I, David Alley, along with members of the high desert community, object to the open air facility that will process sewage sludge into compost up wind of Hinkley and Barstow for these and other reasons:

- We object to the process that San Bernardino County is using in permitting and regulating this facility.
- We object to the lack of our ability to partake in the process effectively.
- We object to the lack of representation from the County of San Bernardino and Supervisor Brad Mitzelfelt.
- We object to the lack of consideration of cost effective enclosure.
- We object to the lack of independent testing and monitoring on site.
- We object to the lack of objection by permitting agencies on the applicant's past history.
- We object to lack of emission regulations of the MDAQMD due to our currently clean air and their ineffective regulations.
- We object to a substandard level of protection for our area compared to where the sewage sludge is produced.
- We object to the price our town of 25,000 will have to pay for the waste of 2 million people if sewage sludge is dumped on the ground up wind of our community.

I, Richard K. Johnson, along with members of the high desert community object to the open air facility that will process sewage sludge into compost up wind of Hinkley and Barstow for these and other reasons:

- We object to the process that San Bernardino County is using in permitting and regulating this facility.
- We object to the lack of our ability to partake in the process effectively.
- We object to the lack of representation from the County of San Bernardino and Supervisor Brad Mitzelfelt.
- We object to the lack of consideration of cost effective enclosure.
- We object to the lack of independent testing and monitoring on site.
- We object to the lack of objection by permitting agencies on the applicant's past history.
- We object to lack of emission regulations of the MDAQMD due to our currently clean air and their ineffective regulations.
- We object to a substandard level of protection for our area compared to where the sewage sludge is produced.
- We object to the price our town of 25,000 will have to pay for the waste of 2 million people if sewage sludge is dumped on the ground up wind of our community.

I, Sarah Kelley, along with members of the high desert community, object to the open air facility that will process sewage sludge into compost up wind of Hinkley and Barstow for these and other reasons:

- We object to the process that San Bernardino County is using in permitting and regulating this facility.
- We object to the lack of our ability to partake in the process effectively.
- We object to the lack of representation from the County of San Bernardino and Supervisor Brad Mitzelfelt.
- We object to the lack of consideration of cost effective enclosure.
- We object to the lack of independent testing and monitoring on site.
- We object to the lack of objection by permitting agencies ^{based} on the applicant's past history.
- We object to lack of emission regulations of the MDAQMD due to our currently clean air and their ineffective regulations.
- We object to a substandard level of protection for our area compared to where the sewage sludge is produced.
- We object to the price our town of 25,000 will have to pay for the waste of 2 million people if sewage sludge is dumped on the ground up wind of our community.

Since the people who comprise the permitting agencies think the sludge composting facility will be no problem, why not put this facility in their neighborhoods? Let them convince their neighbors it's no problem, because the people in Hinkley and Barstow aren't buying it!

- We object to the price our town of 25,000 will have to pay for the waste of 2 million people if sewage sludge is dumped on the ground up wind of our community.

I object to the fact that we will not be able to sell or afford to move due to the ~~strong~~ odor of the. We are already suffering due to the water contamination in other areas of Hinkley. Why can they not at least locate the facility. Why did Supervisor Brad Mitzelfelt not leave it in his back yard newberry. Is this is such a great idea?

I, Denise Valenzuela, along with members of the high desert community, object to the open air facility that will process sewage sludge into compost up wind of Hinkley and Barstow for these and other reasons:

- We object to the process that San Bernardino County is using in permitting and regulating this facility.
- We object to the lack of our ability to partake in the process effectively.
- We object to the lack of representation from the County of San Bernardino and Supervisor Brad Mitzelfelt.
- We object to the lack of consideration of cost effective enclosure.
- We object to the lack of independent testing and monitoring on site.
- We object to the lack of objection by permitting agencies on the applicant's past history.
- We object to lack of emission regulations of the MDAQMD due to our currently clean air and their ineffective regulations.
- We object to a substandard level of protection for our area compared to where the sewage sludge is produced.
- We object to the price our town of 25,000 will have to pay for the waste of 2 million people if sewage sludge is dumped on the ground up wind of our community.
