I, Robert L. Berkman, along with members of the high desert community, object to the open air facility that will process sewage sludge into compost up wind of Hinkley and Barstow for these and other reasons:

- We object to the process that San Bernardino County is using in permitting and regulating this facility.
- We object to the lack of our ability to partake in the process effectively.
- We object to the lack of representation from the County of San Bernardino and Supervisor Brad Mitzelfelt.
- We object to the lack of consideration of cost effective enclosure.
- We object to the lack of independent testing and monitoring on site.
- We object to the lack of objection by permitting agencies on the applicant's past history.
- We object to lack of emission regulations of the MDAQMD due to our currently clean air and their ineffective regulations.
- We object to a substandard level of protection for our area compared to where the sewage sludge is produced.
- We object to the price our town of 25,000 will have to pay if the sewage sludge of 2 million people is dumped on the ground up wind of our community.

*I place great value on California's deserts. As designed this project will degrade, unnecessarily, our desert, and set a precedent for similar projects, further degrading the desert.*

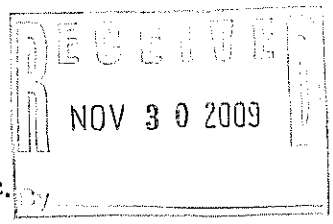

*DON'T PERMIT THIS PROJECT AS DESIGNED. REQUIRE THAT IT BE ENVIRONMENTALLY RESPONSIBLE*

- We object to lack of emission regulations of the MDAQMD due to our currently clean air and their ineffective regulations.
- We object to a substandard level of protection for our area compared to where the sewage sludge is produced.
- We object to the price our town of 25,000 will have to pay for the waste of 2 million people if sewage sludge is dumped on the ground up wind of our community.

I, DAVID A WOOD, along with members of the high desert community, object to the open air facility that will process sewage sludge into compost up wind of Hinkley and Barstow for these and other reasons:

- We object to the process that San Bernardino County is using in permitting and regulating this facility.
- We object to the lack of our ability to partake in the process effectively.
- We object to the lack of representation from the County of San Bernardino and Supervisor Brad Mitzelfelt.
- We object to the lack of consideration of cost effective enclosure.
- We object to the lack of independent testing and monitoring on site.
- We object to the lack of objection by permitting agencies on the applicant's past history.
- We object to lack of emission regulations of the MDAQMD due to our currently clean air and their ineffective regulations.
- We object to a substandard level of protection for our area compared to where the sewage sludge is produced.
- We object to the price our town of 25,000 will have to pay if the sewage sludge of 2 million people is dumped on the ground up wind of our community.
