<sup>1</sup>**Completion Year.** For listings with USEPA-approved TMDLs (Categories 4A and 5B), this refers to the USEPA approval year. For listings still needing TMDLs (Category 5A), the completion year is the projected Lahontan Water Board action date. For listings being addressed by actions other than TMDLs (Categories 4B and 5C), the completion year is the projected attainment date for water quality standards.

<sup>2</sup>**Category.** The Integrated Report includes two categories and 5 subcategories for water body-pollutant combinations in which the applicable standard is not attained (“listings”). The subcategories can be summarized as follows:

4A. All listings for this water body are being addressed by USEPA-approved TMDLs.

4B. All listings for this water body are being addressed by regulatory actions other than TMDLs.

4C. This water body is impacted by “pollution” rather than by a “pollutant.”

5A. This listing still needs a TMDL.

5B. This listing is being addressed by a USEPA-approved TMDL but other listings for the same water body still need TMDLs.

5C. This listing is being addressed by a regulatory action other than a TMDL but other listings for the same water body still need TMDLs.

<sup>3</sup>**Listings for new water body segments.** Existing listings are being carried over to new segments created for the Susan River and Mammoth Creek.

<sup>4</sup>This segment was previously listed for “Nitrogen” on the basis of data for several forms of nitrogen. State Board staff requested that nitrate be assessed separately, resulting in a separate listing.
