
FRESNO, CA 93720

COMPLIANCE ORDER NO. 03_23_16R_003

**FOR NONCOMPLIANCE WITH THE
URANIUM MAXIMUM CONTAMINANT LEVEL
SECTION 64442(h), TITLE 22, CALIFORNIA CODE OF REGULATIONS**

Issued on May 27, 2016

The State Water Resources Control Board (hereinafter "Board"), acting by and through its Division of Drinking Water (hereinafter "Division") and the Deputy Director for the Division (hereinafter "Deputy Director"), hereby issues a Compliance Order (hereinafter "Order"), pursuant to Section 116655 of the California Health and Safety Code (hereinafter "CHSC") to the Canyon Fork Properties Water System and its owner of record Canyon Fork Properties for violation of CHSC Section 116555(a)(1) and Title 22, California Code of Regulations (hereinafter "CCR"), Section 64442, Radionuclide Maximum Contaminant Levels (MCLs).

37 **APPLICABLE AUTHORITIES**

38

39 **CHSC, Section 116555, states in relevant part:**

40 (a) Any person who owns a public water system shall ensure that the system does all of the
41 following:

42 (1) Complies with primary and secondary drinking water standards.
43

44 **CHSC, Section 116655, states in relevant part:**

45 (a) Whenever the department determines that any person has violated or is violating this
46 chapter, or any permit, regulation, or standard issued or adopted pursuant to this chapter,
47 the director may issue an order doing any of the following:

48 (1) Directing compliance forthwith.

49 (2) Directing compliance in accordance with a time schedule set by the department.

50 (3) Directing that appropriate preventive action be taken in the case of a threatened
51 violation.
52

53 (b) An order issued pursuant to this section may include, but shall not be limited to, any or
54 all of the following requirements:

55 (1) That the existing plant, works, or system be repaired, altered, or added to.

56 (2) That purification or treatment works be installed.

57 (3) That the source of the water supply be changed.

58 (4) That no additional service connection be made to the system.

59 (5) That the water supply, the plant, or the system be monitored.

60 (6) That a report on the condition and operation of the plant, works, system, or
61 water supply be submitted to the department.
62

63 **CCR, Title 22, Section 64442a), states in relevant part:**

64 (a) Each community and nontransient noncommunity water system shall comply with the
65 primary MCLs in Table 64442 in the drinking water supplied to the public and use the
66 DLRs for reporting monitoring results:

67
68
69
70

Table 64442
Radionuclide Maximum Contaminant Levels
And Detection Levels for Purposes of Reporting

Radionuclide	Maximum Contaminant Level (pCi/L)	Detection Limit for Purposes of Reporting (pCi/L)
Radium-226	5 (combined radium-226 and -228)	1
Radium-228		1
Gross Alpha particle activity (excluding radon and uranium)	15	3
Uranium	20	1

71

72 Additional *Applicable Authorities* are located in Attachment A, which is attached hereto
73 and incorporated by reference.

74

75 **STATEMENT OF FACTS**

76

77 The Canyon Fork Properties water system (hereinafter “Water System”) is a nontransient
78 noncommunity water system located at 29478 Auberry Road, Prather, CA. The Water
79 System supplies water to approximately 25 nontransient customers, 24 residential
80 customers, and 400 transient customers through 21 service connections. The Water
81 System operates under a domestic water supply permit no. 03-12-08P-024 issued by the
82 Division on July 7, 2008 and permit amendment no. 03-23-10PA-002 issued on March 18,
83 2010.

84

85 The source of water supply for the Water System is groundwater obtained from a single
86 active well, Well 02. Currently, there is no treatment provided.

87

88 CCR, Section 64442 establishes the Maximum Contaminant Levels (MCL) for Gross
 89 Alpha of 15 pCi/L, and for Uranium of 20 pCi/L. CCR Section 64442(g) specifies that if
 90 any radionuclide sample result is greater than an MCL, quarterly samples shall be collected
 91 and analyzed. Compliance shall be determined based on the running annual average of
 92 four consecutive quarterly samples. If any sample result causes the annual average at any
 93 sample site to exceed the MCL, the system shall be out of compliance immediately upon
 94 receiving the result. The Water System was notified via letter dated June 12, 2014 of the
 95 quarterly monitoring requirement. The Water System did not sample Well No. 2 quarterly.
 96 Well No. 2 was sampled annually for Gross Alpha and Uranium. A summary of the Water
 97 System's Gross Alpha and Uranium monitoring is presented in the table below. Note that
 98 compliance with Gross Alpha MCL is based on (GA-Ur).

100 **Table 1. Radiological Monitoring Summary – Well No. 02**

Sample Date	Gross Alpha (GA) (MCL =15 pCi/L)	Uranium (Ur) (MCL=20 pCi/L)	GA-Ur	Uranium RAA
04/24/2014	62.4	61.0	1.4	-
12/08/2015	92.0	82.0	10.0	-
03/22/2016	83.6	78.0	5.6	55.2*
2016 2 nd quarter	no data yet	no data yet	-	

101 * four quarter running annual average calculated from three annual samples.

102

103 The Water System is in violation of the Uranium MCL based on Section 64442 (h) (3)
 104 using the three (3) annual samples collected averaged over four quarters. The next round of
 105 sampling is due in the 2nd quarter of 2016.

106 Due to the Uranium MCL violation, the Water System is required to conduct public
107 notification within 30 days of receipt of this Order, which must be repeated every three
108 months as long as the violation exists.

109
110

111 **DETERMINATIONS**

112

113 Based on the above Statement of Facts, the Division has determined that the Water System
114 has violated CHSC Section 116555(a)(1) and CCR, Title 22, Section 64442(h).
115 Specifically, the Uranium Running Annual Average has exceeded the Uranium MCL as
116 shown in Table 1 above.

117

118 **DIRECTIVES**

119

120 To ensure that the water supplied by the Canyon Fork Properties Water System is at all
121 times safe, wholesome, healthful, and potable, and pursuant to the California SDWA, the
122 Canyon Fork Properties Water System is hereby directed to take the following actions:

123

- 124 1. On or before **March 1, 2019**, the Water System shall achieve compliance with Title
125 22, CCR, Section 64442 in future monitoring periods after implementation of the
126 compliance project in accordance with the Corrective Action Plan.

127

- 128 2. On or before **June 15, 2016**, submit a written response to the Division indicating its
129 agreement to comply with the directives of this Order and with the Corrective
130 Action Plan addressed in Directive No. 6.
131
- 132 3. Commencing on the date of service of this Order, provide quarterly public
133 notification in accordance with Attachment B, of Water System's failure to meet
134 the uranium MCL during any calendar quarter that the four-quarter running annual
135 average exceeds the MCL.
- 136 4. Commencing on the date of service of this Order, submit proof of each public
137 notification conducted in compliance with Directive No. 3, within 10 days
138 following each such notification, using the form provided as Attachment C.
139
140
- 141 5. Commencing on the date of this Order, collect quarterly samples for uranium from
142 Well 02, as required by Section 64442(g)(3), and ensure that the analytical results
143 are reported to the Division electronically by the analyzing laboratory no later than
144 the 10th day following the month in which the analysis was completed.
145
- 146 6. Prepare for Division approval a Corrective Action Plan identifying improvements
147 to the Water System designed to correct the water quality problem (violation of the
148 Uranium MCL) and ensure that the Water System delivers water to consumers that
149 meets primary drinking water standards. The plan shall include a time schedule for
150 completion of various phases of the project such as alternatives evaluation and
151 selection, design, permitting and construction, and startup to ensure compliance is

152 achieved with the uranium MCL by the date specified in Directive No. 1. The
153 Water System shall include a plan for financing the necessary improvements and
154 any increases in the operation and maintenance costs.

155

156 7. On or before **August 31, 2016**, present the Corrective Action Plan required under
157 Directive No. 6, above, to the Division in person at the Division's office located at
158 265 W. Bullard Avenue, Fresno, CA 93704.

159

160 8. Timely perform the Division approved Correction Action Plan and each and every
161 element of said plan according to the time schedule set forth therein.

162

163 9. On or before **November 30, 2016**, and every three months thereafter, submit a
164 report to the Division in the form provided as Attachment D, showing actions taken
165 during the previous calendar three months to comply with the Corrective Action
166 Plan.

167

168 10. Not later than ten (10) days following the date of compliance with the Uranium
169 MCL, demonstrate to the Division that the water delivered by the Water System
170 complies with the Uranium MCL.

171

172 11. Notify the Division in writing no later than five (5) days prior to the deadline for
173 performance of any Directive set forth herein if Water System and/or its owner of
174 record anticipates it will not timely meet such performance deadline.

175 All submittals required by this Order shall be addressed to:

176

177

Betsy S. Lichti, P.E.,

178

Senior Sanitary Engineer

179

State Water Resources Control Board

180

Division of Drinking Water

181

Fresno District

182

265 W. Bullard Avenue, Suite 101

183

Fresno, CA 93704

184

185

186

As used in this Order, the date of issuance shall be the date of this Order; and the date of

187

service shall be the date of service of this Order, personal, or by certified mail, on the

188

Water System or its owner of record.

189

190

The Division reserves the right to make such modifications to this Order and/or to issue

191

such further order(s) as it may deem necessary to protect public health and safety. Such

192

modifications may be issued as amendments to this Order and shall be deemed effective

193

upon issuance. Nothing in this Order relieves the Water System or its owner of record of

194

its obligation to meet the requirements of the California Safe Drinking Water Act

195

(hereinafter "California SDWA"), or any regulation, standard, permit or order issued

196

thereunder.

197

198

PARTIES BOUND

199

200

This Order shall apply to and be binding upon Water System, its owners, shareholders,

201

officers, directors, agents, employees, contractors, successors, and assignees.

202

203

204 **SEVERABILITY**

205

206 The Directives of this Order are severable, and the Water System and its owner of record
207 shall comply with each and every provision hereof, notwithstanding the effectiveness of
208 any other provision.

209

210 **FURTHER ENFORCEMENT ACTION**

211

212 The California SDWA authorizes the Board to issue a citation with assessment of
213 administrative penalties to a public water system for violation or continued violation of the
214 requirements of the California SDWA or any regulation, permit, standard, citation, or order
215 issued or adopted thereunder including, but not limited to, failure to correct a violation
216 identified in a citation or compliance order. The California SDWA also authorizes the
217 Board to take action to suspend or revoke a permit that has been issued to a public water
218 system if the system has violated applicable law or regulations or has failed to comply with
219 an order of the Board; and to petition the superior court to take various enforcement
220 measures against a public water system that has failed to comply with an order of the
221 Board. The Board does not waive any further enforcement action by issuance of this Order.

Applicable Authorities

Violation of Maximum Contaminant Levels of Radionuclide

California Health and Safety Code, Section 116655, states in relevant part:

- (a) Whenever the department determines that any person has violated or is violating this chapter, or any permit, regulation, or standard issued or adopted pursuant to this chapter, the director may issue an order doing any of the following:
 - (1) Directing compliance forthwith.
 - (2) Directing compliance in accordance with a time schedule set by the department.
 - (3) Directing that appropriate preventive action be taken in the case of a threatened violation.
- (b) An order issued pursuant to this section may include, but shall not be limited to, any or all of the following requirements:
 - (1) That the existing plant, works, or system be repaired, altered, or added to.
 - (2) That purification or treatment works be installed.
 - (3) That the source of the water supply be changed.
 - (4) That no additional service connection be made to the system.
 - (5) That the water supply, the plant, or the system be monitored.
 - (6) That a report on the condition and operation of the plant, works, system, or water supply be submitted to the department.

California Code of Regulations, Title 22, states in relevant part:

§64442. Maximum Contaminant Levels for Radionuclide.

- (a) Each community and nontransient-noncommunity water system (system) shall comply with the primary MCLs in Table 64442 in the drinking water supplied to the public and use the DLRs for reporting monitoring results:

Table 64442
Radionuclide Maximum Contaminant Levels (MCL) and Detection Limits for
Purposes of Reporting (DLR)

Radionuclide	MCL	DLR
Radium-226	5 pCi/L (combined radium-226 and -228)	1 pCi/L
Radium-228		1 pCi/L
Gross Alpha particle activity (excluding radon and uranium)	15 pCi/L	3 pCi/L
Uranium	20 pCi/L	1 pCi/L

(b) Each system shall monitor to determine compliance with the MCLs in table 64442, as follows:

(1) Monitor at each water source, or every entry point to the distribution system that is representative of all sources being used under normal operating conditions; conduct all monitoring at the same sample site(s) unless a change is approved by the State Board, based on a review of the system and its historical water quality data;

(2) For quarterly monitoring, monitor during the same month (first, second or third) of each quarter during each quarter monitored;

(3) By December 31, 2007, complete initial monitoring that consists of four consecutive quarterly samples at each sampling site for each radionuclide in table 64442, except that nontransient-noncommunity water systems shall not be required to monitor radium-228 as a separate analyte, but shall monitor for compliance with the combined radium MCL using the analytical method described in Prescribed Procedures for Measurement of Radioactivity in Drinking Water, Section 6, Alpha-emitting Radium Isotopes in Drinking Water, Method 903.0 (EPA/600/4-80-032, August 1980):

(A) Data collected for a sampling site between January 1, 2001, and December 31, 2004, may be used to satisfy the initial monitoring requirement, subject to the State Board's approval based on whether the analytical methods, DLRs, sampling sites, and the frequency of monitoring used were consistent with this article.

(B) For gross alpha particle activity, uranium, radium-226 and radium-228, the State Board may waive the final two quarters of initial monitoring at a sampling site if the results from the previous two quarters are below the DLR(s) and the sources are not known to be vulnerable to contamination.

(c) Any new system or new source for an existing system shall begin monitoring pursuant to Subsection (b) within the first quarter after initiating water service to the public.

(d) After initial monitoring, each system shall monitor for each radionuclide at each sampling site at a frequency determined by the monitoring result(s) [single sample result or average of sample results if more than one sample collected] from the most recent compliance period as follows:

(1) For nontransient-noncommunity water systems, the results for the total radium analyses shall be averaged.

(2) For community water systems, the results of radium-226 and radium-228 analyses shall be added and the average calculated.

(3) The values used for the radionuclide MCLs and DLRs shall be as specified in Table 64442.

(4) If the single sample result or average is:

A. Below the DLR, the system shall collect and analyze at least one sample every nine years (3 compliance periods).

B. At or above the DLR, but at or below $\frac{1}{2}$ the MCL, the system shall collect and analyze at least one sample every six years.

C. Above $\frac{1}{2}$ the MCL, but not above the MCL, the system shall collect and analyze at least one sample every three years.

(e) A system that monitors quarterly may composite up to four consecutive samples from a single sampling site if analysis is done within a year of the first sample's collection. If the result of the composited sample is greater than $\frac{1}{2}$ the MCL, at least one additional quarterly sample shall be analyzed to evaluate the range and trend of results over time before allowing the system to reduce the monitoring frequency.

(f) A gross alpha particle activity measurement may be substituted for other measurements by adding the 95% confidence interval (1.65σ , where σ is the standard deviation of the net counting rate of the sample) to it; and if,

(1) For uranium and radium measurements (after initial radium-228 monitoring has been completed), the gross alpha measurement does not exceed 5 pCi/L; or

(2) For radium measurements (after initial radium-228 monitoring has been completed), the result obtained from subtracting the uranium measurement from the gross alpha measurement does not exceed 5 pCi/L.

(g) If any sample result is greater than an MCL:

(1) For a system monitoring less than quarterly, quarterly samples shall be collected and analyzed to determine compliance, pursuant to subsection (h);

(2) For a system that already has four consecutive quarterly results, compliance shall be determined pursuant to subsection (h).

(3) The system shall monitor quarterly until the results of four consecutive quarterly sample results do not exceed the MCL.

(h) A system with one or more sample results greater than an MCL shall determine compliance with the MCL as follows:

(1) At each sampling site, based on the analytical results for that site. Any confirmation sample result shall be averaged with the initial result.

(2) Using all monitoring results collected under this section during the previous 12 months, even if more than the minimum required number of samples was collected.

(3) By a running annual average of four consecutive quarters of sampling results. Averages shall be rounded to the same number of significant figures as the MCL for which compliance is being determined.

(A) If any sample result will cause the annual average at any sample site to exceed the MCL, the system shall be out of compliance immediately upon receiving the result;

(B) If a system has not analyzed the required number of samples, compliance shall be determined by the average of the samples collected at the site during the most recent 12 months; and

(C) If a sample result is less than the DLR in table 64442, zero shall be used to calculate the annual average, unless a gross alpha particle activity is being used in lieu of radium-226, total radium, and/or uranium. In that case, if the gross alpha particle activity result is less than the DLR, ½ the DLR shall be used to calculate the annual average.

(4) If compositing is allowed at a sampling site, by the results of a composite of four consecutive quarterly samples.

(5) If the system can provide documentation that a sample was subject to sampling or analytical errors, the State Board may invalidate the result based on its review of the documentation, the sampling result, and the historical sampling data.

(6) Each system shall ensure that the laboratory analyzing its samples collected for compliance with this article calculates and reports the sample-specific Minimum Detectable Activity at the 95% confidence level (MDA95) along with the sample results. The MDA95 shall not exceed the DLR and shall be calculated as described in ANSI N42.23 Measurement and Associated Instrumentation Quality Assurance for Radiobioassay Laboratories, Appendix A.7.6 (September 10, 1995).

§64463.4. Tier 2 Public Notice

(a) A water system shall give public notice pursuant to this section if any of the following occurs:

- (1) Any violation of the MCL, MRDL, and treatment technique requirements, except:
 - (A) Where a Tier 1 public notice is required under section 64463.1; or
 - (B) Where the State Board determines that a Tier 1 public notice is required, based on potential health impacts and persistence of the violations;
- (2) All violations of the monitoring and testing procedure requirements in sections 64421 through 64426.1, article 3 (Primary Standards – Bacteriological Quality), for which the State Board determines that a Tier 2 rather than a Tier 3 public notice is required, based on potential health impacts and persistence of the violations;
- (3) Other violations of the monitoring and testing procedure requirements in this chapter, and chapters 15.5, 17 and 17.5, for which the State Board determines that a Tier 2 rather than a Tier 3 public notice is required, based on potential health impacts and persistence of the violations; or
- (4) Failure to comply with the terms and conditions of any variance or exemption in place.

(b) A water system shall give the notice as soon as possible within 30 days after it learns of a violation or occurrence specified in subsection (a), except that the water system may request an extension of up to 60 days for providing the notice. This extension would be subject to the State Board's written approval based on the violation or occurrence having been resolved and the State Board's determination that public health and welfare would in no way be adversely affected. In addition, the water system shall:

- (1) Maintain posted notices in place for as long as the violation or occurrence continues, but in no case less than seven days;

(2) Repeat the notice every three months as long as the violation or occurrence continues. Subject to the State Board's written approval based on its determination that public health would in no way be adversely affected, the water system may be allowed to notice less frequently but in no case less than once per year. No allowance for reduced frequency of notice shall be given in the case of a total coliform MCL violation or violation of a Chapter 17 treatment technique requirement; and

(3) For turbidity violations pursuant to sections 64652.5(c)(2) and 64653(c), (d) and (f), as applicable, a water system shall consult with the State Board as soon as possible within 24 hours after the water system learns of the violation to determine whether a Tier 1 public notice is required. If consultation does not take place within 24 hours, the water system shall give Tier 1 public notice within 48 hours after learning of the violation.

(c) A water system shall deliver the notice, in a manner designed to reach persons served, within the required time period as follows:

(1) Unless otherwise directed by the State Board in writing based on its assessment of the violation or occurrence and the potential for adverse effects on public health and welfare, community water systems shall give public notice by;

(A) Mail or direct delivery to each customer receiving a bill including those that provide their drinking water to others (e.g., schools or school systems, apartment building owners, or large private employers), and other service connections to which water is delivered by the water system; and

(B) Use of one or more of the following methods to reach persons not likely to be reached by a mailing or direct delivery (renters, university students, nursing home patients, prison inmates, etc.):

1. Publication in a local newspaper;

2. Posting in conspicuous public places served by the water system, or on the Internet; or

3. Delivery to community organizations.

(2) Unless otherwise directed by the State Board in writing based on its assessment of the violation or occurrence and the potential for adverse effects on public health and welfare, noncommunity water systems shall give the public notice by:

(A) Posting in conspicuous locations throughout the area served by the water system; and

(B) Using one or more of the following methods to reach persons not likely to be reached by a public posting:

1. Publication in a local newspaper or newsletter distributed to customers;

2. E-mail message to employees or students;

3. Posting on the Internet or intranet; or

4. Direct delivery to each customer.

§64469 Reporting Requirements

(d) Within 10 days of giving initial or repeat public notice pursuant to Article 18 of this Chapter, except for notice given under section 64463.7(d), each water system shall submit a certification to the State Board that it has done so, along with a representative copy of each type of public notice given.

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Este informe contiene información muy importante sobre su agua potable.
Tradúzcalo o hable con alguien que lo entienda bien.

**Canyon Fork Properties Has Levels of Uranium
Above Drinking Water Standards**

Water produced by the sole well, Well 02 of our water system failed a drinking water standard. Although this is not an emergency, as our customers, you have a right to know what you should do, what happened and what we are doing to correct this situation. We routinely monitor for the presence of drinking water contaminants. Water sample results collected on _____ [date] showed uranium levels of _____ [level and units]. This is above the standard or maximum contaminant level (MCL) of 20 pCi/L. Compliance is based on average of four quarters of data.

What should I do?

- **You do not need to use an alternative (e.g. bottled) water supply.** However, if you have specific health concerns, consult your doctor.
- *This is not an emergency. If it had been, you would have been notified immediately. However, some people who drink water containing uranium in excess of the MCL over many years may have kidney problems or an increased risk of getting cancer.*
- If you have other health issues concerning the consumption of this water, you may wish to consult your doctor.

What happened? What was done?

[Describe corrective action.] _____.
We anticipate resolving the problem within [estimated time frame] _____.
